COMPONENT 3 - LIGHT, NUCLEI AND OPTIONS

## MARK SCHEME

## GENERAL INSTRUCTIONS

The mark scheme should be applied precisely and no departure made from it.

## Recording of marks

Examiners must mark in red ink.
One tick must equate to one mark (except for the extended response question).
Question totals should be written in the box at the end of the question.
Question totals should be entered onto the grid on the front cover and these should be added to give the script total for each candidate.
Marking rules
All work should be seen to have been marked.
Marking schemes will indicate when explicit working is deemed to be a necessary part of a correct answer.
Crossed out responses not replaced should be marked.
Credit will be given for correct and relevant alternative responses which are not recorded in the mark scheme.

## Extended response question

A level of response mark scheme is used. Before applying the mark scheme please read through the whole answer from start to finish. Firstly, decide which level descriptor matches best with the candidate's response: remember that you should be considering the overall quality of the response. Then decide which mark to award within the level. Award the higher mark in the level if there is a good match with both the content statements and the communication statement.

Marking abbreviations
The following may be used in marking schemes or in the marking of scripts to indicate reasons for the marks awarded.

```
cao = correct answer only
ecf = error carried forward
bod = benefit of doubt
```

| Question |  |  | Marking details | Marks available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| 11 | (a) |  |  | Both feet apart and in line (1) Centre of gravity acts between both feet (1) | 1 | 1 |  | 2 |  |  |
|  | (b) |  | $(T \times 28.5)=(20 \times 9.5)+(560 \times 21)$ i.e. principle of moments applied correctly (1) $T=419[\mathrm{~N}](1)$ | 1 | 1 |  | 2 | 2 |  |
|  | (c) |  | Correct selection of equations to determine the time of flight and range (1) <br> Correct method to determine the time of flight and range (1) <br> No. 6 iron $x=186$ [m] (1) <br> No. 7 iron $x=151$ [m] (1) <br> Choose No. 7 iron - need conclusion (no ecf) (1) | $\begin{aligned} & 1 \\ & 1 \end{aligned}$ |  | $\begin{aligned} & 1 \\ & 1 \\ & 1 \end{aligned}$ | 5 | 3 |  |
|  | (d) | (i) | Forces clearly identified as lift, drag and weight (1) Backspin provides more lift or equivalent e.g. air pressure reduced behind the ball (1) <br> Description of ball landing e.g. ball spins back or stops suddenly so ball will not travel far on landing (or roll forward)(1) <br> Well argued conclusion (1) |  | $\begin{aligned} & 1 \\ & 1 \end{aligned}$ | $\begin{aligned} & 1 \\ & 1 \end{aligned}$ | 4 |  |  |
|  |  | (ii) | $\omega=2 \pi 50=314\left[\mathrm{rads}^{-1}\right](1)$ <br> Correct use of density formula (1) <br> $I=\frac{2}{5} \times 0.046 \times(0.0214)^{2}$ i.e. correct substitution (1) <br> Rotational KE $=0.4$ [J] (1) | 1 | $\begin{aligned} & 1 \\ & 1 \\ & 1 \end{aligned}$ |  | 4 | 4 |  |
|  |  | (iii) | Angular acceleration $\alpha=628000\left[\mathrm{rad} \mathrm{s}^{-2}\right]$ (1) <br> Using correct equation to determine, torque, $\tau=I \alpha$ (1) <br> Torque $\tau=529[\mathrm{Nm}]$ (1) | 1 | $\begin{aligned} & 1 \\ & 1 \end{aligned}$ |  | 3 | 2 |  |
|  |  |  | Question 11 total | 6 | 9 | 5 | 20 | 11 | 0 |

| Question |  |  | Marks available |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 12 | (a) | (i) | Object totally or partially immersed in a fluid (accept liquid or <br> gas) is buoyed (accept lifted, upward force, upthrust) by a force <br> equal to the weight of the displaced fluid |  | AO1 | AO2 | AO3 | Total | Maths |

| Question |  | Marking details | Marks available |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 12 | (c) | (i) | Any 2 x (2) from: <br> Easily controllable (accept: no chain reaction) (1) <br> Because can switch off protons/hydrogen (1) <br> Or <br> No radioactive by-products or products are alpha particles (1) <br> Any good relevant detail e.g. no storage costs for thousands of <br> years or alpha particles easily contained etc. (1) <br> Or <br> Fuel cheaper than fuel for fission (1) <br> Detail e.g. per MJ output, H from the sea, no isotope enrichment <br> needed, selling the He would help pay for the fuel (1) <br> Or <br> Fuel supplies would last longer than for fission (1) <br> Detail: sensible remarks about U and H (1) | AO1 | AO2 | AO3 | Total | Maths |

| Question |  | Marking details | Marks available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | A01 | AO2 | AO3 | Total | Maths | Prac |
| 12 | (iv) |  | Answer (iii) $\times 17.1 \mathrm{MeV}$ (or its J equivalent $2.74 \times 10^{-12}$ ) (1) Tolerate slips in powers of 10; answer mark will be lost. <br> Previous answer / $5 \times 10^{20}$ (regardless of mixed units) (1) <br> Answer $=4.7 \times 10^{9}$ and comment that claim is valid (1) |  | 1 | 1 | 3 | 3 |  |
|  |  | Question 12 total | 6 | 9 | 5 | 20 | 11 | 0 |

COMPONENT 3: LIGHT, NUCLEI AND OPTIONS
SUMMARY OF MARKS ALLOCATED TO ASSESSMENT OBJECTIVES

| Question | A01 | AO2 | AO3 | TOTAL MARK | MATHS | PRAC |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 7 | 9 | 4 | 20 | 11 | 0 |
| 2 | 4 | 11 | 5 | 20 | 10 | 8 |
| 3 | 1 | 6 | 3 | 10 | 7 | 0 |
| 4 | 4 | 4 | 6 | 14 | 1 | 10 |
| 5 | 4 | 2 | 0 | 6 | 3 | 0 |
| 6 | 4 | 4 | 2 | 10 | 6 | 0 |
| 7 | 3 | 5 | 2 | 10 | 5 | 0 |
| 8 | 3 | 4 | 3 | 10 | 0 | 0 |
| $\begin{aligned} & \text { SECTION A } \\ & \text { TOTAL } \end{aligned}$ | 30 | 45 | 25 | 100 | 43 | 18 |
| 9 (option A) | 6 | 9 | 5 | 20 | 11 | 0 |
| 10 (option B) | 6 | 9 | 5 | 20 | 11 | 0 |
| 11 (option C) | 6 | 9 | 5 | 20 | 11 | 0 |
| 12 (option D) | 6 | 9 | 5 | 20 | 11 | 0 |
| OVERALL TOTAL | 36 | 54 | 30 | 120 | 55 | 18 |
