

Question Number	Answer	Acceptable answers	Mark
<b>1(ai)</b>	<b>B</b> momentum (1)		<b>(1)</b>

Question Number	Answer	Acceptable answers	Mark
<b>1(aii)</b>	power (1)		<b>(1)</b>

Question Number	Answer	Acceptable answers	Mark
<b>1 (bi)</b>	Substitution: $\frac{1}{2} \times 0.8 \times 25^2$ (1)  Evaluation 250 (1)  0.25 <u>kJ</u> scores 3 marks  J    bod j (1)	Allow both marks for correct answer with no method shown.  Ignore power of 10 until evaluation e.g. 2 marks for 25 J    1mark for 25 W  Nm ignore kg (m/s) <sup>2</sup> Unit mark is independent of numerical answer.	<b>(3)</b>

Question Number	Answer	Acceptable answers	Mark
<b>1 (bii)</b>	250 (1)  Ignore any unit given by the candidate	Allow ecf from 1(bi)	<b>(1)</b>

Question Number	Answer	Acceptable answers	Mark
<b>1 (biii)</b>	<p>A suggestion to include:</p> <p>work done = force x distance (1)</p> <p>(force) used over a longer distance (1)</p>	<p>ignore references to more power, greater speed, longer time, larger force, momentum and how far javelin travels.</p> <p>the longer they are pushing (it/the javelin) [bod distance]</p> <p>they can push the javelin (forward) for longer [bod distance]</p> <p>the arm can move further</p>	<b>(2)</b>

**(Total for Question 2 =8 marks)**

Question Number	Answer	Acceptable answers	Mark
<b>2 (a)(i)</b>	C - power		<b>(1)</b>

Question Number	Answer	Acceptable answers	Mark
<b>2 (a)(ii)</b>	energy                      work	Must be in correct order	<b>(1)</b>

Question Number	Answer	Acceptable answers	Mark
<b>2 a(iii)</b>	Substitution 50 x 4 (1)		
	Evaluation 200 (kg m/s)                      (1)	Allow full marks for correct answer with no working shown	<b>(2)</b>

Question Number	Answer	Acceptable answers	Mark
<b>2 a(iv)</b>	Substitution 450 / 1.5                                      (1)		
	Evaluation 300 (N)                                      (1)	Allow full marks for correct answer with no working shown Allow (1) for 167 (N) obtained by 450-200 / 1.5	<b>(2)</b>

Question Number	Answer	Acceptable answers	Mark
<b>2 (a)(v)</b>	An explanation to include  (quantity has) a size and a direction	ignore any named examples	<b>(1)</b>

Question Number	Answer	Acceptable answers	Mark
<b>2 (b)</b>	<p>An explanation which uses conservation of momentum to link three from</p> <p>Mother and daughter have different mass (1)</p> <p>Momentum is conserved / is zero to start with (1)</p> <p>Both have same size momentum (after the push) (1)</p> <p>so speed of the daughter is greater than that of the mother (1)</p>	<p>An explanation based on Newton's laws and linking three from</p> <p>Each have a different mass (1)</p> <p>Each experience the same size force / action and reaction are equal (1)</p> <p>Each experiences a different acceleration (1)</p> <p>so speed of the daughter is greater than that of the mother (1)</p>	<b>(3)</b>

**(Total for Question 3 = 10 marks)**

Question Number	Answer	Acceptable answers	Mark
<b>3 (a) (i)</b>	D the same size as the driving force		<b>(1)</b>

Question Number	Answer	Acceptable answers	Mark
<b>3 (a) (ii)</b>	transposition: (1) {change in} speed= acceleration×time  substitution: (1)  speed = 12 x 4  evaluation: (1)  48 (m/s) (1)	transposition and substitution can be in either order substitution mark can be scored when incorrectly transposed word/symbol equation is given          Give full marks for correct answer no working	<b>(3)</b>

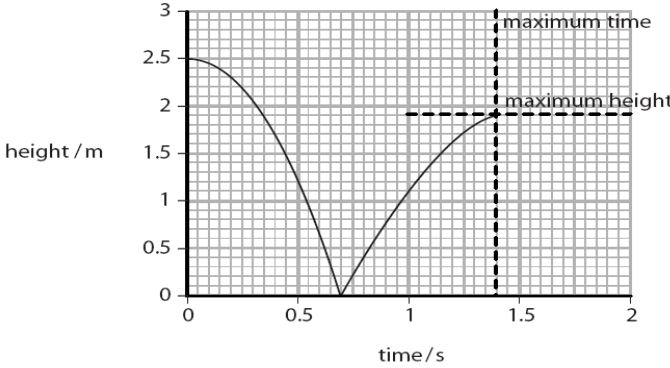

Question Number	Answer	Acceptable answers	Mark
<b>3 (b)</b>	An explanation linking <ul style="list-style-type: none"> <li>• {acceleration of sports is 2x / time to reach 30 m/s is ½} that of family car / RA (1)</li> <li>• mass of sports car LESS than ½ that of family car or RA (1)</li> </ul> (so resultant force required is less)	Attempt to use $f = m \times a$ scores one mark e.g. 4200 <u>OR</u> 3600 scores 1   Correct numerical comparison scores both marks e.g. 4200:3600 numerically or in words scores 2 marks	<b>(2)</b>

Question Number		Indicative Content	Mark
<b>QWC</b>	<b>* )</b>	<p>An explanation including some of the following ideas</p> <ul style="list-style-type: none"> <li>• brakes apply a force to the car</li> <li>• this force from brakes makes the car decelerate/ lose velocity</li> <li>• a force also acts on the driver</li> <li>• driver decelerates at same rate as the car</li> <li>• does not move with respect to car/ stays in the driving seat</li> <li>• moves slightly because belt stretches</li> <li>• small/ no horizontal force acts on the shopping bag</li> <li>• shopping bag continues at similar/ same velocity</li> <li>• until shopping bag falls off seat / hits dashboard</li> <li>• ideas can be expressed in terms of energy, momentum and/or by reference to Newton's laws</li> </ul>	<b>(6)</b>
<b>Level</b>	<b>0</b>	No rewardable content	
<b>1</b>	<b>1 - 2</b>	<ul style="list-style-type: none"> <li>• A limited explanation of the difference in decelerations of at least two of the objects Car (<b>C</b>), Shopping (<b>S</b>) and Passenger (<b>P</b>) mainly describing the effects.</li> </ul> <p>E.g. (at start) <b>C</b> stops (very quickly) while {<b>P / S</b>} carries on moving (for a longer time)</p> <p>OR <b>S</b> {carries on at same speed / hits the dashboard} while <b>P</b> is {held back / slowed down} (by the seatbelt)</p> <ul style="list-style-type: none"> <li>• the answer communicates ideas using simple language and uses limited scientific terminology</li> <li>• spelling, punctuation and grammar are used with limited accuracy</li> </ul>	
<b>2</b>	<b>3 - 4</b>	<ul style="list-style-type: none"> <li>• A simple explanation of the difference in decelerations of at least <b>two</b> of the objects Car, Shopping and Passenger, including a reason for at least one of the decelerations.</li> </ul> <p>E.g.(at start) <b>C</b> stops (very quickly) <b>because of</b> friction at the brakes and at the road while {<b>P / S</b>} carries on moving (for a longer time)</p> <p>OR <b>S</b> {carries on moving (at same speed) / hits the dashboard} while <b>P</b> is {held back / slowed down} <b>because of</b> stretching force from the seatbelt)</p> <ul style="list-style-type: none"> <li>• the answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately</li> <li>• spelling, punctuation and grammar are used with some accuracy</li> </ul>	

3	5 - 6	<ul style="list-style-type: none"> <li>• A detailed explanation of the relative decelerations of <b>C, S and P</b> including mention of the physical principles involved in any two such as that named forces are needed to change given motions. E.g. (The force of) friction is large for <b>C</b> to {slow down / stop} quickly but is low for <b>P</b> and <b>S</b>. <b>{So / thus / therefore etc}</b> <b>P</b> or <b>S</b> carry on at the same speed (initially). <b>P</b> decelerates more slowly than <b>C</b> <b>{because / as a result etc}</b> of the stretching (force) of the seatbelt. OR <i>The idea of</i> {Newton's first law / inertia / need for a force to change motion} and the role of friction and {elastic / tension / stretching} force in producing the <b>three</b> named decelerations. OR Named force needed for a described change in {momentum/kinetic energy} to {stop / slow down} each of the <b>three</b> objects.</li> <li>• the answer communicates ideas clearly and coherently uses a range of scientific terminology accurately</li> <li>• spelling, punctuation and grammar are used with few errors</li> </ul>
