Paper 1 Multiple Choice (Core)

May/June 2019

45 minutes

Additional Materials: Multiple Choice Answer Sheet

Soft clean eraser

Soft pencil (type B or HB is recommended)

#### **READ THESE INSTRUCTIONS FIRST**

Write in soft pencil.

Do not use staples, paper clips, glue or correction fluid.

Write your name, centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you.

DO NOT WRITE IN ANY BARCODES.

There are **forty** questions on this paper. Answer **all** questions. For each question there are four possible answers **A**, **B**, **C** and **D**.

Choose the one you consider correct and record your choice in soft pencil on the separate Answer Sheet.

#### Read the instructions on the Answer Sheet very carefully.

Each correct answer will score one mark. A mark will not be deducted for a wrong answer.

Any rough working should be done in this booklet.

A copy of the Periodic Table is printed on page 20.

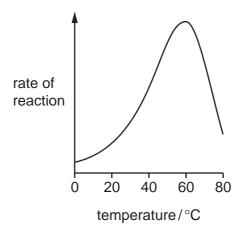

Electronic calculators may be used.

- 1 What is correct for all living organisms?
  - **A** They are sensitive to changes in their environment.
  - **B** They excrete solid waste from their bodies.
  - **C** They feed on other living organisms.
  - **D** They grow larger by increasing their cell number.
- 2 Which row correctly describes the diffusion of molecules from P to Q?

	Р	Q	movement
Α	higher concentration	lower concentration	down a concentration gradient
В	higher concentration	lower concentration	up a concentration gradient
С	lower concentration	higher concentration	down a concentration gradient
D	lower concentration	higher concentration	up a concentration gradient

- 3 Which chemical element is found in proteins, but **not** in carbohydrates or fats?
  - A carbon
  - **B** hydrogen
  - C oxygen
  - **D** nitrogen
- **4** The graph shows the activity of an enzyme at different temperatures.

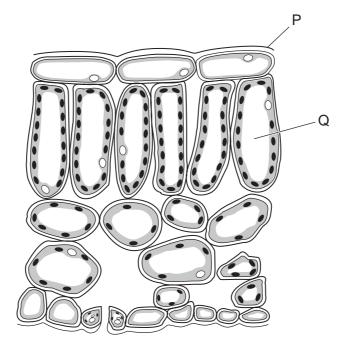

What is the optimum temperature for this enzyme?

- **A** 20 °C
- **B** 40 °C
- **C** 60 °C
- **D** 80 °C

© UCLES 2019

5 The diagram shows a cross-section through a plant leaf.

### Which row identifies P and Q?

	Р	Q
Α	cuticle	palisade mesophyll
В	cuticle	spongy mesophyll
С	epidermis	palisade mesophyll
D	epidermis	spongy mesophyll

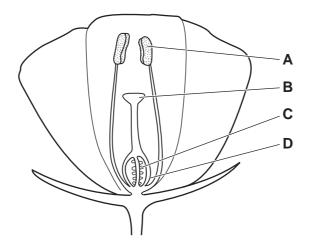

- **6** Where does most absorption of digested food take place?
  - A the large intestine
  - **B** the liver
  - C the small intestine
  - **D** the stomach
- 7 Which component is needed for blood to clot?
  - **A** hormones
  - **B** platelets
  - C red blood cells
  - **D** white blood cells

8 Which substances are used and produced in aerobic respiration?

	carbon dioxide	oxygen	glucose	water		
Α	produced	used	produced	used		
В	produced	used	used	produced		
С	used	produced	produced	used		
D	used	produced	used	produced		

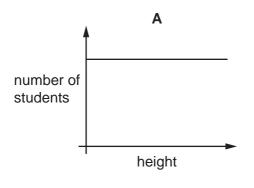

- 9 In a reflex arc, which structure carries nerve impulses towards the central nervous system?
  - A effector
  - **B** motor neurone
  - C sensory neurone
  - D spinal cord
- **10** The diagram shows a section through an insect-pollinated flower.

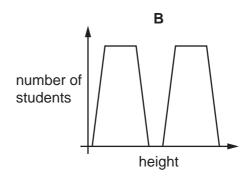

When pollination occurs, where must the pollen grains reach?

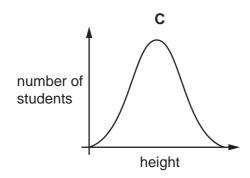

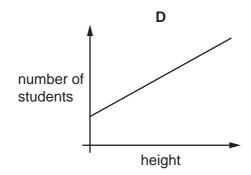

**11** A teacher measures the heights of each student in a class. All the students were born in the same year. She presents the results as a graph.

Which graph is most likely to be correct?

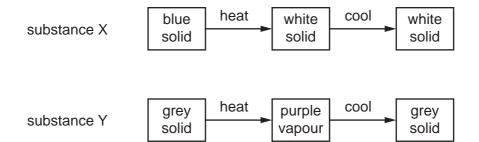

- 12 In a food chain, what do all living organisms get from their food?
  - A a supply of water
  - B oxygen for respiration
  - C protection from disease
  - **D** the energy they need
- 13 In the carbon cycle, which process decreases the level of carbon dioxide in the atmosphere?
  - A combustion
  - **B** decomposition
  - **C** photosynthesis
  - **D** respiration

**14** Two substances, X and Y, are heated and then cooled. The observations are shown.

Which type of change occurs when X and Y are heated?

	Х	Y
Α	chemical	chemical
В	chemical	physical
С	physical	chemical
D	physical	physical

**15** A hydrocarbon contains twice as many hydrogen atoms as carbon atoms.

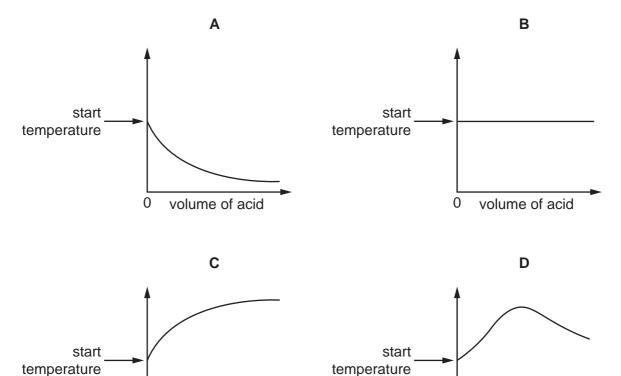

What is the formula of this compound?

- A  $C_3H_6$
- **B**  $C_4H_{10}$
- $\mathbf{C}$   $C_2H_6O$
- $D C_3H_6O$
- **16** What is the electrolyte that is used when a nickel spoon is electroplated with copper?
  - A copper
  - B copper sulfate solution
  - C nickel sulfate solution
  - **D** nickel

17 An acid is added to an alkali until the final solution is **just** neutral.

The reaction is exothermic.

Which graph shows how the temperature changes as the acid is being added to the alkali?

volume of acid

**18** Iron increases the rate of a reaction.

What is the role of iron in this reaction?

volume of acid

- **A** catalyst
- **B** electrolyte
- **C** element
- **D** isotope

# 19 Which row identifies the types of oxides?

	acidic oxides	basic oxides
Α	CaO, Na₂O	CO <sub>2</sub> , SO <sub>2</sub>
В	CaO, SO <sub>2</sub>	CO <sub>2</sub> , Na <sub>2</sub> O
С	CO <sub>2</sub> , Na <sub>2</sub> O	CaO, SO <sub>2</sub>
D	CO <sub>2</sub> , SO <sub>2</sub>	CaO, Na₂O

Which method is used to make the solution crystallise?

- A chromatography
- **B** evaporation
- **C** filtration
- D fractional distillation
- 21 Which statement about the trends in the Periodic Table is correct?
  - **A** Elements are arranged in order of nucleon number.
  - **B** Elements on the left hand side form acidic oxides.
  - **C** The melting point of the Group I elements increases down the group.
  - **D** The proton number increases from left to right across the table.
- 22 Some properties of aluminium are listed.
  - 1 conducts electricity
  - 2 malleable
  - 3 resistant to corrosion

Which properties make aluminium suitable for use as food containers?

- **A** 1, 2 and 3 **B** 1 and 2 only **C** 1 and 3 only **D** 2 and 3 only
- 23 Which row describes the colour changes when water is added to anhydrous copper(II) sulfate and to cobalt(II) chloride?

	copper(II) sulfate	cobalt(II) chloride
Α	blue $\rightarrow$ white	blue $\rightarrow$ pink
В	blue $\rightarrow$ white	pink $\rightarrow$ blue
С	white $\rightarrow$ blue	blue $\rightarrow$ pink
D	white $\rightarrow$ blue	$pink \rightarrow blue$

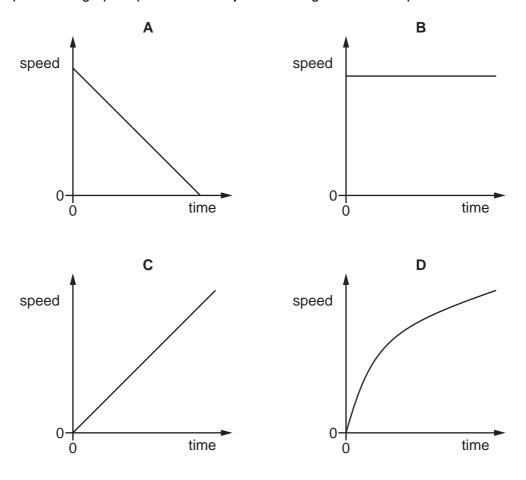

- 24 Which processes lead to the formation of a greenhouse gas?
  - 1 reaction of sodium with water
  - 2 respiration
  - 3 combustion of fossil fuels
  - **A** 1 and 2 only **B** 1 and 3 only **C** 2 and 3 only **D** 1, 2 and 3

		1	It neutralise	es acidic indust	rial w	aste.							
		2	It lowers th	e pH of soil.									
		3	It undergoe	es thermal deco	mpos	sition to cal	cium hydr	oxide.					
		·											
	Α	1 and 2	В	1 and 4	С	2 and 3	D	3 and 4					
26	Wh	at is the r	main constit	uent of natural	gas?								
	Α	ethane											
	В	ethane  ethene											
	<ul><li>A ethane</li><li>B ethene</li><li>C methane</li></ul>												
	D	nitrogen	ı										
27	Wh	ich stater	ments about	poly(ethene) n	nolec	ules are co	rrect?						
		1	They are lo	ng chains form	ed fro	om many m	onomer u	ınits.					
		2	They are m	nade by addition	n poly	merisation.	•						
		3	They conta	in many double	e bon	ds.							

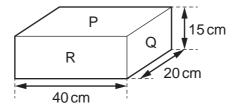

**A** 1 and 2 only **B** 1 and 3 only **C** 2 and 3 only **D** 1, 2 and 3

25 Which two statements about calcium carbonate are correct?

28 Which speed-time graph represents an object travelling at constant speed?

29 The diagram shows a rectangular block with three faces labelled P, Q and R. The dimensions of the block are also shown.

Each face of the block is placed in turn on a flat, horizontal surface.

Which statement is correct?

- A The smallest pressure is produced with the block resting on face P.
- **B** The smallest pressure is produced with the block resting on face Q.
- **C** The smallest pressure is produced with the block resting on face R.
- **D** The pressure is the same whether the block is resting on face P, face Q or face R.

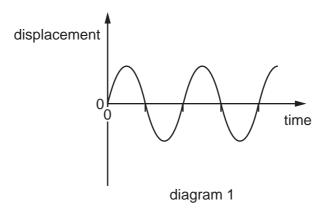

**30** When evaporation occurs, molecules escape from the surface of a liquid.

Which molecules escape, and what happens to the average speed of the molecules remaining in the liquid?

	escaping molecules	average speed of remaining molecules
Α	less energetic	decreases
В	less energetic	increases
С	more energetic	decreases
D	more energetic	increases

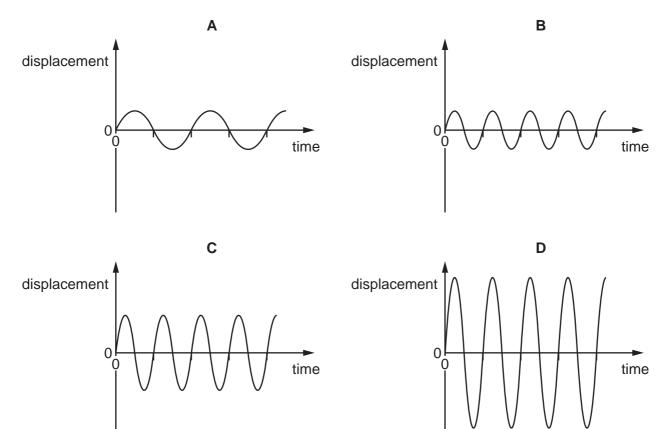

- 31 Which region of the electromagnetic spectrum is often involved in heat transfer by radiation?
  - A infra-red
  - **B** radio
  - **C** ultraviolet
  - **D** X-ray

### 32 Diagram 1 represents a wave.

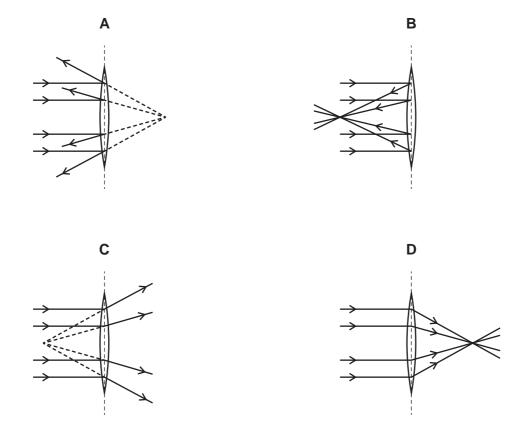

Which diagram represents a wave with twice the frequency and half the amplitude of the wave in diagram 1?

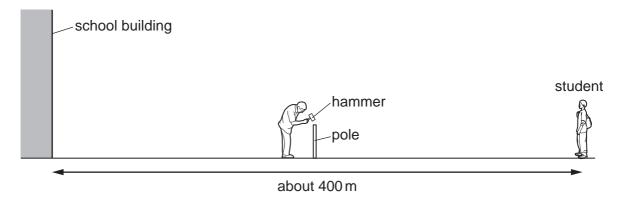

The scales are the same in all the diagrams.

33 Which diagram shows the effect of a converging lens on parallel rays of light?

**34** A sports field is next to a large school building. A student at the far side of the sports field sees a groundsman hit a pole with a hammer.

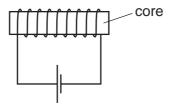

After the hammer hits the pole, the student hears two bangs.

Why does the student hear two bangs?

	first bang caused by	second bang caused by					
Α	sound of hammer hitting pole	sound of pole hitting hammer					
В	sound reaching the student's left ear	sound reaching the student's right ear					
С	sound reaching student directly	sound reflected back from school building					
D	sound reflected back from school building	sound reaching student directly					

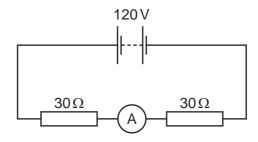

35 The diagram shows an electromagnet.

Which metal is used for the core of the electromagnet and why?

	metal	reason						
Α	iron	it becomes a permanent magnet						
В	iron	it is easily magnetised						
С	steel	it becomes a permanent magnet						
D	steel	it is easily magnetised						

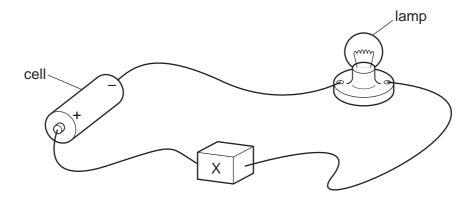

**36** The diagram shows two  $30\,\Omega$  resistors and an ammeter connected to a 120 V battery.

What is the reading on the ammeter?

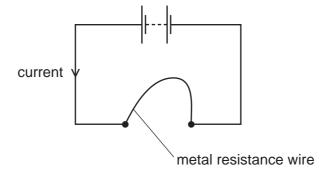

- **A** 0.25 A
- **B** 0.50 A
- **C** 2.0 A
- **D** 4.0 A

**37** In the circuit, component X is used to control the brightness of the lamp.

What is component X?

- A an ammeter
- B a fixed resistor
- C a fuse
- D a variable resistor
- **38** A student connects a length of metal resistance wire to a battery.

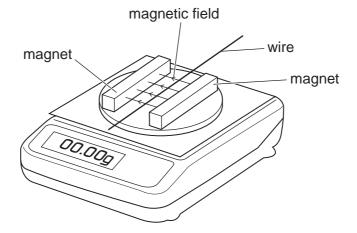

The student wishes to increase the current in the resistance wire.

Which change does this?

- A connecting a second wire in series with the first wire
- B heating the wire
- **C** making the wire shorter
- **D** making the wire thinner

**39** The diagram shows two magnets on an electronic balance. The magnets produce a magnetic field in the direction shown. A wire lies in the magnetic field.

The reading on the balance is zero.

A current is produced in the wire and the balance now shows a positive reading.

Which change produces a negative reading on the balance?

- A decreasing the current
- **B** increasing the current
- C reversing the current direction
- **D** switching off the current
- **40** There are three different isotopes of hydrogen.

$${}^{1}_{1}H$$
  ${}^{2}_{1}H$   ${}^{3}_{1}H$ 

Which statement about the nuclei of these three isotopes is correct?

- A They have different numbers of electrons.
- **B** They have the same number of nucleons.
- **C** They have the same number of neutrons.
- **D** They have the same number of protons.
