| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 1(a) | Any two suitable such as: <br> - Measurements can be taken (1) <br> - Permanent record/evidence <br> (1) <br> - Can be magnified <br> - Can detect waves outside visible part of spectrum <br> - Long exposure (to see faint objects/track objects) | Analysis/compare <br> 'can record data' <br> Taking photo is insufficient <br> zoom in/show more detail <br> can detect gamma rays, Xrays, ultraviolet, infrared <br> Allow collect more light <br> IGNORE better, brighter, clearer | (2) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 1(b) | An explanation linking: <br> - (Idea of) geocentric model believed initially <br> - Observation of moons orbiting J upiter (rather than Earth) <br> - (Idea of) heliocentric model then preferred | I nitially everything \{orbits/goes around\} Earth <br> Accept 'going around' for 'orbiting' <br> Then everything \{orbits/goes around\} Sun <br> Accept stopped believing geocentric <br> Accept then not everything orbits the Earth | (3) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( c )}$ | B 20 cm |  | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( d ) ( i )}$ | Substitution <br> $12 /(14-12)$ <br> Evaluation <br> $6.0 \quad(1)$ | Award full marks for correct <br> with no working | (2) |
| Question <br> Number Answer Acceptable answers Mark <br> $\mathbf{1 ( d ) ( i i ) ~}$ -12 Negative sign essential $\mathbf{( 1 )}$ |  |  |  |$>.$|  |
| :--- |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( d ) ( i i i )}$ | Suggestion to include one of: <br> - Shows whether it is <br> real or virtual (1) | Allow shows whether it is inverted <br> or upright <br> Allow shows which side of lens <br> image is formed | (1) |
|  | - A positive sign for <br> magnification indicates a <br> \{real image/inverted <br> image/opposite side of lens <br> to object $\quad(1)$ | A negative sign for <br> magnification indicates a <br> \{virtual image/upright <br> image/same side of lens as <br> object \} | IGNORE simple reference to <br> magnification |

Total for Question 4 = 10 marks

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{2 ~ ( a )}$ | normal (1) | normal line | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( b ) ( i )}$ | plot the points: <br> $0,0(1)$ | allow within one square <br> tolerance. |  |
| $6,9 \quad(1)$ | Bod if 0,0 not clearly visible but <br> must be able to see a plotted <br> point for 6,9 <br> If they plot more than 2 points, <br> take a mark off for each incorrect <br> one plotted. | (2) |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( b ) ( i i )}$ | straight line through both points <br> joining existing curve (1) | Reject multiple lines and <br> unreasonably wavering lines. <br> allow ecf from wrongly plotted <br> points, including curves if <br> plausible | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ~ ( b ) ( i i i ) ~}$ | $42^{\circ}$ $(1)$ <br> $+/-0.5^{\circ}$  |  |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( c ) ( i )}$ | diagram showing: <br> • reflection (1) | reject (for this marking point) <br> with an additional partial <br> refraction / ray along boundary <br> angle of incidence $=$ angle <br> of reflection (1) | judge by eye <br> allow angles marked as equal |
| Question <br> Number Answer (2) <br> $\mathbf{2 ( c ) ( i i )}$ The idea that it enters along the <br> normal At 90 ${ }^{\circ}$ to the surface / at right <br> angles to the surface / along a <br> radius / perpendicular to the <br> tangent / hits straight on <br> reject 'goes through centre of <br> glass' | (1) |  |  |

(Total for Question 1 = 8 marks)

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a )}$ | B |  | (1) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 3b(i) | A description including three of the following points <br> - reflection (of light) at (either) mirror (1) <br> - (the curved mirror) focuses the light (1) <br> - (mirror) inverts (1) <br> - (lens / eyepiece) magnifies image (1) <br> - image is formed where the light rays cross (1) | Bounces for reflects <br> flips it over/turns over <br> lens/eyepiece refracts light <br> Image is real(1) <br> Accept for 1 mark if no other mark awarded: <br> (Telescope) reflects and refracts light (1) | (3) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 3(b)(ii) | An explanation including two from <br> - collects more light (1) <br> - produces a magnified/bigger image (1) <br> - shows more detail (1) <br> - shows stars the naked eye is unable to see (1) <br> - can observe stars day and night (1) | brighter <br> looks closer/zooms in <br> makes it clearer/better <br> see further/more (stars) | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( c ) ( i )}$ | transverse (wave) | mechanical | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( c ) ( i i )}$ | move up and down a bigger <br> distance |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( c ) ( \text { iii) }}$ | substitution (1) <br> $4 \times 0.5$ | give full marks for correct <br> answer, no working <br> Accept power of ten error for 1 <br> mark eg. $0.2,20,200,2000$ | (2) (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( a ) ( i )}$ | refraction | refracting | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( a ) ( i i )}$ | B |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(a)(iii) | An explanation linking two of the <br> following <br> $\bullet$ e change in direction (1) | bends |  |
| - towards the normal (1) <br> (resulting from ) decrease <br> in speed (1) | Ignore away from normal <br> (because) the left hand <br> part of the wavefront \{hits <br> the boundary first / slows <br> in speed) |  | (2) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 4(b) | $\begin{aligned} & \text { substitution (1) } \\ & 25=120 \times \mathrm{f} \\ & \text { transposition (1) } \\ & \mathrm{f}=25 / 120 \\ & \text { evaluation (1) } \\ & 0.21 \quad(\mathrm{~Hz}) \end{aligned}$ | substitution and transposition can be in any order <br> 0.2 <br> 0.20 <br> 0.208(3...) <br> give (3) marks for correct answer, no working <br> Allow (2) marks for 20.8 stated with no working | (3) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 4(c) | an explanation linking the following <br> - light waves are transverse waves / sound waves are longitudinal (1) <br> - in transverse waves oscillations are at right angle to the direction of travel (1) <br> - in longitudinal waves oscillations are parallel to the direction of travel (1) | Allow up and down (or side to side) movement of lamp as evidence that water waves are transverse <br> up and down. Side to side. $90^{\circ}$ <br> labelled diagram correctly identifying both axes <br> backwards and forwards, push and pull compressions and rarefractions | (3) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 5(a) | An answer that combines the <br> following points of <br> understanding to provide a <br> logical description: <br> - shine the light along a <br> radius (1) <br> by marking it on the <br> paper before putting the <br> block down (1) | allow <br> the straight edge centre of <br> before putting the block <br> down |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 5(b)(i) | all points correctly plotted to <br> +/- half a square (2) | 4 points plotted correctly <br> (i.e. one error)(1) | (2) |
| Question <br> number Answer Mark <br> $\mathbf{5 ( b ) ( i i ) ~}$ smooth curve through at least 3 of the points (1) (1) |  |  |  | 

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( b ) ( \text { iii) }}$ | continues line as far as <br> •告 $(1)$ <br> estimate between $43^{\circ}$ <br> and $47^{\circ}(1)$ | award full marks for correct <br> numerical answer without <br> working |  |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{5 ( c )}$ | An answer that provides a description by making reference <br> to: <br> • (all) light reflected (1) <br> $\bullet$ back inside block (1) |  |
