# Pearson Edexcel 

Mark Scheme
(Results)

November 2021

Pearson Edexcel GCSE
In Physics (1PH0) Paper 1F

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at:www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Mark schemes have been developed so that the rubrics of each mark scheme reflects the characteristics of the skills within the AO being targeted and the requirements of the command word. So for example the command word 'Explain' requires an identification of a point and then reasoning/justification of the point.
Explain questions can be asked across all AOs. The distinction comes whether the identification is via a judgment made to reach a conclusion, or, making a point through application of knowledge to reason/justify the point made through application of understanding. It is the combination and linkage of the marking points that is needed to gain full marks.
When marking questions with a 'describe' or 'explain' command word, the detailed marking guidance below should be consulted to ensure consistency of marking.

| Assessment <br> Objective |  | Command Word |  |
| :--- | :--- | :--- | :--- |
| Strand | Element | Describe | Explain |
| AO1* | An answer that combines the <br> marking points to provide a logical <br> description | An explanation that links <br> identification of a point with <br> reasoning/justification(s) as <br> required |  |
| AO2 | An answer that combines the <br> marking points to provide a logical <br> description, showing application of <br> knowledge and understanding | An explanation that links <br> identification of a point (by <br> applying knowledge) with <br> reasoning/justification (application <br> of understanding) |  |
| AO3 | 1 a and <br> $1 b$ | An answer that combines points of <br> interpretation/evaluation to <br> provide a logical description |  |
| AO3 | 2a and <br> $2 b$ |  | An explanation that combines <br> identification via a judgment to <br> reach a conclusion via <br> justification/reasoning |
| AO3 | 3a | An answer that combines the <br> marking points to provide a logical <br> description of the <br> plan/method/experiment |  |
| AO3 | $3 b$ |  | An explanation that combines <br> identifying an improvement of the <br> experimental procedure with a <br> linked justification/reasoning |

[^0]| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a )}$ | C Mercury | (1) <br> AO1 |
|  | A is incorrect Jupiter is the fifth planet from the Sun <br> B is incorrect Mars is the fourth planet from the Sun <br> D is incorrect Venus is the second planet from the Sun |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( b )}$ | D a natural satellite |  | (1) <br> AO1 |
|  | A is incorrect, the Moon is not an asteroid <br> B is incorrect, the Moon is not a comet <br> C is incorrect, the Moon is not a nebula |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( c )}$ | Any two of the following |  | (2) |
|  | 1. mass (1) <br> 2. radius (1) | allow made of different <br> substance/ material <br> if no other mark <br> awarded, allow 1 mark <br> for (Moon is ) smaller <br> or Earth is bigger |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( d )}$ | substitution (1) <br> $(\mathrm{W}=) 6.0 \times 1.6$ | (3) <br> AO2(2) <br> award full marks for <br> correct answer <br> without working. | AO1(1) |
|  | 9.6 | unit (independent mark)(1) | accept N, n and/or <br> Newton |
| newton | $9.6 \mathrm{~N} / \mathrm{n}$ gains full <br> marks |  |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2a(i) | C |  | (1) |
|  | ultraviolet infrared ${ }^{\text {r }}$ radio |  | AO1 |
|  | A is incorrect infrared should be in K, radio should be in $L$ and ultraviolet in J, <br> $B$ is incorrect radio should be in $L$ and ultraviolet should be in K $D$ is incorrect radio should be in $L$ and infrared in K |  |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2a (ii) | C speed |  | (1) <br> amplitude, frequency and <br> wavelength are not the same for all <br> EM waves |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2(b) (i) | One from: <br> seeing (broken) bones (1) <br> radiotherapy (1) <br> detecting cracks in metals (1) <br> airport security (1) <br> observing the internal structure of <br> objects(1) | seeing inside the <br> body | AO1 |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2(b) (ii) | One from: <br> can cause cancer (1) <br> can cause burns(1) <br> \{damage/kills/harms\} cells/tissue <br> (1) <br> mutates DNA/cells (1) | harms organ(s) / <br> foetus <br> allow (highly) <br> ionising | (1) <br> AO1 |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2(c) | infrared (1) | must be in first <br> sentence space | AO2 |
| must be in second |  |  |  |
| sentence space |  |  |  |
| thermal (1) | award 2 marks for <br> answers in this order |  |  |

Total marks for question $\mathbf{2 = 6}$ marks

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3a | A two |  | (1) <br> AO1 |
|  | B is not correct as a uranium <br> nucleus does not split to give 3 <br> daughter nuclei <br> C is not correct as a uranium <br> nucleus does not split to give 4 <br> daughter nuclei <br> D is not correct as a uranium <br> nucleus does not split to give 5 <br> daughter nuclei |  |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 3bi | A description including: <br> EITHER <br> neutrons are absorbed by uranium nuclei/atoms (1) <br> more neutrons are produced/emitted (which are absorbed by uranium nuclei) <br> OR <br> diagram (no labels needed) <br> two nuclei/atoms splitting (1) four or more nuclei/atoms splitting (1) | ignore any reference to bonds <br> accept hit /collide with <br> accept a controlled chain reaction diagram for 2 marks | $\begin{aligned} & \text { (2) } \\ & \text { AO1 } \end{aligned}$ |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3bii | An explanation linking: <br> (because the moderator/it) <br> slows down/increases the chance <br> of absorption of(1) <br> neutrons (1) | (2) <br> AO1 |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3biii | substitution(1) <br> $2\left(.0 \times 10^{(17)}\right) \times 4\left(.0 \times 10^{(-11)}\right)$ <br> evaluation $(1)$ <br> $8(.0) \times 10^{6}(\mathrm{~J})$ | (2) <br> AO2 |  |
|  |  | accept 8000000(J) <br> accept 8MJ <br> 8 to any other power <br> of ten scores 1 mark <br> award full marks for <br> correct answer <br> without working. |  |

$\left.\begin{array}{|l|l|l|l|}\hline \begin{array}{l}\text { Question } \\ \text { number }\end{array} & \text { Answer } & \text { Additional guidance } & \text { Mark } \\ \hline \text { 3c } & \text { A description including } & & \begin{array}{l}\text { (2) } \\ \text { AO1 }\end{array} \\ & \begin{array}{ll}\text { hydrogen nuclei/atoms join (1) } \\ \text { helium is produced (1) } \\ \text { one from } \\ \text { lost (total) mass (1) } \\ \text { mass is converted to energy (1) }\end{array} & \begin{array}{l}\text { larger/heavier nucleus } \\ \text { produced }\end{array} & \text { energy is released }\end{array}\right]$

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4 (a)(i) | substitution (1) <br> $(\Delta G P E=) 64 \times 10 \times 24$ <br> evaluation (1) <br> $15000(\mathrm{~J})$ | (2) <br> AO2 |  |
|  |  | accept $15360(\mathrm{~J})$ <br> or $15400(\mathrm{~J})$ <br> award full marks for <br> correct answer <br> without working. |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4 (a)(ii) | substitution (1) <br> $(\mathrm{KE}=) 1 / 2 \times 64 \times 6^{(2)}$ <br> calculation of $6^{2}(1)$ <br> evaluation (1) <br> $1200(\mathrm{~J})$ | (3) <br> AO2 |  |
|  |  | accept 1152(J) <br> award full marks for <br> correct answer <br> without working. | $192(\mathrm{~J})$ scores 2 <br> marks |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(a)(iii) | an explanation linking any two <br> from: <br> the kinetic energy (store)/it <br> decreases (to zero) (1) <br> (the energy) has dissipated (1) | (2) <br> AO2 <br> transferred <br> to ground/brake(s) <br> tods | make the brakes hot |
|  | thermal energy (store) increases <br> (1) |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(b)(i) | $5000(\mathrm{~J})$ | $24000-19000$ | (1) <br> AO2 |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4 (b)(ii) | substitution (1) <br> (efficiency = $\frac{19000(x 100 \%)}{24000}$ | (2) <br> AO2 |  |
| evaluation(1) | allow 0.8 <br> do not award 79 <br> without percentage | award full marks for <br> correct answer without <br> working. |  |

## Total marks for Question $4=10$

| 5(a)(i) | D travelling more slowly <br> A is incorrect, more passengers <br> would increase the stopping <br> distance |
| :--- | :--- | :--- | :--- |
| B is incorrect, worn tyres would |  |
| increase the stopping |  |
| distance |  |$\quad$| (1) |
| :--- |
| AO1 |
| Cis incorrect, if the car needed |
| new brakes this would |
| increase the stopping |
| distance |$\quad$| ( |
| :--- |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ~ ( a ) ( i i ) ~}$ | identification of horizontal line <br> as reaction time (1) |  | (2) <br> AO3 |
| evaluation (1) <br> 0.6 (s) | award full marks for <br> correct answer without <br> working | 0.7 scores 1 mark |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 b}$ | A description including two <br> from <br> let the car roll down the slope <br> from the same point on the <br> slope (1) <br> measure distance it travels <br> (along horizontal surface) <br> (1) | see how far it travels <br> allow time it takes to <br> stop | AO1 <br> change the surface/ use <br> different surfaces (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 5(c)(i) | 0.52 |  | (1) <br> AO3 |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( c ) ( i i )}$ | addition and division (1) |  | (2) |
|  | AO2 <br> evaluation (1) <br> $0.35(\mathrm{~m})$ | accept $0.345(\mathrm{~m})$ <br> award full marks for correct <br> answer without working. | accept <br> acci.38 for 2 marks (five <br> results included in average |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 c ( i i i )}$ | Any one from | accept 'higher <br> slope/high slope | AO1 |
|  | make the slope steeper(1) | push/pull the trolley (1) | accept means of <br> reducing friction <br> e.g. use lubricant |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 5(d) | substitution (1) <br> $(a=) \frac{12-2(.0)}{4(.0)}$ | (2) <br> evaluation (1) <br> $2.5\left(\mathrm{~m} / \mathrm{s}^{2}\right)$ | award full marks for <br> correct answer <br> without working. |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6}$ (a) | B force |  | AO1 |
|  | A is incorrect, mass is a scalar <br> quantity <br> C is incorrect, energy is a scalar <br> quantity <br> D is incorrect, distance is a <br> scalar quantity | (1) |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( b ) ( i )}$ | A plan including four of the <br> following <br> measurement of appropriate <br> distance (1) <br> measurement of appropriate <br> time (1) <br> use of speed = distance (1) | (4) <br> AO3 |  |
| detail (1) <br> e.g. repeat and average, use <br> ruler/stop clock, <br> mark a line near the top and <br> bottom of liquid |  |  |  |

$\left.\begin{array}{|l|l|l|l|}\hline \begin{array}{l}\text { Question } \\ \text { number }\end{array} & \text { Answer } & \text { Additional guidance } & \text { Mark } \\ \hline \mathbf{6 ( b ) ( i i )} & \begin{array}{l}\text { An explanation linking two } \\ \text { from: } \\ \text { add more lines (at equal } \\ \text { distances)(1) }\end{array} & \begin{array}{l}\text { (2) } \\ \text { use longer test tube / } \\ \text { use different heights } \\ \text { of liquid / use } \\ \text { different sections of } \\ \text { the liquid }\end{array} & \text { AO3 }\end{array}\right\}$

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( c )}$ | substitution (1) |  | (2) |
|  | $\left(v^{2}-0=\right) 2 \times 10 \times 1.5$ | accept numbers that <br> evaluation (1) <br> round to 5.5 e.g. |  |
|  | $5.5(\mathrm{~m} / \mathrm{s})$ | 5.477 <br>  | $30(\mathrm{~m} / \mathrm{s})$ gains 1 mark <br> for correct <br> substitution but no <br> square root taken |
|  |  | award full marks for <br> correct answer <br> without working. |  |
|  |  |  |  |

Total marks for question $6=9$

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{7 ( a )}$ | A black | (1) |
|  | B is incorrect as no blue light shines on the object |  |
|  | C is incorrect as no green light shines on the object |  |
|  | D is incorrect as no red light is reflected from the object |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( b ) ( i )}$ | C specular reflection <br> A is incorrect as the reflection is <br> not diffuse | (1) <br> AO1 <br> is incorrect as it is not <br> refraction | is incorrect as it is not <br> refraction |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( b ) ( \text { ii) }}$ | An explanation linking: <br> (the surface/metal ball) is <br> smooth/shiny (1) <br> (for each ray of light) <br> the angle of incidence is equal <br> to the angle of reflection (1) | (2) <br> the reflection is even / <br> there is no scattering |  |
| full marks can be a mirror |  |  |  |
| awarded for labelled |  |  |  |
| diagrams |  |  |  |\(\quad\left\{\begin{array}{l} <br>

\hline\end{array}\right.\)

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ~ c ( i )}$ | similarity <br> (both) change direction <br> /bend/refract (rays of light) <br> (1) | OR <br> (rays of light/they) pass/go <br> (straight) through the (optical) <br> centre / focus(1) <br> difference <br> one converges the other <br> diverges (1) | accept ray through <br> centre described as <br> 'bottom ray' |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 c ( i i )}$ | (the power of) P is less than <br> (the power of) Q | ORA <br> allow Q is greater <br> /bigger | (1) <br> AO2 |

| Question number | I ndicative content | Mark |
| :---: | :---: | :---: |
| 7d* | Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme. <br> The indicative content below is not prescriptive and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant. <br> Refraction <br> - Angle of incidence marked <br> - Angle of refraction marked <br> - Angles are measured from the normal <br> - Angle of refraction is bigger than the angle of incidence <br> - Rays of light travel in straight lines <br> - Refraction occurs at a boundary between two materials of different (optical) density <br> - The angle of incidence is less than the angle of refraction when light passes into a less dense medium (glass into air) <br> - Refraction is a change in direction of a light ray. <br> - Refracted rays bend away from the normal when light passes into a less dense medium (glass into air) <br> - The ray in the more dense medium (glass) travels more slowly ORA <br> Total I nternal Reflection <br> - Possible critical angle marked <br> - Light stays inside the glass <br> - Only occurs when the incident light is in the more dense medium <br> - Only occurs when the incident angle is equal to greater than the critical angle <br> - Critical angle for glass is about $42^{\circ}$ <br> - Angle of incidence is equal to the angle of reflection | (6) AO1 |

| Level | Mark | Descriptor |
| :--- | :--- | :--- |
| Level 1 | 0 | $1-2$ |
| No rewardable material. |  |  |
| Level 2 | $3-4$ | Demonstrates elements of physics understanding, some of <br> which is inaccurate. Understanding of scientific, enquiry, <br> techniques and procedures lacks detail. (AO1) <br> Presents a description which is not logically ordered and <br> with significant gaps. (AO1) |
| Level 3 | $5-6$ | Demonstrates physics understanding, which is mostly <br> relevant but may include some inaccuracies. <br> Understanding of scientific ideas, enquiry, techniques and <br> procedures is not fully detailed and/or developed. (AO1) <br> Presents a description of the procedure that has a <br> structure which is mostly clear, coherent and logical with <br> minor steps missing. (AO1) | | Demonstrates accurate and relevant physics understanding |
| :--- |
| throughout. Understanding of the scientific ideas, enquiry, |
| techniques and procedures is detailed and fully developed. |
| (AO1) |
| Presents a description that has a well-developed structure |
| which is clear, coherent and logical. (AO1) |

| Level | Mark | Additional Guidance | General additional guidance - the <br> decision within levels <br> e.g. - At each level, as well as content, <br> the scientific coherency of what is stated <br> will help place the answer at the top, or <br> the bottom, of that level. |
| :--- | :--- | :--- | :--- |
| Level 1 | 1 1-2 | Additional guidance <br> isolated fact(s) about <br> refraction or total <br> internal reflection(TIR) | Possible candidate responses <br> naming of any rays of light or any angles <br> in text or on diagrams <br> light changes direction/bends <br> TIR ray stays inside the glass / does not <br> go into air <br> refracted ray goes through glass and air |
| Level 2 | 3-4 | Additional guidance <br> simple description of <br> refraction and TIR or facts <br> about one and more <br> detail of the other | Possible candidate responses <br> Angle or ray identified <br> For refraction light changes direction <br> from glass into air <br> or <br> TIR angles are equal inside the glass |
| Level 3 | $5-6$ | $\underline{$ Additional guidance  <br>  detailed description  <br>  refraction and TIR $}$of | Possible candidate responses <br> For refraction light changes direction <br> from glass into air <br> AND <br> TIR angles are equal inside the glass |

Total marks for question $7=13$

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 8(a) | uses data taken from $x$ axis (1) |  | (2) <br> AO3 |
|  | 28(cm)(1) | award full marks <br> for correct answer <br> without working |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $8 \mathrm{~b}(\mathrm{i})$ | ```a description to include count the number of waves(1) (arriving/passing a point) in a specific time(1) use frequency = number of waves time (1)``` | ignore in one second <br> count the number of waves in one second scores 2 marks (MP1 and MP3) <br> find the time between one wave and the next scores 2 marks (MP1 and MP2) | $\begin{aligned} & \text { (3) } \\ & \text { AO1 } \end{aligned}$ |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 8 b (ii) | substitution (1) $1.5=0.7 \times \lambda$ <br> rearrangement and evaluation 2.1(4) m | $\frac{1.5}{0.7}$ <br> allow $\frac{0.7}{1.5}$ <br> for 1 mark <br> award full marks for correct answer without working. <br> $\lambda=\mathrm{v} / \mathrm{f}$ scores 1 mark | $\begin{aligned} & \hline \text { (2) } \\ & \text { AO2 } \end{aligned}$ |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ~ b ( i i i ) ~}$ | A description to include: <br> mention of <br> oscillations/vibrations (1) | up and down OR side <br> to side (movements) <br> OR back and forth | AO1 <br> EITHER <br> transverse - (oscillations) <br> perpendicular to direction of <br> wave (travel) (1) <br> OR <br> longitudinal - (oscillations) in <br> same direction as wave <br> (travel) (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( c )}$ | substitution <br> $(x)=330 \times 4.0$ <br> evaluation <br> $1300(\mathrm{~m})$ | (2) <br> AO2 |  |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{9 ( a )}$ | B ionising and emitted by unstable nuclei | (1) <br> AO1 |
|  | A is incorrect stable nuclei do not give radioactive <br> emissions <br> C is incorrect not all radioactive emissions are neutral <br> D is incorrect not all radioactive emissions are neutral |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{9 ( b )}$ | same number of protons (1) | same atomic number | AO2 |
|  |  |  |  |
|  | different number of neutrons (1) | different mass number |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 9(c)(i) | An explanation to include; | (2) <br> there is no aluminium to absorb $\beta$ <br> particles (1) | aluminium <br> absorbs/stops/blocks <br> beta particles |
|  | (therefore) <br> more $\beta$ particles reach the G-M <br> tube (1) | accept reverse <br> arguments <br> accept radiation for <br> beta particles |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{9}$ c (ii) | (idea of) background radiation | a named source <br> of background <br> radiation | (1) <br> AO3 |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 9c (iii) | becquerel | accept Bq <br> accept close <br> spelling | (1) <br> AO1 |

$\square$

| Question <br> number | I ndicative content | Mark |
| :--- | :--- | :--- |
| $\mathbf{9 d *}$ | Answers will be credited according to candidate's <br> deployment of knowledge and understanding of the <br> material in relation to the qualities and skills outlined in <br> the generic mark scheme. <br> The indicative content below is not prescriptive and <br> candidates are not required to include all the material <br> which is indicated as relevant. Additional content included <br> in the response must be scientific and relevant. | (6) <br> AO1 |
|  | Dangers of exposing people to radioactive <br> sources/ radiation. <br> - it is ionising <br> - may cause cancer <br> - may destroy /kill cells <br> - can mutate DNA <br> - can burn the skin | Protection of hospital staff using radioactive <br> sources/ radiation. <br> - use tongs to carry radioactive sources <br> - use lead containers to store sources <br> - stay at a distance from radioactive sources <br> - use sources for as short a time as possible <br> - wear (lead lined) protective clothing (PPE) <br> - give treatments from behind a shield /wall <br> wear a radiation badge (dosimeter) |

| Level | Mark | Descriptor |
| :--- | :--- | :--- |
| Level 1 | 0 | $1-2$ |
| No rewardable material. |  |  |
| Level 2 | $3-4$ | Demonstrates elements of physics understanding, some of <br> which is inaccurate. Understanding of scientific, enquiry, <br> techniques and procedures lacks detail. (AO1) <br> Presents a description which is not logically ordered and <br> with significant gaps. (AO1) |
| Level 3 | $5-6$ | Demonstrates physics understanding, which is mostly <br> relevant but may include some inaccuracies. <br> Understanding of scientific ideas, enquiry, techniques and <br> procedures is not fully detailed and/or developed. (AO1) <br> Presents a description of the procedure that has a <br> structure which is mostly clear, coherent and logical with <br> minor steps missing. (AO1) |

|  | Presents a description that has a well-developed structure <br> which is clear, coherent and logical. (AO1) |
| :--- | :--- | :--- |

| Level | Mark | Additional Guidance | General additional guidance - the decision within levels <br> e.g. - At each level, as well as content, the scientific coherency of what is stated will help place the answer at the top, or the bottom, of that level. |
| :---: | :---: | :---: | :---: |
|  | 0 | No rewardable material. |  |
| Level 1 | 1-2 | Additional guidance <br> At least one isolated fact about the dangers of radiation and/or protection from radiation | Possible candidate responses <br> it's ionising <br> causes cancer <br> burns you <br> kills cells <br> mutates DNA <br> wear a radiation badge <br> use tongs <br> work from behind a shield use protective clothing |
| Level 2 | 3-4 | Additional guidance <br> simple explanation of the dangers of radiation and a fact about protection or reverse <br> OR <br> detailed explanation of the dangers of radiation or protection from radiation | Possible candidate responses <br> radiation is ionising and can kill cells so wear a radiation badge <br> or <br> use tongs and stay at a distance from radiation source as it can cause cancer or <br> use tongs to stay at a distance from radiation sources and wear a radiation badge |
| Level 3 | 5-6 | Additional guidance <br> detailed explanation of the <br> dangers of radiation and protection from radiation | Possible candidate responses <br> radiation is ionising and can kill cells and use tongs and stay at a distance from the radiation source |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 0}$ (a) | The only correct answer is <br> D the discovery of cosmic microwave background <br> (CMB) radiation | (1) <br> AO1 <br> A is not correct because it does not indicate the <br> Universe had a beginning <br> B is not correct, it is evidence against the geocentric <br> model of the Universe <br> $\mathbf{C}$ is not correct, it is evidence for other solar systems |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0 ( b )}$ | A description to include: |  | (2) <br> AO1 |
|  | wavelength (of the light) (1) <br> appears to increase (1) <br> (increase must be linked with <br> wavelength] | Red shift/Doppler <br> effect <br> (Red shift) shows <br> galaxy moving away | accept answers in <br> terms of frequency |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ (c) | similarity <br> (both have) expanding <br> Universe (1) | (2) <br> AO1 <br> difference one from: <br> Steady State, Universe has no <br> beginning (1) <br> Steady State theory requires <br> the continual formation of new <br> matter, the Big Bang theory <br> does not (1) | different interpretation <br> of CMBR |
| Question <br> number | Answer | Additional <br> guidance | Mark |

| $\mathbf{1 0}$ (d)(i) | $1050 \pm 20(\mathrm{~km} / \mathrm{s})$ | (1) <br> AO3 <br> marked <br> with dii |
| :--- | :--- | :--- | :--- |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ (d)(ii) | attempt at $\Delta y(1)$ <br> $\Delta x$ | could be seen on graph | (3) <br> AO3 |
|  | $70 \pm 5$ | evaluation (1) <br> award 2 marks for <br> correct answer without <br> working | independent mark <br> inds Mpc |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ (d)(iii) | an explanation linking: | (2) <br> points are scattered widely about <br> the line (on graph) (1) <br> giving wide range of possible <br> gradients (1) | there are many possible <br> best fit lines |

[^0]:    *there will be situations where an AO1 question will include elements of recall of knowledge directly from the specification (up to a maximum of $15 \%$ ). These will be identified by an asterisk in the mark scheme.
