| Question <br> number | Ans | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i )}$ | D | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i i )}$ | $16.0(\mathrm{~m} / \mathrm{s})$ read from graph (1) <br> Substitution (1) <br> (distance travelled =) $16 \times 0.5$ <br> Answer (1) <br> $8.0(\mathrm{~m})(1)$ | award full marks for <br> correct numerical answer <br> without working <br> ecf for substitution and <br> answer using wrong <br> speed value | (3) |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i i i ) ~}$ | A | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i v ) ~}$ | Obtain readings from graph (1) <br> Substitution (1) <br> $\frac{16}{2.0}$ <br>  <br> Answer (1) <br> $8.0\left(\mathrm{~m} / \mathrm{s}^{2}\right)$award full marks for <br> correct numerical answer <br> without working |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 1(b) | Any three improvements from: <br> - suitable instrument to <br> measure distance (1) <br> using a greater distance <br> (to reduce effect of reaction <br> times) (1) <br> suitable instrument to <br> measure time (1) | allow tape measure, <br> trundle wheel | allow stop watch/clock <br> or timing app. on phone <br> \{first/second\} lamp post to <br> signal when to \{start/stop <br> timing (1) |

|  | two of three sets of students <br> taking readings for the same <br> car (1) |  |  |
| :--- | :--- | :--- | :--- |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 1(a) | Rearrangement (1)  <br> $m=\frac{f}{a}$ maximum 2 marks if kN <br> not converted to N <br> Substitution and conversion (1)  <br> $m=\frac{1870}{1.83}$  <br> Answer and rounding to 3 s.f. (1)  <br> $1020(\mathrm{~kg})$  | award full marks for <br> correct numerical <br> answer without working |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( b )}$ | Rearrangement of $\frac{(v-u)}{t}=a \quad(1)$  <br>  Substitution (1) <br> $v=0+1.83 \times 16$ <br> Answer (1) <br> $29.3(\mathrm{~m} / \mathrm{s})$ <br>  award full marks for <br> correct numerical <br> answer without working |  |  |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( c )}$ | Correctly identifies data points from the graph to calculate <br> areas (1) <br> Calculates area under AB (1) <br> 240 m |  |
|  | Calculates area under CD (1) <br> 135 m <br> distance travelled at constant speed $=240 \mathrm{~m}$ is greater than <br> distance travelled when slowing down $=135 \mathrm{~m}(1)$ | (4) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( a ) ( i )}$ | force <br> (1) | If than one word given then 0 <br> marks. | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( a ) ( i i )}$ | B $\quad 0.07 \mathrm{~kg}$ |  | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( a ) ( i i i )}$ | Arrow pointing (vertically) <br> upwards (1) | Value of 1.2 (N) (written near to <br> arrow) <br> (1) | Marks are independent of each <br> other |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 2(b)(i) | Substitution |  | (2) |
|  | 90    <br> 1000 (1)   <br> evaluation    <br> $0.30 \quad$ (N) value which rounds to 0.30 eg    <br> 0.297    <br> Give full marks for correct    <br> answer with no working    <br> Ignore power of ten error until    <br> evaluation    <br> Allow 1 mark for 297 even with    <br> no working shown    |  |  |

| Ques Numb |  | Indicative Content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *2(b)(ii) | An explanation demonstrating some of the following: <br> Descriptions of the graph <br> - Accelerates upwards during stage1 <br> - Maximum velocity is reached at the end of stage 1 <br> - Accelerates downwards / decelerates during stage 2 <br> - Accelerates during stage 3 <br> - Comes to rest during stage 4. <br> Interpretations of the shape of the graph <br> - Fuel is burnt creating thrust in stage <br> - Thrust is upwards in stage 1/ <br> - Gravity/weight (is always) a downward force <br> - Fuel runs out at end of stage 1 / has ran out by stage 2 <br> - Still going up during/ max height at end of stage 2 <br> - Starts to fall at start of stage 3 <br> - Negative velocity during stage 3 because it is falling. <br> - Rapid deceleration / collision with the ground during stage 4/end of stage 3 <br> Explanations for changes in velocity <br> - Resultant force upwards/ thrust greater than gravity force during stage 1 <br> - Acceleration non-linear because mass is decreasing / resultant force is increasing <br> - Linear deceleration in stage 2/3 because force of gravity is constant <br> - Resultant downward force/only gravity/ weight is acting during stage 2 and 3 <br> - Large resultant force of impact during stage 4 | (6) |

| Level | 0 | No rewardable content |
| :---: | :---: | :---: |
| 1 | 1-2 | - A limited explanation involving descriptions of the graph. <br> - E.g. The rocket gets faster as it goes up during stage 1. The rocket slows down during stage 2 <br> - the answer communicates ideas using simple language and uses limited scientific terminology <br> - spelling, punctuation and grammar are used with limited accuracy |
| 2 | 3-4 | - A simple explanation involving interpretations of the shape of the graph e.g. The rocket's velocity increases during stage 1 because the burning fuel provides a force. The rocket accelerates downwards during stage 3 <br> - the answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately <br> - spelling, punctuation and grammar are used with some accuracy |
| 3 | 5-6 | - A detailed explanation which includes descriptions and interpretations for the shape of the graph including an explanation. <br> E.g. The rocket's acceleration during stage 1 is increasing because it is losing mass as the fuel is burnt. It then slows down until it reaches maximum height at the end of stage 2 <br> - the answer communicates ideas clearly and coherently uses a range of scientific terminology accurately <br> - spelling, punctuation and grammar are used with few errors |

Total for Question 5 = 12 marks

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{3 ( a i )}$ | D 150 m <br> $\mathbf{( 1 )}$ |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{3 ( a i i )}$ | $\mathbf{B}$ at 7 s <br> $\mathbf{( 1 )}$ |  | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 3(aiii) | 6 (s) <br> (1) |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 3(aiv) | Substitution: <br> $15 \div 6$ <br> $(1)$ | Allow ecf from 4(aiii) <br> Must be 15 divided by their <br> $4($ aiii) <br> Evaluation <br> $2.5\left(\mathrm{~m} / \mathrm{s}^{2}\right)$ <br> $(1)$ | ECF allowed from first marking <br> point ie evaluation of 15 divided <br> by their answer from 4(aiii) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 3(bi) | $\begin{aligned} & 100-30 \\ & (1) \\ & 70(\mathrm{~N}) \\ & (1) \end{aligned}$ | $100+30$ or 130 gains 1 mark <br> Award 2 marks for correct answer, no working | (2) |
| Question Number | Answer | Acceptable answers | Mark |
|  | $\begin{aligned} & 550(\mathrm{~N}) \\ & (1) \end{aligned}$ | 539 ( N ) allow use of $\mathrm{g}=9.8$ N/kg <br> 539.55 ( N ) for use of $\mathrm{g}=$ <br> $9.81 \mathrm{~N} / \mathrm{kg}$ <br> Award mark for correct answer, no working | (1) |
| Question Number | Answer | Acceptable answers | Mark |
| 3(c) | An explanation linking <br> (combined) mass is less <br> (1) <br> smaller force required for same acceleration <br> OR <br> more acceleration from same <br> force <br> (1) | ignore references to weight, friction or backwards force <br> ignore "easier to accelerate" as in stem <br> less force needed (to accelerate) | (2) |
