## GCSE MARKING SCHEME

## SUMMER 2019

## PHYSICS UNIT 2 FOUNDATION (SEPARATE AWARD) 3420U20-1

## INTRODUCTION

This marking scheme was used by WJEC for the 2019 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

## GCSE PHYSICS

## UNIT 2: FORCES, SPACE and RADIOACTIVITY

## FOUNDATION TIER

## MARK SCHEME

## GENERAL INSTRUCTIONS

## Recording of marks

Examiners must mark in red ink.
One tick must equate to one mark (apart from the questions where a level of response mark scheme is applied).
Question totals should be written in the box at the end of the question.
Question totals should be entered onto the grid on the front cover and these should be added to give the script total for each candidate.
Marking rules
All work should be seen to have been marked.
Marking schemes will indicate when explicit working is deemed to be a necessary part of a correct answer.
Crossed out responses not replaced should be marked.
Credit will be given for correct and relevant alternative responses which are not recorded in the mark scheme.
Extended response question
A level of response mark scheme is used. Before applying the mark scheme please read through the whole answer from start to finish. Firstly, decide which level descriptor matches best with the candidate's response: remember that you should be considering the overall quality of the response. Then decide which mark to award within the level. Award the higher mark in the level if there is a good match with both the content statements and the communication statement.

The following may be used in marking schemes or in the marking of scripts to indicate reasons for the marks awarded.
cao $=$ correct answer only
ecf = error carried forward
bod $=$ benefit of doubt

| Question |  |  | Marking details | Marks Available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | A01 | AO2 | AO3 | Total | Maths | Prac |
| 2 | (a) | (i) |  | Substitution: $W=F \times d=50000 \times 20$ (1) $W=1000000$ [J] (1) | 1 | 1 |  | 2 | 2 |  |
|  |  | (ii) | [Energy transfer $=1000000$ (ecf) -600000 ] $=400000[\mathrm{~J}]$ <br> N.B. Don't award the ecf mark if negative energy calculated or if subtracted incorrectly |  | 1 |  | 1 | 1 |  |
|  | (b) |  | Any $2 \times 1$ : <br> Make it [more] streamlined / using materials in tyres which don't heat up [as much] or lower profile tyres / stop - start systems / use lighter materials / automatic tyre pressure warnings / eco system / regenerative braking or hybrid or electric cars Don't accept smaller car or smaller engine | 2 |  |  | 2 |  |  |
|  |  |  | Question 2 total | 3 | 2 | 0 | 5 | 3 | 0 |

| Question |  |  | Marking details | Marks Available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | A01 | AO2 | AO3 | Total | Maths | Prac |
| 4 | (a) | (i) |  | [For a body in equilibrium the sum of] the clockwise moments = [the sum of] the anticlockwise moments [about the same point] | 1 |  |  | 1 |  | 1 |
|  |  | (ii) | $\text { Substitution: moment }=2 \times 40 \text { (1) }$ $\text { Moment }=80[\mathrm{Ncm}](1)$ | 1 | 1 |  | 2 | 2 | 2 |
|  |  | (iii) | $\begin{aligned} & \text { Distance }=\frac{80(\text { ecf })}{5}(1) \\ & \text { Distance }=16[\mathrm{~cm}] \end{aligned}$ | 1 | 1 |  | 2 | 2 | 2 |
|  | (b) |  | Moment will double (1) <br> so the distance [from the pivot] needs to double so she is wrong <br> (1) <br> Alternative <br> $4 \times 40=160[\mathrm{~N} \mathrm{~cm}]$ (1) <br> so the distance [from the pivot] needs to double or is 32 cm so she is wrong (1) <br> To award full marks the correct conclusion needs to be present |  |  | 2 | 2 |  | 2 |
|  |  |  | Question 4 total | 3 | 2 | 2 | 7 | 4 | 7 |

| Question |  |  | Marking details | Marks Available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | A01 | AO2 | AO3 | Total | Maths | Prac |
| 5 | (a) |  |  | $\begin{aligned} & 137 \text { (1) } \\ & 55 \text { (1) } \end{aligned}$ |  | 2 |  | 2 |  |  |
|  | (b) | (i) | Neutron don't accept the symbol | 1 |  |  | 1 |  |  |
|  |  | (ii) | Only one neutron causes further fission or the other two can't produce further fission (1) <br> To prevent uncontrolled chain reaction or to prevent overheating or to prevent meltdown / to control the chain reaction (1) or converse argument. Don't accept to stop the chain reaction or to stop an explosion | 2 |  |  | 2 |  |  |
|  | (c) |  | Any $2 \times(1)$ : <br> - It is radioactive for a long time or products have long half-lives <br> - It is ionising <br> - It is penetrating | 2 |  |  | 2 |  |  |
|  | (d) | (i) | It is $0.3 \%$ / it is a very small \% / one of the smallest parts Don't accept it's the smallest |  | 1 |  | 1 |  |  |
|  |  | (ii) | Nuclear decay is a random process (1) <br> Take measurements over a long time [so second group is better] or the second group's results are more accurate or the second group can calculate a mean (1) | 2 |  |  | 2 |  | 2 |
|  |  |  | Question 5 total | 7 | 3 | 0 | 10 | 0 | 2 |

| Question |  |  | Marking details | Marks Available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | A01 | AO2 | AO3 | Total | Maths | Prac |
| 6 | (a) | (i) |  | 10 [cm] |  | 1 |  | 1 |  | 1 |
|  |  | (ii) | 35 cm read from graph (1) or implied $35-10$ (ecf) $=25 \mathrm{~cm}$ (1) <br> Answer of 35 [cm] anywhere award 1 mark Don't accept an answer of 10 [cm] |  | 2 |  | 2 |  | 2 |
|  |  | (iii) | $\begin{aligned} & k=\frac{2.5}{0.25(\mathrm{ecf})} \\ & k=10[\mathrm{~N} / \mathrm{m}](1) \end{aligned}$ <br> (1) conversion + substitution <br> If ecf on 35 answer is $7[\mathrm{~N} / \mathrm{m}]$ award 2 marks Answer of 0.1 or $0.07[\mathrm{~N} / \mathrm{m}]$ award 1 mark |  | 2 |  | 2 | 2 | 2 |
|  | (b) |  | Steeper straight line beginning at same point i.e. $(10,0)(1)$ With twice the gradient through point $(30,4.0)(1)$ |  | 2 |  | 2 | 1 | 2 |
|  |  |  | Question 6 total | 0 | 7 | 0 | 7 | 3 | 7 |

| Question |  |  | Marking details | Marks Available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | AO1 | AO2 | AO3 | Total | Maths | Prac |
| 7 | (a) |  |  | Hydrogen (1) Helium (1) Balanced with (1) | 3 |  |  | 3 |  |  |
|  | (b) |  | Indicative content: <br> Common to both <br> Both stars began from a cloud of gas and dust. As the cloud collapsed a protostar formed which then developed into a main sequence star. <br> Sun <br> The Sun will eventually become a red giant and then a white dwarf. <br> More massive star <br> The more massive star will stay on the main sequence for a shorter time before it becomes a supergiant. It will then explode in a supernova, ejecting heavy elements into space. What remains will either be a neutron star or, if the star was massive enough to begin with, a black hole. <br> 5-6 marks <br> All the main stages in the life cycle are named correctly for both stars. <br> There is a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. The candidate uses appropriate scientific terminology and accurate spelling, punctuation and grammar. <br> 3-4 marks <br> Correctly describes the life cycle of 1 of the stars or attempts both with a few omissions. <br> There is a line of reasoning which is partially coherent, largely relevant, supported by some evidence and with some structure. The candidate uses mainly appropriate scientific terminology and some accurate spelling, punctuation and grammar. | 6 |  |  | 6 |  |  |

| Question |  |  | Marking details | Marks Available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | A01 | AO2 | AO3 | Total | Maths | Prac |
| 8 | (a) |  |  | Air resistance and weight (1) Don't accept gravity or mass are equal and opposite / balanced / resultant force is zero (1) |  | 2 |  | 2 |  | 2 |
|  | (b) | (i) | 0.72 |  |  | 1 | 1 |  | 1 |
|  |  | (ii) | Mean time $=\frac{8.42}{7}(1)$ <br> $=1.2[0 \mathrm{~s}]$ (1) award 1 mark for an answer of 1.14 arising from including anomaly |  | 2 |  | 2 | 2 | 2 |
|  |  | (iii) | Speed $=\frac{1.5}{1.2}($ ecf $)=1.25[\mathrm{~m} / \mathrm{s}]$ accept $1.3[\mathrm{~m} / \mathrm{s}]$ <br> [ $1.32 \mathrm{~m} / \mathrm{s}$ if mean given as 1.14 ] |  | 1 |  | 1 | 1 | 1 |
|  | (c) | (i) | Mass / weight / number [of cake cases] Don't accept amount of cake cases | 1 |  |  | 1 |  | 1 |
|  |  | (ii) | Size (or mass or type) of cake case / drop height Accept same cake case | 1 |  |  | 1 |  | 1 |
|  |  | (iii) | Time over a greater distance (1) to reduce effect of random errors (1) <br> OR Use light gates and data logger / record with [slow motion] camera (1) Don't accept lasers or computers <br> to reduce uncertainties in the measurements / reduce human errors (1) <br> OR Weigh a larger number of cake cases / each cake case (1) to reduce uncertainties in the mass (1) |  |  | 2 | 2 |  | 2 |
