

Question number			Answer	Notes	Marks
1	(a)	Clip diagram	<p>Any five from:</p> <p>Basic plan –</p> <p>MP1. Add (known value) masses one at a time;</p> <p>MP2. Measure length of the spring;</p> <p>MP3. Find extension;</p> <p>Results –</p> <p>MP4. Draw graph with suitable named axes;</p> <p>Accuracy –</p> <p>MP5. Detail of spring measurement, e.g. measure from same part each time/ fiducial marker;</p> <p>MP6. Make sure spring stationary before reading;</p> <p>MP7. repeat readings by taking off masses;</p> <p>MP8. Check value of masses on a balance;</p> <p>MP9. Check ruler vertical or parallel to spring/ hold ruler in clamp / avoid parallax errors;</p>	<p>allow suitable labelled additions to diagram</p> <p>Force or load or mass against extension or length</p>	5
1	(b)		<p>MP1. straight line only;</p> <p>MP2. axes labelled force/weight and extension;</p> <p>MP3. DOP line through origin;</p>	<p>units not needed, any orientation</p> <p>allow for 2 marks max:</p> <p>graph of force and length, st line with intercept</p>	3
	(c)		<p>returns to original length / shape;</p> <p>when (stretching) force is removed;</p>		2

Total 10 marks

Question number	Answer	Notes	Marks
2	(a) (i) gravitational potential energy = mass x gravitational field strength x height;	ALLOW standard symbols (m x g x h) DO NOT ALLOW 'gravity' for g	1
	(ii) substitution into correct equation; calculation; e. g.p.e. = 2000 x 10 x 128 2.56 (MJ)	answer given to at least 3 sf Allow J if correct (2560 000)	1 1
	(b) (i) 2.56 (MJ);	Value from (a) (ii) / 2.6 MJ	1
	(ii) They are <u>equal</u> / k.e. = work done;		1
	(iii) work done = force x distance;	ALLOW standard symbols	1
	(iv) Substitution into correctly rearranged equation; Calculation; e. d = W / F = 2 560 000 / 32 000 80 (m)	Allow ecf for value of energy stated in (a) (ii) or (b) (i)	1 1

Question Number	Answer		Marks
2 (c)	Any TWO from (Windy) – (extra) drag / air resistance / friction; more energy wasted (overcoming friction); (Wet) – less friction / no friction / slippier / less traction / less grip; less energy transferred to car (at launch);	ANSWERS SHOULD REFER TO THE SITUATIONS GIVEN	2
		Total	10

Question number	Answer	Notes	Marks
3 (a) (i)	gravitational potential energy = mass \times g \times height	Allow abbreviations e. g.p.e. = mgh for g/gravitational field strength reject 'gravity'	1
(ii)	Substitution into correct equation; Evaluation; e.g. g.p.e. = $0.19 \times 10 \times 17$ = 32 (J)	32.3 (J) (or 31.6 J when $g = 9.8 \text{ ms}^{-2}$) allow 32300 for 1 mark	2
(iii)	Value same as for (a)(ii)	Allow "the same"	1
(b) (i)	Judge by eye Weight shown acting downwards; Drag shown acting against motion; 	NB NO label = no mark Allow abbreviations for labels e.g W, mg ignore gravity	2
(ii)	k.e. = $\frac{1}{2} \times \text{mass} \times \text{velocity}^2$	Allow abbreviations e.g. k.e. = $\frac{1}{2}mv^2$	1
(iii)	Substitution into correct equation; Evaluation; e.g. k.e. = $\frac{1}{2} \times 0.19 \times 13^2$ = 16 (J)	(16.055) 16055 gets 1 mark	2
(iv)	A an unbalanced force acts on the squirrel		1

Question number	Answer	Notes	Marks	
4	a	a moon orbits a <u>planet</u> ; a planet orbits a star (/the Sun) ;	Ignore <ul style="list-style-type: none"> comments about eccentricity, oval, plane of orbit, time of orbit etc 	1 1
	b	Substitution; Evaluation; Unit (to match the value of v); e.g. $V = \frac{(2 \times \pi \times 385000)}{27} = \frac{2\,417\,800}{27}$	Note value of π used may vary time values and corresponding approximate speeds are 27 days..... 89 600 km/days 648 hours..... 3 731 km/ hours 38 880 mins..... 62 km/min 2 332 800 s..... 1.04 km/s	1 1
		90 000 km/day	allow answers which round to 89 600 Accept suitable matching units	
	c i	$E = \frac{1}{2} mv^2$;	Accept <ul style="list-style-type: none"> rearranged equation equation in words 	1
	ii	substitution ; Mass converted to kg ; 47.(33.....) seen;	allow sub of mass as 50 g 1.496 or 1.5 seen gets 2 marks	3
	d i	44(J) ;		1
	ii	GPE = mgh;	Accept <ul style="list-style-type: none"> rearranged equation equation using (all the) words Allow for 'g' <ul style="list-style-type: none"> gravitational field strength but NOT gravity 	1

iii	Substitution and rearrangement; Calculation ; $\frac{12}{0.05 \times 1.6}$ 150 (m)	POT error loses 1 mark e.g. 0.15 (m) gets 1 mark	2
e	any Two from: <ul style="list-style-type: none"> • Value of g lower(on the Moon)/RA; • lack of air resistance (on the Moon)/RA; • Time of flight greater; 	ignore <ul style="list-style-type: none"> • 'no gravity' allow <ul style="list-style-type: none"> • less gravity • drag for air resistance 	2

(Total for Question 4 = 15 marks)
