Pearson Edexcel International Advanced Level

Tuesday 6 May 2025

Afternoon (Time: 1 hour 30 minutes) **Paper reference** **WPS01/01**

Psychology
International Advanced Subsidiary
UNIT 1: Social and Cognitive Psychology

You do not need any other materials.

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*

Information

- The total mark for this paper is 64.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*
- The list of formulae and statistical tables are printed at the start of this paper.
- Candidates may use a calculator.

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

FORMULAE AND STATISTICAL TABLES

Standard deviation (sample estimate)

$$\sqrt{\left(\frac{\sum(x - \bar{x})^2}{n-1}\right)}$$

Spearman's rank correlation coefficient

$$1 - \frac{6\sum d^2}{n(n^2 - 1)}$$

Critical values for Spearman's rank

Level of significance for a one-tailed test					
	0.05	0.025	0.01	0.005	0.0025
Level of significance for a two-tailed test					
N	0.10	0.05	0.025	0.01	0.005
5	0.900	1.000	1.000	1.000	1.000
6	0.829	0.886	0.943	1.000	1.000
7	0.714	0.786	0.893	0.929	0.964
8	0.643	0.738	0.833	0.881	0.905
9	0.600	0.700	0.783	0.833	0.867
10	0.564	0.648	0.745	0.794	0.830
11	0.536	0.618	0.709	0.755	0.800
12	0.503	0.587	0.678	0.727	0.769
13	0.484	0.560	0.648	0.703	0.747
14	0.464	0.538	0.626	0.679	0.723
15	0.446	0.521	0.604	0.654	0.700
16	0.429	0.503	0.582	0.635	0.679
17	0.414	0.485	0.566	0.615	0.662
18	0.401	0.472	0.550	0.600	0.643
19	0.391	0.460	0.535	0.584	0.628
20	0.380	0.447	0.520	0.570	0.612
21	0.370	0.435	0.508	0.556	0.599
22	0.361	0.425	0.496	0.544	0.586
23	0.353	0.415	0.486	0.532	0.573
24	0.344	0.406	0.476	0.521	0.562
25	0.337	0.398	0.466	0.511	0.551
26	0.331	0.390	0.457	0.501	0.541
27	0.324	0.382	0.448	0.491	0.531

17	21.62	24.77	27.59	30.19	33.41	40.79
18	22.76	25.99	28.87	31.53	34.81	42.31
19	23.90	27.20	30.14	32.85	36.19	43.82
20	25.04	28.41	31.41	34.17	37.57	45.32
21	26.17	29.62	32.67	35.48	38.93	46.80
22	27.30	30.81	33.92	36.78	40.29	48.27
23	28.43	32.01	35.17	38.08	41.64	49.73
24	29.55	33.20	36.42	39.36	42.98	51.18
25	30.68	34.38	37.65	40.65	44.31	52.62
26	31.80	35.56	38.89	41.92	45.64	54.05
27	32.91	36.74	40.11	43.20	46.96	55.48
28	34.03	37.92	41.34	44.46	48.28	56.89
29	35.14	39.09	42.56	45.72	49.59	58.30
30	36.25	40.26	43.77	46.98	50.89	59.70
40	47.27	51.81	55.76	59.34	63.69	73.40
50	58.16	63.17	67.51	71.42	76.15	86.66
60	68.97	74.40	79.08	83.30	88.38	99.61
70	79.72	85.53	90.53	95.02	100.43	112.32

The calculated value must be equal to or exceed the critical value in this table for significance to be shown.

Wilcoxon Signed Ranks test process

- Calculate the difference between two scores by taking one from the other
- Rank the differences giving the smallest difference Rank 1

Note: do not rank any differences of 0 and when adding the number of scores, do not count those with a difference of 0, and ignore the signs when calculating the difference

- Add up the ranks for positive differences
- Add up the ranks for negative differences
- T is the figure that is the smallest when the ranks are totalled (may be positive or negative)
- N is the number of scores left, ignore those with 0 difference

Critical values for the Wilcoxon Signed Ranks test

<i>n</i>	Level of significance for a one-tailed test		
	0.05	0.025	0.01
	Level of significance for a two-tailed test		
	0.1	0.05	0.02
N=5	0	–	–
6	2	0	–
7	3	2	0
8	5	3	1
9	8	5	3
10	11	8	5
11	13	10	7
12	17	13	9

The calculated value must be equal to or less than the critical value in this table for significance to be shown.

QUESTION 1 BEGINS ON THE NEXT PAGE.

SECTION A

Social Psychology

Answer ALL questions. Write your answers in the spaces provided.

1 In social psychology, you will have learned about Milgram's (1963) variation studies.

(a) Describe how Milgram gathered his sample in the rundown office block variation study (Experiment 10).

(2)

.....

.....

.....

.....

.....

.....

(b) Explain **one** strength of Milgram's rundown office block variation study (Experiment 10).

(2)

DO NOT WRITE IN THIS AREA

(b) Explain **two** reasons why personality may not affect obedience.

(4)

1

2

(Total for Question 2 = 6 marks)

- 3 Christophe carried out a study about obedience on 45 students in his school. To collect his data, he used a questionnaire with closed questions. Christophe's results are shown in **Table 1**.

Questions asked	Number of students who answered 'yes'
Do you give in homework before the deadline?	7
Do you give in homework on the deadline?	28
Do you need to be asked for your homework after the deadline has passed?	10

Table 1

- (a) Calculate the ratio of students who need to be asked for their homework after the deadline has passed to the total number of students.

You **must** express the ratio in its lowest form.

(1)

Space for calculations

Ratio

- (b) Calculate the percentage of students who gave their homework in before or on the deadline out of the total number of students.

You **must** give your answer to **one** decimal place.

(1)

Space for calculations

Percentage

(Total for Question 3 = 2 marks)

- 4** Rachel is a student who is very concerned about the effects of car pollution on the environment. Where possible, she walks or rides a bicycle instead of using cars. Rachel and her friend, Lottie, have started an environmental group and are trying to promote an environmentally-friendly way of life. At college, Rachel has organised several events and recently has arranged a talk by a popular speaker.

Describe, using minority influence (Moscovici, 1976), why Rachel and Lottie's actions are influencing behaviour.
