General Certificate of Secondary Education

Unit **B711/02**: Unit 1 Modules B1, C1, P1 (Higher Tier)

Mark Scheme for January 2013

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

B711/02

Mark Scheme

January 2013

For answers marked by levels of response:

To determine the level – start at the highest level and work down until you reach the level that matches the answer

To determine the mark within the level, consider the following:

Descriptor	Award mark
On the borderline of this level and the one below	At bottom of level
Just enough achievement on balance for this level	Above bottom and either below middle or at middle of level (depending on number of marks available)
Meets the criteria but with some slight inconsistency	Above middle and either below top of level or at middle of level (depending on number of marks available)
Consistently meets the criteria for this level	At top of level

Annotations

Annotation	Meaning
	correct response
	incorrect response
	benefit of the doubt
	benefit of the doubt not given
	error carried forward
	information omitted
	ignore
	reject
	contradiction

- / = alternative and acceptable answers for the same marking point
- (1) = separates marking points
- allow** = answers that can be accepted
- not** = answers which are not worthy of credit
- reject** = answers which are not worthy of credit
- ignore** = statements which are irrelevant
- () = words which are not essential to gain credit
- = underlined words must be present in answer to score a mark (although not correctly spelt unless otherwise stated)
- ecf = error carried forward
- AW = alternative wording
- ora = or reverse argument

Question		Answer	Marks	Guidance
1	(a)		1	all correct for mark
	(b)	(no) drunk 4.45 units (2) but if answer is incorrect then $1.5 \times 2.3 + 1.0$ (1)	2	if yes, 1 mark can be awarded for correct working allow he drank 0.45 over the limit (2) allow 4.5 (2) allow 4.4 (1) allow 'adds up to more than 4' (1) allow any number over 4 if qualified by the statement that this is over the limit (1)
	(c)	enzymes (in liver) breakdown the alcohol (1) toxins produced by breakdown of alcohol (1)	2	ignore just 'alcohol is a poison or alcohol is toxic' ignore harmful substances made by breakdown of alcohol allow consequence of damage e.g. cirrhosis, jaundice, liver shrinks, liver swells or enlarges, scarring of liver, kills liver cells (1)
Total			5

Mark Scheme

January 2013

Question		Answer	Marks	Guidance
2	(a)	0.42 (2) but $1.68 \div 4$ or $\frac{0.39 + 0.45 + 0.44 + 0.40}{4}$ (1)	2	
	(b)	any two from: idea that males are faster than females (1) idea that older you are the slower reactions get (1)	2	allow comparisons – e.g. Diane is twice as slow as Colin (1) allow reference to increase in reaction time only if individuals correctly identified e.g. the majority of the times went up at the second attempt except two, Ewan and Freda (1)
	(c)	retina (1)	1	allow (rods and) cones (1) allow fovea or yellow spot (1) allow phonetic spelling
	(d) (i)	does not show up if dominant allele is present (1)	1	allow only shows if no dominant allele (1) ignore is not dominant allow only expressed if there are two recessive alleles (1) allow only present when both alleles are recessive (1) allow characteristic that is not expressed in heterozygous genotypes (1)
	(ii)	(alternative / different) version of a gene (1)	1	allow it is the b or B in Bb (1) allow an example of a gene with its alleles named e.g. eye colour gene has alleles that are blue or brown ignore different types of gene but allow different types of a gene (1) ignore a gene ignore references to chromosomes / DNA / genotypes
	(iii)	bb	1	allow homozygous recessive (1)
