Mark scheme

---

4403  
June 2014

---

Version: 1.0 Final

---

---

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts: alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Assessment Writer.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available from [aqa.org.uk](http://aqa.org.uk)

## Information to Examiners

### 1. General

The mark scheme for each question shows:

- the marks available for each part of the question
- the total marks available for the question
- the typical answer or answers which are expected
- extra information to help the Examiner make his or her judgement and help to delineate what is acceptable or not worthy of credit or, in discursive answers, to give an overview of the area in which a mark or marks may be awarded
- the Assessment Objectives and specification content that each question is intended to cover.

The extra information is aligned to the appropriate answer in the left-hand part of the mark scheme and should only be applied to that item in the mark scheme.

At the beginning of a part of a question a reminder may be given, for example: where consequential marking needs to be considered in a calculation; or the answer may be on the diagram or at a different place on the script.

In general the right-hand side of the mark scheme is there to provide those extra details which confuse the main part of the mark scheme yet may be helpful in ensuring that marking is straightforward and consistent.

### 2. Emboldening

- 2.1** In a list of acceptable answers where more than one mark is available ‘any **two** from’ is used, with the number of marks emboldened. Each of the following bullet points is a potential mark.
- 2.2** A bold **and** is used to indicate that both parts of the answer are required to award the mark.
- 2.3** Alternative answers acceptable for a mark are indicated by the use of **or**. Different terms in the mark scheme are shown by a / ; e.g. allow smooth / free movement.

### 3. Marking points

#### 3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which candidates have provided extra responses. The general principle to be followed in such a situation is that ‘right + wrong = wrong’.

Each error / contradiction negates each correct response. So, if the number of error / contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as \* in example 1) are not penalised.

Example 1: What is the pH of an acidic solution? (1 mark)

Candidate	Response	Marks awarded
1	green, 5	0
2	red*, 5	1
3	red*, 8	0

Example 2: Name two planets in the solar system. (2 marks)

Candidate	Response	Marks awarded
1	Neptune, Mars, Moon	1
2	Neptune, Sun, Mars, Moon	0

### 3.2 Use of chemical symbols / formulae

If a candidate writes a chemical symbol / formula instead of a required chemical name, full credit can be given if the symbol / formula is correct and if, in the context of the question, such action is appropriate.

### 3.3 Marking procedure for calculations

Full marks can be given for a correct numerical answer, without any working shown.

However, if the answer is incorrect, mark(s) can be gained by correct substitution / working and this is shown in the 'extra information' column or by each stage of a longer calculation.

### 3.4 Interpretation of 'it'

Answers using the word 'it' should be given credit only if it is clear that the 'it' refers to the correct subject.

### 3.5 Errors carried forward

Any error in the answers to a structured question should be penalised once only.

Papers should be constructed in such a way that the number of times errors can be carried forward are kept to a minimum. Allowances for errors carried forward are most likely to be restricted to calculation questions and should be shown by the abbreviation e.c.f. in the marking scheme.

### 3.6 Phonetic spelling

The phonetic spelling of correct scientific terminology should be credited **unless** there is a possible confusion with another technical term.

### 3.7 Brackets

(.....) are used to indicate information which is not essential for the mark to be awarded but is included to help the examiner identify the sense of the answer required.

### 3.8 Ignore / Insufficient / Do **not** allow

Ignore or insufficient is used when the information given is irrelevant to the question or not enough to gain the marking point. Any further correct amplification could gain the marking point.

Do **not** allow means that this is a wrong answer which, even if the correct answer is given, will still mean that the mark is not awarded.

## Quality of Written Communication and levels marking

In Question 9(a) candidates are required to produce extended written material in English, and will be assessed on the quality of their written communication as well as the standard of the scientific response.

Candidates will be required to:

- use good English
- organise information clearly
- use specialist vocabulary where appropriate.

The following general criteria should be used to assign marks to a level:

### Level 1: basic

- Knowledge of basic information
- Simple understanding
- The answer is poorly organised, with almost no specialist terms and their use demonstrating a general lack of understanding of their meaning, little or no detail
- The spelling, punctuation and grammar are very weak.

### Level 2: clear

- Knowledge of accurate information
- Clear understanding
- The answer has some structure and organisation, use of specialist terms has been attempted but not always accurately, some detail is given
- There is reasonable accuracy in spelling, punctuation and grammar, although there may still be some errors.

### Level 3: detailed

- Knowledge of accurate information appropriately contextualised
- Detailed understanding, supported by relevant evidence and examples
- Answer is coherent and in an organised, logical sequence, containing a wide range of appropriate or relevant specialist terms used accurately.
- The answer shows almost faultless spelling, punctuation and grammar.

Question	Answers	Extra information	Mark	AO spec ref
<b>1(a)</b>	transmits	correct order	1	AO1
	absorbs		1	3.1.1b
<b>1(b)</b>	light	allow ultra violet <b>or</b> UV <b>or</b> infrared <b>or</b> IR <b>or</b> gamma	1	AO1 3.1.1b
<b>1(c)</b>	20	allow <b>1</b> mark for correct working, ie $\frac{60}{3}$ provided no subsequent step	2	AO2 3.1.1b
<b>1(d)</b>	Killing cancer cells		1	AO1 3.1.1b
<b>Total</b>			<b>6</b>	

Question	Answers	Extra information	Mark	AO spec ref
2(a)	3000	allow 1 mark for correct substitution, ie $600 \times 5$ provided no subsequent step	2	AO2 3.2.2b
2(b)	anticlockwise moment	must be both words	1	AO1 3.2.2c
2(c)(i)	3400	allow 3.4 kilo (newtons)	1	AO2 3.2.2c
2(c)(ii)	as the distance (of the girl from point A) increases, force F increases	allow gets bigger for increases force is (directly) proportional to distance will negate any correct response	1	AO3 4.5.3
<b>Total</b>			<b>5</b>	

Question	Answers	Extra information	Mark	AO spec ref		
3(a)		ignore shaded row each correct row = 1 mark	3	AO1 3.1.4a, d		
					Digital Camera	Eye
	Cornea					✓
	Lens				✓	✓
	Pupil					✓
	CCD	✓				
3(b)	long		1	AO1 3.1.4b		
3(c)	lens A	this mark is only gained if lens A is stated  any reference to lens material or mass of lens negates this mark  allow it will focus light onto the retina	1	AO1 3.1, 3.1.4b		
	it is a concave / diverging lens		1			
3(d)	The refractive index of the lens material		1	AO1 3.1.4f		
3(e)	4	ignore any signs  allow 1 mark for correct substitution, ie $\frac{1}{0.25}$ provided no subsequent step	2	AO2 3.1.4e		

Question 3 continues on the next page . . .

## Question 3 continued . . .

Question	Answers	Extra information	Mark	AO spec ref
3(f)	Cauterising open blood vessels		1	AO1 3.1.5f
3(g)	5	allow 1 mark for correct substitution, ie $\frac{70}{14}$ provided no subsequent step	2	AO2 3.1.3i
<b>Total</b>			<b>12</b>	

Question	Answers	Extra information	Mark	AO spec ref
4(a)	concentrated		1	AO1 3.2.1a
4(b)		judge by eye	1	AO2 3.2.1c
4(c)	C A D	3 correct = 2 marks 1 or 2 correct = 1 mark	2	AO1 3.2.1a
4(d)	Lower the athlete's seating position Move the wheels further apart		1 1	AO2 3.2
<b>Total</b>			<b>6</b>	

Question	Answers	Extra information	Mark	AO spec ref
5(a)	hydraulic		1	AO1 3.2.3
5(b)	9	allow 1 mark for a correct substitution, ie $\frac{1800}{200}$ provided no subsequent step	2	AO2 3.2.3c
5(c)	an environmental		1	AO3 SALoSE
<b>Total</b>			<b>4</b>	

Question	Answers	Extra information	Mark	AO spec ref
6(a)(i)	increase		1	AO3 3.3.1a, 4.5.4
6(a)(ii)	A and B and B and C	both required for the mark either order	1	AO3 3.3.1a, 4.5.4
6(a)(iii)	any <b>two</b> from: <ul style="list-style-type: none"> <li>• size of nail <b>or</b> nail material</li> <li>• current</li> <li>• (size of) paper clip</li> <li>• length of wire</li> </ul>	allow (same) nail  allow (same) cell allow p.d.  same amount of electricity is insufficient  accept type/thickness of wire	2	AO3 4.1b
6(b)	4  B picks up the same number as C, so this electromagnet would pick up the same number as A <b>or</b> direction of current does not affect the strength of the electromagnet	allow it has got the same number of turns as A	1  1	AO3  3.3.1a, 4.5.4
6(c)	2	allow 1 or 3	1	AO3 3.3.1a, 4.5.4
<b>Total</b>			<b>7</b>	

Question	Answers	Extra information	Mark	AO spec ref
7(a)	(sound waves) which have a frequency higher than the upper limit of hearing for humans <b>or</b> a (sound) wave (of frequency) above 20 000 Hz	sound waves that cannot be heard is insufficient  a wave of frequency 20 000 Hz is insufficient	1	AO1 3.1.2a
7(b)	640	an answer of 1280 gains <b>2</b> marks  allow <b>2</b> marks for the correct substitution ie $1600 \times 0.40$ provided no subsequent step  allow <b>2</b> marks for the substitution $\frac{1600 \times 0.80}{2}$ provided no subsequent step  allow <b>1</b> mark for the substitution $1600 \times 0.80$ provided no subsequent step  allow <b>1</b> mark for the identification that time (boat to bed) is 0.4	3	AO2 3.1.2c
7(c)	any <b>one</b> from: <ul style="list-style-type: none"> <li>pre-natal scanning / imaging</li> <li>imaging of a named organ (that is not surrounded by bone), eg stomach, bladder, testicles</li> <li>Doppler scanning blood flow</li> </ul>	accept heart  do <b>not</b> allow brain <b>or</b> lungs (either of these negates a correct answer)	1	AO1 3.1.2d

Question 7 continues on the next page . . .

## Question 7 continued . . .

Question	Answers	Extra information	Mark	AO spec ref
7(d)	advantage any <b>one</b> from: <ul style="list-style-type: none"> <li>• (images are) high quality or detailed or high resolution</li> <li>• (scan) produces a slice through the body</li> <li>• image can be viewed from any direction</li> <li>• an image can be made of <u>any</u> part (inside the body)</li> <li>• easier to diagnose <b>or</b> see a problem (on the image)</li> </ul>	clearer / better image is sufficient  allow images are (always) 3D / 360° allow whole body can be scanned	1	AO1 3.1
	disadvantage any <b>one</b> from: <ul style="list-style-type: none"> <li>• (the X-rays used <b>or</b> scans) are <u>ionising</u></li> <li>• mutate cells <b>or</b> cause mutations <b>or</b> increase chances of mutations</li> <li>• turn cells cancerous <b>or</b> produce abnormal growths <b>or</b> produce rapidly growing cells</li> <li>• kill cells</li> <li>• shielding is needed</li> </ul>	allow a description of what ionising is  allow for cells: DNA / genes / chromosomes / nucleus / tissue  damage cells is insufficient  can be dangerous (to human health) unqualified, is insufficient	1	
<b>Total</b>			<b>7</b>	

Question	Answers	Extra information	Mark	AO spec ref
<b>8(a)</b>	gravitational attraction (between the satellite and the Earth)	allow gravity allow weight of the satellite	1	AO1 3.2.4b
<b>8(b)</b>	any <b>two</b> from: <ul style="list-style-type: none"> <li>mass of satellite</li> <li>speed / velocity (of satellite)</li> <li>radius of orbit / circle</li> </ul>	allow height above the Earth radius / height alone is insufficient	2	AO1 3.2.4c
<b>8(c)(i)</b>	increasing the height (above the Earth's surface) increases the time (for one orbit)	allow a positive correlation  allow as one gets bigger, the other gets bigger, or vice versa  ignore they are directly proportional	1	AO3 4.5.3
<b>8(c)(ii)</b>	there is no relationship / correlation		1	AO3 4.5.3
<b>8(d)</b>	Isaac Newton was a respected scientist who had made new discoveries before		1	AO3 3.2.4, SALoSE
<b>Total</b>			<b>6</b>
