

(b) From Hancock et al.'s (2011) study into the language of psychopaths: Outline one weakness of the sample used in this study.

[2]

3 In Freud's (1909) study of Little Hans the data was obtained through information contained in letters written by Hans' father. Which type of data is this?

- A binary
- B nominal
- C primary
- D secondary

Your answer

[1]

4 The table below shows data collected in Baron-Cohen et al.'s (1997) study into autism in adults.

	Results of the Eyes Task (out of 25)	
	Mean score	Range of scores
Autism/Asperger Syndrome (AS)	16.3	13-23
Normal	20.3	16-25
Tourette Syndrome (TS)	20.4	16-25

- i. Outline **one** difference in performance on the Eyes Task between the participants with autism/Asperger Syndrome (AS) and participants with Tourette Syndrome (TS).

[2]

- ii. Outline **one** conclusion that can be drawn from the above findings.

[2]

6 Baron-Cohen et al. conducted a (1997) study into autism in adults.

Outline how the procedure used in the Eyes task helped to ensure the reliability of the findings.

[3]

7 Explain how Freud's (1909) study of Little Hans can support the nature side of the nature/nurture debate.

[3]

14 In the study by Baron-Cohen *et al.*, what sampling technique was used to obtain the high functioning adults with autism (HFA)?

- A opportunity
- B self-selected
- C snowball
- D random

Your answer

[1]

15(a) Describe the background to Gould's study into intelligence testing.

[4]

17(a) From Freud's study of Little Hans:

What is meant by the term Oedipus complex?

[2]

(b) Outline **one** piece of evidence that suggests Little Hans was experiencing the Oedipus complex.

[2]

18(a)

From Freud's study of Little Hans:

Suggest **one** strength of studying just one individual.

[2]

(b) How does Baron-Cohen et al.'s study into autism in adults link to the key theme of understanding disorders?

[2]

19(a)

Describe how Freud's study of Little Hans links to the individual differences area of psychology.

[3]

20(a) From Freud's study of Little Hans:

Explain **one** strength of the way data was gathered in this study.

[2]

(b) From the study by Baron-Cohen et al. on autism in adults:

Describe **one** way the Eyes Task was checked to ensure it was a valid theory of mind test.

[2]

21(a)

From Baron-Cohen et al.'s study on autism in adults:

- i. Explain why this study is considered a quasi-experiment.

[2]

- ii. Outline the findings in relation to the Strange Stories task.

[2]

(b) From Freud's study of Little Hans:

Explain why the study can be considered a longitudinal study.

[2]

22(a)

Describe how Gould's study 'A nation of morons' links to the key theme 'Measuring differences'.

[4]
