| :---: | :---: | :---: | :---: |
| 2 | $I_{3}=I_{2}+I_{1} \quad$ (possible reference to (Q/t) $)_{1}$ etc accepted) | (1) |  |
|  | Charge is conserved Or Conservation of charge Or charge into point = charge out of point Or no charge lost | (1) |  |
|  | Correct reference to same time (e.g. same charge etc in same time $\mathbf{O r}(Q / t)_{3}=(Q / t)_{1}+(Q / t)_{2}$ etc) | (1) | 3 |
|  | Total for question |  | 3 |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{3}$ | current same in series Or current is different if not in series <br> to ensure the total resistance in the circuit isn't increased Or to ensure no pd <br> lost <br> because that would reduce the current being measured <br> lJust saying current changes or resistance changes is not sufficient for MP2 and | (1) |
| 3. Candidates wh only refer to what would happen if ammeter in parallel can <br> only score MP1] | $\mathbf{3}$ |  |
|  | Total for question | $\mathbf{3}$ |
