

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2006 question paper**0625 PHYSICS****0625/05**

Paper 5 (Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

The grade thresholds for various grades are published in the report on the examination for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2006 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme	Syllabus	Paper
	IGCSE - OCT/NOV 2006	0625	05

- 1 (a) m in g, sensible value (10 – 50) [1]
- (b) l in cm, sensible value (6 – 10) [1]
At least 3 measurements taken [1]
- (c) Average calculated (method) [1]
- (d) At least 30 cm of string used [1]
 c value sensible in cm (8 – 13 cm) [1]
- (e) correct V (ignore unit, ecf) [1]
- (f) V_r less than V by up to 10% and whole number [1]
- (g) correct d (ecf) [1]
1/2/3 significant figures [1]

[Total: 10]

- 2 (a) – (d) Table: [1]
5 sets of t and T values [1]
Correct T [1]
Consistent 3 or consistent 4 significant figures for T [1]
- (e) Graph: [1]
Sensible T scale, labelled, plots covering more than $\frac{1}{2}$ grid [1]
Plots to $\frac{1}{2}$ square [1]
Well judged line [1]
Line thin [1]
All plots to within $\pm 0.05s$ on line [1]
- (f) statement NO and [1]
Reason not straight line through origin OR it is a curve [1]
- (g) one of: [1]
Repeats
More swings
More d values/larger range
Small/constant amplitude [1]

[Total: 10]

- 3 (a) – (i) & (k) – (p) Trace: [1]
Neat and complete [1]
Normal at 90° (by eye) [1]
GJ at $30^\circ (\pm 2^\circ)$ [1]
AG = 11.4cm – 11.6 cm [1]
 P_3P_4 distance ≥ 5 cm [1]
- (j) candidate's r_1 correct to $\pm 2^\circ$ [1]
- (q) candidate's r_2 correct to $\pm 2^\circ$ [1]
 R values $28^\circ - 32^\circ$ and $47^\circ - 51^\circ$ (ignore unit) [1]
- (r) bases [1]
Pins may not be vertical (or words to that effect) [1]

[Total: 10]

Page 3	Mark Scheme	Syllabus	Paper
	IGCSE - OCT/NOV 2006	0625	05

- 4 (b) – (c) table complete, temperatures decreasing [1]
 Temperatures to nearest 1°C [1]
- (d) sensible V (150 – 250) [1]
 cm^3 (or ml) [1]
- (e) second table complete, temperatures decreasing [1]
- (f) correct conclusion (see readings) [1]
 Justification quoting temperature difference [1]
- (g) Variables:
 Three from:
 Volume of water
 Initial temperature
 Room temperature
 Same beaker for each experiment
 Position of thermometer
 Draughts/sunlight
 Humidity [3]

[Total: 10]
