Mark Scheme for June 2019

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

Subject-specific Marking Instructions**INTRODUCTION**

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

USE OF ANNOTATIONS

- If a question part has only one mark (including of course all of section A) then no ticks are needed. Just enter 0 / 1 / # in Assessor
- If the question part has more than one mark, indicate where each mark is gained by the use of ticks in the appropriate place. Do not use crosses.
- If the mark scheme states, for example

FIRST CHECK THE ANSWER ON ANSWER LINE

If answer = $0.5 \text{ (m/s}^2\text{)}$ award 2 marks

Then if the answer is correct, do not put multiple ticks. Just put a single tick next to the [mark total] bracket for that question part.

- For the LOR question (21a), indicate 6, 5, 4, 3, 2, 1, 0 marks by L3, L3[^], L2, L2[^], L1, L1[^] and X. This is the only place where a cross is to be used. Avoid using highlights and suchlike in this question.
