

Question number	Answer	Notes	Marks
1 (a)	(metre) ruler;	allow set square, tape measure, digital callipers ignore metre stick	1
(b)	<p>Up to five marks, no more than 3 from each section: -</p> <p><b>Recording data</b> Any three of - MP1. measure original length; MP2. add a (known) weight/force/load/mass; MP3. measure the new length / extension; MP4. Repeat for range of values of load; MP5. Experimental detail;</p> <p><b>Handling data / conclusions</b> Any three of - MP6. Calculate extension; MP7. Plot graph of extension/length against force/weight/load; MP8. Graph should be a straight line; MP9. Extension graph should pass through origin; MP10. Force proportional to extension;</p>	<p>e.g.</p> <ul style="list-style-type: none"> <li>• distance measurements from the same point each time</li> <li>• use of pointer/indicator</li> <li>• reduce parallax</li> <li>• repeats <b>and</b> average (for each load)</li> </ul> <p>Allow length, but not mass calculate k from data k is constant</p> <p>Not for length graph</p> <p>allow load for force</p>	5

Total 6 marks

Question number	Answer	Notes	Marks	
2 (a)	(i)	kinetic energy = $\frac{1}{2} \times \text{mass} \times \text{velocity}^2$	Accept symbols $\text{KE} = \frac{1}{2} \times m \times v^2$	1
	(ii)	Conversion of units; Substitution and rearrangement into correct formula; Calculation; e.g. $18 \text{ MJ} = 18\,000\,000 \text{ J}$ $v^2 = 18\,000\,000 \times 2 \div 250\,000 (= 144)$ $v = 12 \text{ (m/s)}$	at any stage  POT error max 2 marks e.g. $3.8 \times 10^n$ or $1.2 \times 10^n$	3
	(iii)	Energy is transferred to surroundings;	Allow to heat, sound, other forms / energy decreases	1
(b)	(i)	Any two of - MP1. $\text{GPE} = m.g.h$ ;  MP2. passengers have moved to a higher point/upwards; MP3. work is done to move the passengers;  MP4. passengers are further from the centre of the earth;	allow 'lift' for 'passengers' 'gravity force' (still) acts below ground level, reject 'gravity'  moved in opposite direction to force of gravity	2
	(ii)	max of 3 from each list to total of 4 <b>When entering station-</b> MP1. $\text{KE} \rightarrow \text{GPE}$ ; MP2. Less work done by the brakes (to stop the train); MP3. Less (braking) force needed (to stop) ; MP4. train stops more quickly OR brakes are needed for less time (to stop);  <b>When leaving station-</b> MP5. $\text{GPE} \rightarrow \text{KE}$ ; MP6. Less work done by the motor (to accelerate); MP7. Less force needed (to accelerate	Allow  energy for work  an effect on the brakes, e.g. don't get so hot / are quieter / last longer / are less worn  Allow  less power/ current	4

	the train); MP8. train accelerates more quickly OR force needed for a shorter time (to reach a given speed);	needed motor lasts longer / is less worn	
--	---	--	--

Total 11 marks

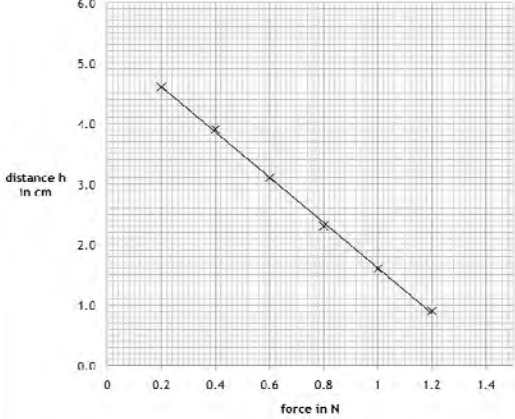

Question number	Answer	Notes	Marks
3 (a)	9100 (N)		1
(b) (i)	$F = m \times a$ ;	accept standard symbols or in words or rearranged	1
(ii)	substitution and rearrangement; evaluation;  e.g. (a =) 400/910 (a =) 0.44	-1 for POT error  allow 0.4, 0.43956044  0.43 gains 1 mark only	2
(c)	any three from:  MP1. speed increases; MP2. so drag {starts to act / increases}; MP3. downward forces increase;  MP4. (hence) acceleration decreases;	ignore references to the initial acceleration  award 1 mark for mention of terminal velocity if no other mark awarded  allow air resistance / friction increases allow unbalanced force decreases	3
(d)	acceleration increases;  with any one from: <ul style="list-style-type: none"> <li>• weight decreases / downward force reduces;</li> <li>• unbalanced force increases;</li> <li>• mass decreases;</li> </ul>		2
total marks = 9			

Question number	Answer	Notes	Marks
4 (a) (i)	6 (m/s);		1
(ii)	10 (s);		1
(b) (i)	Acceleration = <b>change in velocity</b> ; time (taken)	allow accepted symbols	1
(ii)	Substitution in correct equation; Evaluation; Unit; e.g. $12 \div 10$ $= 1.2$ $\text{m/s}^2$	$\text{ms}^{-2}$ condone m/s/s	3
(c) (i)	(average) speed = <u>distance (moved)</u> ; time	allow accepted symbols	1
(ii)	Substitution in correct equation; Evaluation; e.g. $390 \div 60$  6.5 (m/s)	$(388.5 \div 60 = 6.475)$	2
(d)	MP1 Idea that distance is given by <b>area</b> under the graph;  MP2 <b>Comparison</b> of the two <i>areas</i> (by eye or by calculation);	ignore steepness of lines, velocity, acceleration, width  NOTE: a valid comparison that includes MP1 +MP2 gains both marks e.g. the first 30s area is larger than the last 30s	2

Total 11 marks

Question number	Answer	Notes	Marks
5 (a)	Any two of - MP1. mention of no zero error; MP2. Mention that ruler is should be vertical; MP3. use of a fiducial marker; MP4. use of ruler with finer calibrations; MP5. means to reduce parallax; MP6. use of <b>calliper</b> ;	Ignore (more) accurate ruler  e.g. a pin Allow • more detailed ruler • smaller intervals ignore proximity	2
(b) (i)	Distance		1
(ii)	Any two of - MP1. Idea of weight is the force on the mass / $W=mg$ ; MP2. change grams to kilogram; MP3. 1N of force for every 100g; MP4. g is 10 (N/kg);	in any form including numerical  Accept $\div 1000$  Ignore $\div 100$ without further explanation  Allow idea of gravitational field strength Accept $\times 10$	2
