Paper 1 Multiple Choice (Core)

May/June 2022

45 minutes

You must answer on the multiple choice answer sheet.

You will need: Multiple choice answer sheet

Soft clean eraser

Soft pencil (type B or HB is recommended)

INSTRUCTIONS

- There are forty questions on this paper. Answer all questions.
- For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do not use correction fluid.
- Do not write on any bar codes.
- You may use a calculator.

INFORMATION

- The total mark for this paper is 40.
- Each correct answer will score one mark.
- Any rough working should be done on this question paper.
- The Periodic Table is printed in the question paper.

- 1 Which statement about the characteristics of living organisms is correct?
 - A Excretion is the chemical reactions in cells that release energy.
 - **B** Nutrition is the taking in of materials for energy, growth and development.
 - **C** Respiration is the process that makes more of the same kind.
 - **D** Sensitivity is the removal of toxic materials and excess substances.
- 2 Which statement about cells is correct?
 - **A** Cell membranes are found only in animal cells.
 - **B** Cell membranes are found only in plant cells.
 - **C** Cell walls are found only in animal cells.
 - **D** Cell walls are found only in plant cells.
- **3** Which reagent is used to test for the presence of protein in a food sample?
 - A Benedict's solution
 - **B** biuret
 - **C** ethanol
 - **D** iodine

4 Catalase is an enzyme that breaks down hydrogen peroxide to form a foam of water and oxygen. The maximum height of the foam produced at different temperatures in a given length of time is measured.

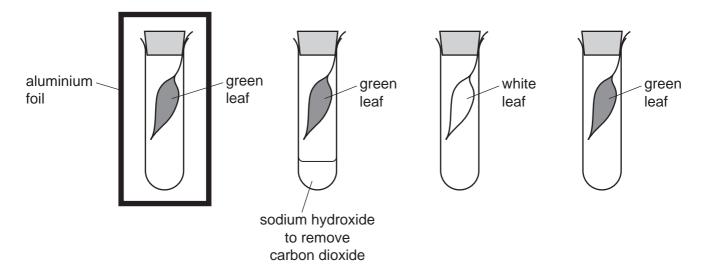

The rate of the reaction is proportional to the height of foam.

The table shows the results.

temperature/°C	height of foam/mm
10	1.2
20	3.1
30	4.2
40	5.4
50	3.6
60	0.0

Which conclusion can be drawn from these results?

- **A** Increasing the temperature decreases the rate of the reaction up to 50 °C.
- **B** Increasing the temperature decreases the rate of the reaction up to 60 °C.
- **C** Increasing the temperature increases the rate of the reaction up to 40 °C.
- **D** Increasing the temperature increases the rate of the reaction up to 50 °C.
- **5** The diagram shows an investigation into factors affecting photosynthesis.

The tubes are left for 24 hours after which the leaves are tested with iodine solution.

How many of these leaves turn blue-black when tested with iodine solution?

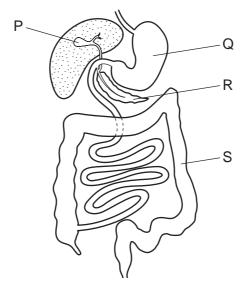

A 1

B 2

C 3

D 4

6 The diagram shows part of the digestive system.

Which labelled parts produce digestive enzymes, absorb water and store bile?

	produce digestive enzymes	absorb water	store bile
Α	Р	Ø	R
В	Q	R	Р
С	R	S	Р
D	S	Р	R

- 7 Which changes increase the rate of transpiration?
 - 1 increasing temperature
 - 2 increasing humidity
 - 3 decreasing temperature
 - 4 decreasing humidity
 - **A** 1 and 2 **B** 1 and 4 **C** 2 and 3 **D** 3 and 4
- **8** When a person exercises for 10 minutes, what is the effect on the depth and rate of their breathing?

	depth of breathing	rate of breathing
Α	decreases	decreases
В	decreases	increases
С	increases	decreases
D	increases	increases

- **9** What is a hormone?
 - A a chemical substance, produced by a gland, which alters the activity of target organs
 - **B** a protein that acts as a biological catalyst
 - **C** a thread-like structure of DNA, carrying genetic information in the form of genes
 - D an electrical signal that travels along a nerve cell to an effector
- **10** Which statement about asexual reproduction is correct?
 - **A** It involves the fusion of gametes from one parent.
 - **B** It involves the fusion of gametes from two parents.
 - **C** It produces offspring which are genetically different.
 - **D** It produces offspring which are genetically identical.
- 11 Selection in chickens has produced individuals that lay more eggs per week.

What is required for this to occur?

	reproduction	selection
Α	asexual	human
В	asexual	natural
С	sexual	human
D	sexual	natural

12 The diagram shows a food chain.

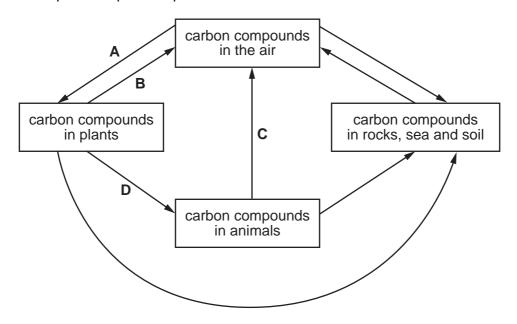

dandelion plant
$$\rightarrow$$
 slug \rightarrow blackbird \rightarrow fox

Which organisms are consumers?

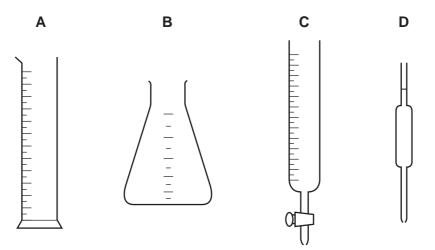

- A dandelion plant only
- **B** fox only
- C blackbird and slug only
- D slug, blackbird and fox

13 The diagram shows part of the carbon cycle.

Which arrow represents plant respiration?

14 Which piece of apparatus is used to measure the change in the volume of a liquid most accurately?

- 15 Some physical and chemical changes are listed.
 - 1 burning methane
 - 2 dissolving sugar in water
 - 3 evaporating ethanol
 - 4 rusting iron

1 and 2

Which changes are chemical changes?

- В
 - 1 and 4 2 and 3
- **D** 3 and 4

16 Which equation is balanced?

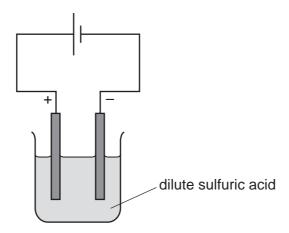

$$\mathbf{A} \quad 2H_2 + O_2 \rightarrow 2H_2O_2$$

$$\textbf{B} \quad \text{MgO} \, + \, 2\text{H}_2\text{SO}_4 \, \rightarrow \, \text{MgSO}_4 \, + \, 2\text{H}_2\text{O}$$

C Na +
$$H_2O \rightarrow NaOH + H_2$$

D Na₂CO₃ + 2HC
$$l \rightarrow$$
 2NaC $l +$ H₂O + CO₂

17 The diagram shows the electrolysis of dilute sulfuric acid using inert electrodes.

Which row shows the products formed at each electrode and describes the bonding in sulfuric acid?

	anode	cathode	type of bonding
Α	oxygen	hydrogen	ionic
В	oxygen	hydrogen	covalent
С	hydrogen	oxygen	ionic
D	hydrogen	oxygen	covalent

18 Which word describes reactions that give out heat energy?

- A endothermic
- **B** exothermic
- **C** oxidation
- **D** reduction

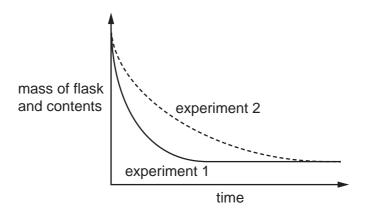

19 When solid pieces of calcium carbonate are added to dilute hydrochloric acid in a flask, carbon dioxide gas is given off.

The mass of the flask and its contents are measured over time.

Two different experiments are carried out. In both experiments the acid is in excess.

The results of these two experiments are shown.

Which statement explains the different shapes of the curves?

- A Experiment 2 uses a catalyst.
- **B** Experiment 2 uses acid at a higher temperature.
- **C** Experiment 2 uses acid that is more dilute.
- **D** Experiment 2 uses powdered calcium carbonate.
- 20 When aqueous potassium hydroxide is warmed with ammonium chloride, a gas is given off.

Which test result identifies the gas?

- A It bleaches pH paper.
- **B** It turns anhydrous cobalt(II) chloride blue.
- C It turns universal indicator red.
- **D** It turns red litmus blue.

21 A gas is used in welding metals together at high temperatures.

The gas is used to provide an inert atmosphere.

What is the gas?

- **A** argon
- B carbon dioxide
- **C** fluorine
- **D** oxygen
- 22 Which row does **not** link a general physical property to the type of element?

	type of element	general physical property
Α	metal	malleable
В	metal	thermal conductor
С	non-metal	electrical conductor
D	non-metal	low melting point

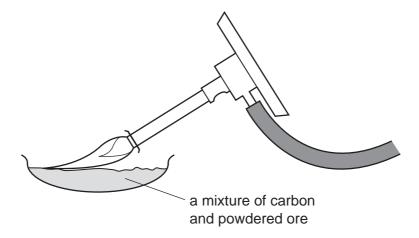

23 Which row describes a transition element?

	melting point/°C	electrical conductor
Α	115	no
В	181	yes
С	1538	yes
D	4726	no

PMT

. .

24 The diagram shows a metal being extracted from its powdered ore using carbon.

What happens to the ore in this reaction?

- A It burns.
- B It decomposes.
- C It is oxidised.
- **D** It is reduced.

25 Which colour change is observed when water is tested using copper(II) sulfate?

- **A** blue \rightarrow pink
- **B** blue \rightarrow white
- \mathbf{C} white \rightarrow blue
- **D** white \rightarrow pink

26 Why do farmers add limestone to soil?

- A It acts as a fertiliser.
- **B** It adds nitrogen to the soil.
- C It decreases the pH of the soil.
- **D** It increases the pH of the soil.

27 What are the products of the complete combustion of ethanol?

- A carbon dioxide and hydrogen
- B carbon dioxide and water
- C carbon monoxide and hydrogen
- **D** carbon monoxide and water

28 What does the area under a speed–time graph repres

- **A** acceleration
- В average speed
- distance travelled
- **D** total time taken
- 29 The diagrams show the two forces acting on four objects P, Q, R and S.

Which two objects experience equal resultant forces acting in the same direction?

- A P and Q
- **B** P and R
- C Q and R D Q and S
- **30** A student lifts a box vertically from the floor and places it on a table.

Which two quantities must be known in order to calculate the work done on the box by the student?

- A the force used to lift the box and the height of the table
- **B** the force used to lift the box and the time taken to lift the box
- **C** the volume of the box and the height of the table
- **D** the volume of the box and the time taken to lift the box
- 31 Which energy resource does **not** use a turbine and generator to produce electricity?
 - A geothermal
 - **B** nuclear fission
 - C solar cells
 - **D** wind

32 What are used as the fixed points on the Celsius scale of temperature?

	lower fixed point	upper fixed point
Α	melting point of salt solution	boiling point of pure ethanol
В	melting point of salt solution	boiling point of pure water
С	melting point of pure ice	boiling point of pure ethanol
D	melting point of pure ice	boiling point of pure water

33 What happens to the temperature of a substance as it is melting and as it is boiling?

	melting	boiling
Α	decreases	increases
В	decreases	no change
С	increases	increases
D	no change	no change

34 A thin, converging lens produces an inverted, enlarged image of an object.

The image is formed on a screen.

F is a principal focus of the lens.

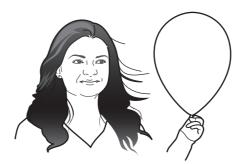

Which labelled point is a possible position for the object?

- **35** Which statement about the electromagnetic spectrum is correct?
 - A Gamma-radiation has a lower frequency than visible light.
 - **B** Infrared radiation has a higher frequency than radio waves.
 - **C** Microwaves have a smaller wavelength than ultraviolet radiation.
 - **D** X-rays have a larger wavelength than visible light.

36 A student rubs a balloon against her hair. Electrons are transferred from the hair onto the balloon, and the hair and the balloon both become charged.

The hair is now attracted to the balloon.

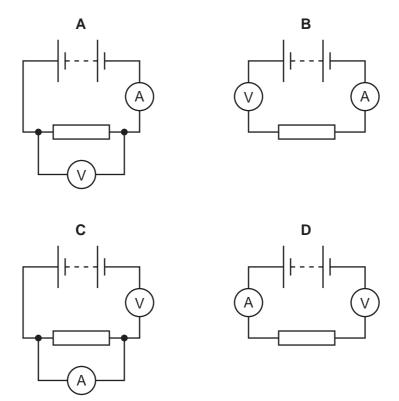

Which row shows the charges on the hair and on the balloon after rubbing?

	charge on hair	charge on balloon
A	negative	negative
В	negative	positive
С	positive	negative
D	positive	positive

37 A student connects a circuit to determine the resistance of a resistor.

Which circuit enables the current in the resistor and the potential difference (p.d.) across it to be measured?

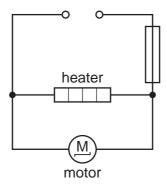

38 Which row shows how lamps are connected in a lighting circuit in a house and gives an advantage of connecting them in this way?

	how lamps are connected	advantage of connecting them in this way
Α	in parallel	they can be switched separately
В	in parallel	they share the voltage
С	in series	they can be switched separately
D	in series	they share the voltage

39 The diagram shows a circuit containing an electric heater, a motor and a fuse.

The current in the heater is 6.0 A and the current in the motor is 2.0 A.

What is an appropriate rating for the fuse?

- **A** 2A
- **B** 4A
- **C** 6A
- **D** 10 A

40 An atom of beryllium is represented by 9_4 Be.

How many neutrons are in the nucleus of this type of beryllium atom?

- **A** 4
- **B** 5
- C
- **D** 13
