

Paper 2 B2H Higher

Question number	Answer	Mark
1(a)(i)	B	(1)

Question number	Answer	Mark
1(a)(ii)	to pump blood around the body under higher pressure	(1)

Question number	Answer	Mark
1(a)(iii)	An answer that combines the following points of understanding to provide a logical description: <ul style="list-style-type: none"> • blood would flow backwards from the ventricle to the atrium/blood will leak through (1) • less (oxygenated) blood would be pumped to the body (1) 	(2)

Question number	Answer	Mark
1(b)	An explanation that combines identification – application of knowledge (1 mark) and reasoning/justification – application of understanding (1 mark): <ul style="list-style-type: none"> • the blood vessel has thick walls/small lumen (1) • to carry oxygenated blood/to carry blood under higher pressure (1) 	(2)

Question number	Answer	Mark
1(c)	<ul style="list-style-type: none"> • the fish heart has two chambers rather than four chambers (1) • the fish heart only has one ventricle and one atrium rather than two ventricles and two atria (1) • only deoxygenated blood flows through the fish heart (1) • the fish heart shows a single circulatory system rather than a double circulatory system (1) 	(4)

Question number	Answer	Mark
2(a)(i)	<ul style="list-style-type: none"> person 2 had a slightly higher blood glucose level than person 1 after fasting (by up to 0.2 mmols/l) (1) 	(1)

Question number	Answer	Mark
2(a)(ii)	<ul style="list-style-type: none"> person 3 had a much higher blood glucose level than person 1 two hours after taking glucose (up by up to 5.6 mmols/l) (1) 	(1)

Question number	Answer	Mark
2(a)(iii)	Insulin	(1)

Question number	Answer	Mark
2(b)(i)	<p>An answer that combines points of interpretation/evaluation to provide a logical description:</p> <ul style="list-style-type: none"> levels remain low up until day 14 then rise (1) they continue to rise to day 23 and drop at day 24 (1) 	(2)

Question number	Answer	Mark
2(b)(ii)	<p>An explanation that combines identification – understanding (1 mark) and reasoning/justification – understanding (1 mark):</p> <ul style="list-style-type: none"> as ovulation occurs (1) the levels of progesterone released from the corpus luteum increases to maintain the lining of the uterus (1) 	(2)

Question number	Answer	Mark
2(b)(iii)	<p>An explanation that combines identification via a judgment (1 mark) to reach a conclusion via justification/reasoning (1 mark):</p> <ul style="list-style-type: none"> progesterone levels fall after day 23 to 17.11 (1) so uterus wall thickness is not maintained and therefore pregnancy has not occurred (1) 	(2)

Question number	Answer	Additional guidance	Mark
3(a)(i)	$25 \times 25 = 625$ (1) $1 \div 625 = 0.0016$ (1)	award full marks for correct numerical answer without working	(2)

Question number	Answer	Mark
3(a)(ii)	An answer that combines points of interpretation/evaluation to provide a logical description: <ul style="list-style-type: none"> as light intensity decreases the rate of photosynthesis also decreases (1) after 20 cm away when light intensity appears to have little effect on the rate of photosynthesis (1) 	(2)

Question number	Answer	Mark
3(a)(iii)	Use a light meter/lux meter	(1)

Question number	Answer	Additional guidance	Mark
3(a)(iv)	An explanation that combines identification – improvement of the experimental procedure (1 mark) and justification/reasoning which must be linked to the improvement (1 mark): <ul style="list-style-type: none"> collect the gas/oxygen produced in a graduated gas syringe (1) to reduce the errors generated when counting bubbles which maybe of different sizes (1) 	accept alternative gas collection method with measuring cylinder and beehive shelf accept leave the apparatus for a longer amount of time	(2)

Question number	Answer	Mark
3(b)	An explanation that combines identification via a judgment (1 mark) to reach a conclusion via justification/reasoning (1 mark): <ul style="list-style-type: none"> the volume of gas produced would decrease to below four bubbles (1) because light is needed for photosynthesis (1) 	(2)

Question number	Answer	Mark
4(a)	<p>An explanation that combines identification – understanding (1 mark) and reasoning/justification – understanding (1 mark):</p> <ul style="list-style-type: none"> • same temperature to act as control (1) • to provide the optimum temperature for enzyme action in the peas (1) 	(2)

Question number	Answer	Additional guidance	Mark																
4(b)(i)	<ul style="list-style-type: none"> • headed table with units (1) • accurately completed table (1) <table border="1" style="margin-left: 20px;"> <thead> <tr> <th></th> <th>A</th> <th>B</th> <th>C</th> </tr> </thead> <tbody> <tr> <td>O₂ used /ml at 10 mins</td> <td>0.8</td> <td>0.1</td> <td>0.0</td> </tr> <tr> <td>O₂ used /ml at 20 mins</td> <td>1.6</td> <td>0.1</td> <td>0.0</td> </tr> <tr> <td>O₂ used /ml at 30 mins</td> <td>2.4</td> <td>0.1</td> <td>0.0</td> </tr> </tbody> </table>		A	B	C	O ₂ used /ml at 10 mins	0.8	0.1	0.0	O ₂ used /ml at 20 mins	1.6	0.1	0.0	O ₂ used /ml at 30 mins	2.4	0.1	0.0	<p>negative values do not need to be shown if table heading states oxygen used/lost</p> <p>accept time in row 1 as an alternative</p>	(2)
	A	B	C																
O ₂ used /ml at 10 mins	0.8	0.1	0.0																
O ₂ used /ml at 20 mins	1.6	0.1	0.0																
O ₂ used /ml at 30 mins	2.4	0.1	0.0																

Question number	Answer	Additional guidance	Mark
4(b)(ii)	$2.4 \div (30 \times 60)$ (1) $= 0.0013$ (ml/second) (1)	<p>accept $1.6 \div (20 \times 60)$</p> <p>accept $0.8 \div (10 \times 60)$</p> <p>award full marks for correct numerical answer without working</p> <p>maximum one mark if no unit conversion</p>	(2)

Question number	Answer	Mark
4(b)(iii)	An explanation that combines identification – application of knowledge (1 mark) and reasoning/justification – application of understanding (1 mark): <ul style="list-style-type: none"> the peas in respirometer A are germinating so using up oxygen (1) during the process of respiration to release energy for growth (1) 	(2)

Question number	Answer	Additional guidance	Mark
4(c)	Any one improvement from: <ul style="list-style-type: none"> soda lime (1) cotton wool soaked with potassium hydroxide (1) 	accept other relevant chemical that would remove carbon dioxide	(1)

Question number	Answer	Additional guidance	Mark
5(a)(i)	<ul style="list-style-type: none"> $156 \div 10$ (1) 16 units (1) Answer to two significant figures	award full marks for correct numerical answer without working	(2)

Question number	Answer	Mark
5(a)(ii)	An explanation that combines identification – application of knowledge (1 mark) and reasoning/justification – application of understanding (1 mark): <ul style="list-style-type: none"> an increase in the units of insulin injected would cause more blood glucose to be converted to glycogen and stored in the liver/muscles (1) leading to blood glucose levels becoming critically low/person would become hypoglycemic (1) 	(2)

Question number	Answer	Mark
5(b)(i)	B	(1)

Question Number	Indicative content	Mark
*5(b)(ii)	<p>Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme.</p> <p>The indicative content below is not prescriptive and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant.</p> <p style="text-align: center;">AO1 (6 marks)</p> <ul style="list-style-type: none"> • the thyroid gland produces thyroxine • thyroxine helps to regulate metabolic rate • low levels of thyroxine should stimulate the production of TRH • TSH being produced and more thyroxine being released • an underactive thyroid would cause less thyroxine to be produced • metabolic rate to drop • less energy (calories) are needed for tasks • more fat storage so the person gains body mass 	(6)

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–2	<ul style="list-style-type: none"> • Demonstrates elements of biological understanding, some of which is inaccurate. Understanding of scientific ideas lacks detail. (AO1) • Presents an explanation with some structure and coherence. (AO1)
Level 2	3–4	<ul style="list-style-type: none"> • Demonstrates biological understanding, which is mostly relevant but may include some inaccuracies. Understanding of scientific ideas is not fully detailed and/or developed. (AO1) • Presents an explanation that has a structure which is mostly clear, coherent and logical. (AO1)
Level 3	5–6	<ul style="list-style-type: none"> • Demonstrates accurate and relevant biological understanding throughout. Understanding of the scientific ideas is detailed and fully developed. (AO1) • Presents an explanation that has a well-developed structure which is clear, coherent and logical. (AO1)

Level	Mark	Descriptor
	0	No awardable content
Level 1	1–2	<ul style="list-style-type: none"> The explanation attempts to link and apply knowledge and understanding of scientific ideas, flawed or simplistic connections made between elements in the context of the question. Lines of reasoning are unsupported or unclear. (AO2)
Level 2	3–4	<ul style="list-style-type: none"> The explanation is mostly supported through linkage and application of knowledge and understanding of scientific ideas, some logical connections made between elements in the context of the question. Lines of reasoning mostly supported through the application of relevant evidence. (AO2)
Level 3	5–6	<ul style="list-style-type: none"> The explanation is supported throughout by linkage and application of knowledge and understanding of scientific ideas, logical connections made between elements in the context of the question. Lines of reasoning are supported by sustained application of relevant evidence. (AO2)

Question number	Answer	Mark
6(a)(i)	B	(1)

Question number	Answer		Mark
6(a)(ii)	<p>An explanation that combines identification - application of knowledge (1 mark) and reasoning/justification – application of understanding (1 mark):</p> <ul style="list-style-type: none"> fish produce ammonia as a waste product which the bacteria convert (into nitrites then nitrates) (1) this prevents the pH from getting too high and prevents the fish from dying (1) 	accept pH above 7.4	(2)

Question number	Answer	Mark
6(a)(iii)	<p>An explanation that combines identification – understanding (1 mark) and reasoning/justification – understanding (1 mark):</p> <ul style="list-style-type: none"> the aquatic plant will take up nitrates by active transport (1) against the concentration gradient/from where there is a low concentration to where there is a high concentration of nitrates (1) 	(2)

Question number	Answer	Additional guidance	Marks
6(b)	<p>An answer that combines the following points of application of knowledge and understanding to provide a logical description:</p> <ul style="list-style-type: none"> a description of the use of a quadrat either by random sampling or using a belt transect (1) a sample size 10–100 and count the number of clover plants in each quadrat (1) multiplication factor dependent on the number of quadrats sampled (1) 	to gain maximum marks steps must be in a logical sequence	(3)

Question number	Answer	Mark
6(c)	<p>An explanation that combines identification – understanding (1 mark) and reasoning/justification – understanding (3 marks):</p> <ul style="list-style-type: none"> clover/leguminous plants could be used in crop rotation (1) where at intervals (2–3 years) a field is planted with clover/leguminous plants and left fallow (1) the clover/leguminous plants will have colonies of nitrogen fixing bacteria which will produce nitrates (1) the nitrates will increase the fertility of the soil and negate the need for artificial fertilisers (1) 	(4)
