# Pearson Edexcel 

Mark Scheme Results

Summer 2022
Pearson Edexcel GCSE In Physics (1PH0) Paper 1H

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Mark schemes have been developed so that the rubrics of each mark scheme reflects the characteristics of the skills within the AO being targeted and the requirements of the command word. So for example the command word 'Explain' requires an identification of a point and then reasoning/justification of the point.
Explain questions can be asked across all AOs. The distinction comes whether the identification is via a judgment made to reach a conclusion, or, making a point through application of knowledge to reason/justify the point made through application of understanding. It is the combination and linkage of the marking points that is needed to gain full marks.
When marking questions with a 'describe' or 'explain' command word, the detailed marking guidance below should be consulted to ensure consistency of marking.

| Assessment <br> Objective |  | Command Word |  |
| :--- | :--- | :--- | :--- |
| Strand | Element | Describe | Explain |
| AO1* | An answer that combines the <br> marking points to provide a <br> logical description | An explanation that links <br> identification of a point with <br> reasoning/justification(s) as <br> required |  |
| AO2 |  | An answer that combines the <br> marking points to provide a <br> logical description, showing <br> application of knowledge and <br> understanding | An explanation that links <br> identification of a point (by <br> applying knowledge) with <br> reasoning/justification <br> (application of understanding) |
| AO3 | 1 a and <br> $1 b$ | An answer that combines points <br> of interpretation/evaluation to <br> provide a logical description |  |
| AO3 | 2a and <br> $2 b$ |  | An explanation that combines <br> identification via a judgment to <br> reach a conclusion via <br> justification/reasoning |
| AO3 | 3a | An answer that combines the <br> marking points to provide a <br> logical description of the <br> plan/method/experiment | An explanation that combines <br> identifying an improvement of <br> the experimental procedure <br> with a linked <br> justification/reasoning |
| AO3 | 3b |  |  |

[^0]| Qustion <br> Number | Answer | Mark |
| :--- | :--- | :--- | :--- |
| 1a | B | (1) |
| Once DTP redraw image, crop and insert here. |  |  |
| A is not correct because the angle of incidence is not equal |  |  |
| to the angle of reflection |  |  |
| C is not correct because glass is more optically dense than |  |  |
| air |  |  |
| D is not correct because glass is more optically dense than |  |  |
| air |  |  |$\quad$.

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 1(b)(i) | $\frac{18.0 \pm 1}{7.0 \pm 1}$ |  | (2) |
|  | OR | AO2 |  |
|  | $3.5 \pm 0.2$ <br> evaluation (1) <br> $2.6 \pm 0.5$ | award full marks for <br> correct answer <br> without working |  |

| Question <br> Number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 1(b)(ii) | a description to including one pair of: |  | (2) <br> use different lens/replace lens (1) |
|  | \{higher power / shorter focal length / <br> fatter / thicker / more curved / greater <br> refractive index / more convex\} lens (1) | accept <br> stronger <br> curvature of <br> lens <br> increased (2) |  |
| OR <br> change the distance / move the lens / <br> move the object (1) <br> further away (from the object/lens) (1) | increase <br> distance <br> between <br> object and <br> lens (2) |  |  |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 1(c) | substitution (1) | accept <br> $\frac{1}{f}=\frac{20}{20 \times 40}$ OR $\frac{1}{f}=\frac{3}{40}$ | AO2 |
|  | evaluation of $\frac{1}{f}(1)$ | (3) <br> evaluation of $f(1)$ <br> $13(c m)$ <br> accept <br> 13.3 (cm) <br> 13.33 (cm) <br> power of ten error on 13 <br> gains 2 marks |  |
|  |  | 0.075 on answer line <br> gains 2 marks |  |
|  |  | power of ten error on <br> 0.075 gains 1 mark <br> 40 <br> 3 |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{2 ( a )}$ | B. when there are energy transfers, the total energy <br> does not change | (1) |
| AO1 |  |  |
| $\boldsymbol{A}$ is not correct because the total energy does not reduce |  |  |
| $\boldsymbol{C}$ is not correct because the total energy does not reduce |  |  |
| $\mathbf{D}$ is not correct because the total energy does not increase |  |  |$\quad$.

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2(b)(i) | a diagram showing: <br> apparatus labelled to include three from <br> - thermometer <br> - water <br> - insulator / sand / sawdust / material <br> - (copper) can <br> thermometer in the water (1) <br> arrangement for water and insulator in and between copper cans (e.g. as in diagram below) (1) | independent of arrangement ignore kettle and stop clock <br> accept reverse positions for water and insulator | (3) AO2 |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2(b)(ii) | any three factors from: | (mass / volume\} of water (1) | (3) <br> accept amount / specified <br> values / "how much" |
|  | \{volume / thickness / mass\} <br> of insulators / materials (1) | accept amount / specified <br> values / "how much" | \{starting / initial\} temperature <br> of water (1) |
| accept temperature of hot / <br> boiling water / specified <br> values | (ime interval / temperature <br> change (1) | accept specified values of <br> interval or change <br> unqualified "same time" is <br> insufficient |  |

|  | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2(c) | a description giving <br> as the density (of expanded polystyrene) increases the (thermal) conductivity decreases <br> non-linear / <br> gradient decreases / <br> at a decreasing rate / <br> levels off / <br> plateaus / <br> becomes (almost) constant | ORA <br> allow inversely proportional / exponential for non-linear in this context <br> ignore negative correlation <br> unqualified quoted values are insufficient | $\begin{aligned} & \hline \text { (2) } \\ & \text { AO2 } \end{aligned}$ |

| 8(b)(ii) | an explanation including any four from: <br> Observations <br> most (alpha particles) pass (straight) through the foil (with little deflection) (1) <br> some (alpha particles) are \{scattered / deflected\} through \{small angles / less than 90 degrees\} (1) <br> (very) few (alpha particles) are \{scattered / deflected\} through \{large angles / greater than 90 degrees\} (1) <br> Conclusions <br> atoms are mainly empty space (1) <br> there must be a nucleus / something inside the atom (1) <br> (nucleus / something) must be \{small / heavy / dense / concentrated / charged / positive\} (1) | ignore electrons <br> ignore refracted allow repelled <br> allow rebound / reflect / back scattering / bounce back <br> ignore electrons | (4) <br> A01,AO3 |

|  | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 8(c)(i) | A description including: <br> roll / release / drop a marble (down <br> the slope) (1) <br> and one from <br> record where the marbles go (1) <br> OR | (2) <br> aO3 <br> marble <br> allow any method of <br> recording |  |

|  | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 8(c)(ii) | any one from <br> marble / weight has no charge (1) <br> the edge of the paper is not far <br> enough away from the weight (1) <br> the marble / weight is too big / small <br> (1) | not to scale | (1) <br> AO3 |
| there is only one marble / weight (1) |  |  |  |
| it is 2 dimensional / not 3D (1) |  |  |  |
| all marbles have the same speed / |  |  |  |
| alpha particles different speed to |  |  |  |
| marbles (1) |  |  |  |
| marbles (only deflect on) hitting / |  |  |  |
| contact with weight (1) |  |  |  |$\quad$| allow marble cannot |
| :--- |
| pass through the |
| weight (1) |$\quad$|  |
| :--- |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :---: |
| 9a | B frequency increases <br> A is not correct because the danger does not increase with frequency | (1) <br> CO1 |
| Cis not correct because all waves in the e-m spectrum |  |  |
| have the same velocity |  |  |
| D is not correct because all waves in the e-m spectrum |  |  |
| have the same velocity |  |  |\(\quad\left\{\begin{array}{l} <br>

\hline\end{array}\right.\)

| Question <br> Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 9b(i) | selection and substitution (1) $\begin{aligned} & 3(.00) \times 10^{8}=2.45\left(\times 10^{9}\right) \times \lambda \\ & \text { rearrangement }(1) \\ & (\lambda=) \frac{3(.00) \times 10^{8}}{2.45\left(\times 10^{9}\right)} \\ & \text { evaluation }(1) \\ & 0.12(\mathrm{~m}) \end{aligned}$ | allow substitution and rearrangement in either order $2.45\left(\times 10^{9}\right)=\frac{3(.00) \times 10^{8}}{\lambda}$ $\lambda=\frac{v}{f}$ <br> accept 0.122 (m) <br> power of ten error gains 2 marks <br> award full marks for the correct answer without working | $\begin{gathered} \text { (3) } \\ \text { AO2 } \end{gathered}$ |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 9b(ii) | selection and substitution (1) $\begin{aligned} & (0 .) 55=\frac{42000}{\text { total energy supplied (to device) }} \\ & \text { rearrangement (1) } \\ & \text { (total energy supplied to device }=\text { ) } \frac{42000}{(0 .) 55} \\ & \text { evaluation (1) } \\ & 76000(J) \end{aligned}$ | allow substitution and rearrangement in either order $(0 .) 55=\frac{42000}{x}$ <br> accept any value that rounds to 76 000(J) <br> 760/764/763(J) gains 2 marks any other power of ten error gains 1 mark <br> award full marks for the correct answer without working | $\begin{gathered} \text { (3) } \\ \text { AO2 } \end{gathered}$ |

| Question number | I ndicative content | Mark |
| :---: | :---: | :---: |
| 9c | Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme. <br> The indicative content below is not prescriptive, and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant. <br> AO1 <br> Comparison <br> X-rays: high frequency / short wavelength / ionising / high energy <br> Radio waves: low frequency / long wavelength / not ionising / low energy <br> $X$ ray are used <br> - in medical diagnosis, to find broken bones, damage to lungs <br> - radiotherapy <br> - treatment of cancer <br> - airport security <br> - revealing counterfeit art <br> X-rays are emitted when electrons change energy levels because <br> - electrons in lower energy levels can absorb energy <br> - the electrons move to higher energy levels <br> - when the electrons return to a lower energy level <br> - the electrons lose energy as radiation. <br> - the electrons need to lose a large amount of energy <br> - (so that) they emit x-ray radiation of high energy/frequency <br> Radio waves are used <br> - broadcasting television <br> - broadcasting radio <br> - communications <br> - satellite transmissions <br> - mobile phones <br> - radar | $\begin{aligned} & \hline \text { (6) } \\ & \text { AO1 } \end{aligned}$ |

|  |  | Radio-waves are emitted when <br> - electrons oscillate in electrical circuits oscillations are <br> - current (flow of electrons) that continually change direction <br> - current flows up and down in a (transmitting) aerial <br> - alternating current (AC) <br> - this generates radio waves in the air around the aerial <br> - the frequency of the radio waves corresponds to the oscillation frequency <br> N.B. No credit is given for: <br> Electrons within an atom go through energy changes <br> OR <br> Radio waves are produced in electrons in circuits These phrases are in the stem of the question |
| :---: | :---: | :---: |

| Level | Mark | Descriptor |
| :--- | :--- | :--- |
| Level 1 | 0 | $1-2$ |
| Level 2 | $3-4$ | No rewardable material. <br> which is inaccurate. Understanding of scientific, enquiry, <br> techniques and procedures lacks detail. (AO1) <br> Presents a description which is not logically ordered and with <br> significant gaps. (AO1) |
| Level 3 | $5-6$ | Demonstrates physics understanding, which is mostly <br> relevant but may include some inaccuracies. Understanding <br> of scientific ideas, enquiry, techniques and procedures is not <br> fully detailed and/or developed. (AO1) <br> Presents a description of the procedure that has a structure <br> which is mostly clear, coherent and logical with minor steps <br> missing. (AO1) | | Demonstrates accurate and relevant physics understanding |
| :--- |
| throughout. Understanding of the scientific ideas, enquiry, |
| techniques and procedures is detailed and fully developed. |
| (AO1) |
| Presents a description that has a well-developed structure |
| which is clear, coherent and logical. (AO1) |

| Level | Mark | Additional Guidance | General additional guidance - the decisions within levels |
| :---: | :---: | :---: | :---: |
|  | 0 | No rewardable material |  |
| Level 1 | 1-2 | Additional guidance <br> Elements of physics present i.e. isolated knowledge of principles, two unconnected statements | Possible candidate response any use of $X$ rays any use of radio waves any comparison electrons are around the nucleus a current is electrons (moving) electrons oscillate |
| Level 2 | 3-4 | Additional guidance <br> Some knowledge of principles with limited detail on use and a comparison or process | Possible candidate response <br> any use of $x$-rays and of radio waves with limited detail <br> and one of: <br> a comparison <br> or <br> electrons lose energy to emit X-rays <br> or <br> electrons oscillate in circuits |
| Level 3 | 5-6 | Additional guidance <br> Detailed knowledge of principles on use with logical connections made about one process | Possible candidate response <br> Use of X-rays and of radio waves with detail <br> and one of: <br> electrons lose energy to change to lower energy level and emit energy as X-rays <br> or <br> electrons oscillate in circuit and currents move up and down in aerials to generate radio waves |

| :---: | :---: | :---: |
| 10c | Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme. <br> The indicative content below is not prescriptive and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant. <br> AO1 3 marks AO3 Strand1 3marks <br> When there is an Earthquake <br> At A <br> - Longitudinal and transverse waves detected <br> - P arrive before $S$. <br> - must be travelling in a solid because $S$ waves only travel through solids <br> - the region just under the Earth's crust (mantle) must be a solid <br> - the diagram show the waves refracting so the mantle must be getting more dense as it gets deeper <br> At B <br> - No S waves or P waves detected <br> - S waves do not pass through liquid so do not get to B <br> - P waves pass through liquid but are refracted at a solid/ liquid boundary so do not arrive at B <br> - The core of the Earth must be liquid to stop both $P$ and $S$ waves arriving at $B$ <br> At C <br> - No S waves arrive at C <br> - P waves arrive at $C$ at different times because the waves have travelled at different speeds. <br> - This suggests the very centre of the Earth would be solid because the P waves that go through the solid would travel faster and arrive before those that just travelled through liquid | $\begin{aligned} & \text { (6) } \\ & \text { AO1 } \\ & \text { AO3 } \end{aligned}$ |

| Level | Mark | Descriptor |
| :---: | :---: | :---: |
|  | 0 | No rewardable material. |
| Level 1 | 1-2 | - Demonstrates elements of physics understanding, some of which is inaccurate. Understanding of scientific ideas lacks detail. (AO1) <br> - Interpretation and evaluation of the information attempted but will be limited with a focus on mainly just one variable. Demonstrates limited synthesis of understanding. (AO3) |
| Level 2 | 3-4 | - Demonstrates physics understanding, which is mostly relevant but may include some inaccuracies. Understanding of scientific ideas is not fully detailed and/or developed. (AO1) <br> - Interpretation and evaluation of the information on both variables, synthesising mostly relevant understanding. (AO3) |
| Level 3 | 5-6 | - Demonstrates accurate and relevant physics understanding throughout. Understanding of the scientific ideas is detailed and fully developed. (AO1) <br> - Interpretation and evaluation of the information, demonstrating throughout the skills of synthesising relevant understanding. (AO3) |

| Level | Mark | Additional Guidance | General additional guidance - the decisions within levels |
| :---: | :---: | :---: | :---: |
|  | 0 | No rewardable material |  |
| Level 1 | 1-2 | Additional guidance <br> Elements of physics present i. e. isolated knowledge of principles, two unconnected statements from any section | Possible candidate responses <br> core is liquid/ mantle (crust) is solid <br> waves refract <br> $P$ waves change direction <br> S and P waves travel through mantle(crust) <br> at $\mathrm{A}, \mathrm{S}$ and P waves detected <br> at $B$, no waves detected <br> at C , only P waves detected <br> $S$ waves are transverse <br> P waves are longitudinal |
| Level 2 | 3-4 | Additional guidance <br> Some knowledge of principles with a logical connection made in ONE section and a statement in ONE other Or <br> From ONE section detailed knowledge of principles with logical connections | Possible candidate response <br> at $\mathrm{A}, \mathrm{S}$ and P waves are detected so must pass through solid <br> at $B$ no waves are detected, the waves change direction/ Region B is the shadow zone <br> at C, P waves are detected because they go straight through the Earth/can travel through the core <br> in Earth's core there are different densities/waves change direction |
| Level 3 | 5-6 | Additional guidance <br> Detailed knowledge of principles with logical connections made in TWO of the sections | Possible candidate response <br> at A, S and P waves are detected so must pass through solid and refract/curve <br> at $B$, no waves are detected because $S$ waves do not pass through liquid core and $P$ waves are refracted away by the liquid. <br> At C, only P waves are detected because they can pass through the liquid core and change direction in the core( refracted) <br> In the Earth's core there is refraction of waves/ inner and outer core have different densities |

Total for Question $10=12$ marks
Total for paper = 100 marks

Pearson Education Limited. Registered company number 872828
with its registered office at 80 Strand, London, WC2R 0RL, United Kingdom

[^0]:    *there will be situations where an AO1 question will include elements of recall of knowledge directly from the specification (up to a maximum of $15 \%$ ). These will be identified by an asterisk in the mark scheme.
