General Certificate of Secondary Education

Unit **B711/02**: Modules B1, C1, P1 (Higher Tier)

Mark Scheme for June 2013

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

© OCR 2013

For answers marked by levels of response:

- a. **Read through the whole answer from start to finish**
- b. **Decide the level that best fits** the answer – match the quality of the answer to the closest level descriptor
- c. **To determine the mark within the level**, consider the following:

Descriptor	Award mark
A good match to the level descriptor	The higher mark in the level
Just matches the level descriptor	The lower mark in the level

- d. Use the **L1**, **L2**, **L3** annotations in Scoris to show your decision; do not use ticks.

Quality of Written Communication skills assessed in 6-mark extended writing questions include:

- appropriate use of correct scientific terms
- spelling, punctuation and grammar
- developing a structured, persuasive argument
- selecting and using evidence to support an argument
- considering different sides of a debate in a balanced way
- logical sequencing.

Annotations

Annotation	Meaning
	correct response
	incorrect response
BOD	benefit of the doubt
NBOD	benefit of the doubt not given
ECF	error carried forward
	information omitted
I	ignore
R	reject
CON	contradiction
L1	Level 1
L2	Level 2
L3	Level 3

Abbreviations, annotations and conventions used in the detailed Mark Scheme.

/	=	alternative and acceptable answers for the same marking point
(1)	=	separates marking points
allow	=	answers that can be accepted
not	=	answers which are not worthy of credit
reject	=	answers which are not worthy of credit
ignore	=	statements which are irrelevant
()	=	words which are not essential to gain credit
—	=	underlined words must be present in answer to score a mark (although not correctly spelt unless otherwise stated)
ecf	=	error carried forward
AW	=	alternative wording
ora	=	or reverse argument

Question		Answer	Marks	Guidance
1	(a) (i)	35 (pairs) (1)	1	
	(ii)	XY (1)	1	either order allow X and Y or Y and X (1)
	(b)	XX and XY seen as the parent genotypes (1) XX and XX and XY and XY seen as offspring genotypes (1)	2	allow genetic diagrams e.g.  ignore incorrect labelling of parents e.g. XX male
	(c)	any two from: has monocular vision / does not have binocular vision (1) (brain) cannot compare images (from both eyes) (1) images from both eyes need to be similar / cannot judge distance when object is seen with only one eye / cannot judge distance when object is on one side of his head (1)	2	allow eyes are not forward facing / eyes are on the sides of his head / cannot see straight ahead / cannot see what is in front of them (1) allow the two images do not meet / the two images do not overlap / images do not meet up / (idea that) brain cannot compare the two pictures (1)
Total			6	

Question		Answer	Marks	Guidance
2	(a)	<u>blood</u> sugar (levels) (1)	1	allow <u>blood</u> glucose (levels) / amount of sugar in the <u>blood</u> / amount of glucose in the <u>blood</u> (1) ignore just amount of sugar (levels) ignore just amount of glucose (levels)

Question	Answer	Marks	Guidance
(b)	<p>[Level 3] Linked explanation of the usefulness of the food pyramid AND Linked information about Type 1 diabetes Quality of written communication does not impede communication of the science at this level. <p style="text-align: right;">(5–6 marks)</p></p> <p>[Level 2] Explanation of the usefulness of the food pyramid AND Information about Type 1 diabetes Quality of written communication partly impedes communication of the science at this level. <p style="text-align: right;">(3–4 marks)</p></p> <p>[Level 1] Explanation of the usefulness of the food pyramid OR Information about Type 1 diabetes Quality of written communication impedes communication of the science at this level. <p style="text-align: right;">(1–2 marks)</p></p> <p>[Level 0] Insufficient or irrelevant science. Answer not worthy of credit. <p style="text-align: right;">(0 marks)</p></p>	6	<p>This question is targeted at grades up to A. Indicative scientific points may include:</p> <p>At level 3 Linked explanation of the usefulness of the food pyramid may include:</p> <ul style="list-style-type: none"> • should eat mainly from the bottom of the pyramid to prevent overeating of sugar • should eat less from top of pyramid to avoid over eating sugar • should eat some from the top to make sure they have sugar in diet • diabetics can use the food pyramid to balance or reduce the amount of sugar eaten <p>Information about Type 1 diabetes may include:</p> <ul style="list-style-type: none"> • Type 1 diabetes can be managed by diet but also needs injections of insulin • eating more sugary food means they will need to inject more insulin <p>At level 1 and 2 Explanation of the usefulness of the food pyramid may include:</p> <ul style="list-style-type: none"> • shows how much of each food is best • diabetics should eat more from bottom / named food(s) • diabetics should eat less from top / named food(s) <p>allow sugary foods / glucose as alternatives for sweets</p> <p>Information about Type 1 diabetes may include:</p>

B711/02

Mark Scheme

June 2013

					<ul style="list-style-type: none"> • blood sugar level not controlled or too high • none or little insulin produced by body • insulin controls blood sugar levels / stops hypo(glycaemic) or hyper(glycaemic) effects • Type 1 diabetes needs injections of insulin <p>Use the L1, L2, L3 annotations in scoris, do not use ticks.</p>
	(c)	<p>any two from:</p> <p>(contains) receptors (1)</p> <p>to detect light / to see light (1)</p> <p>to detect colours / to see colours (1)</p> <p>changes light (energy) into electrical (energy) / AW (1)</p>	2	<p>allow (contains) rods / (contains) cones (1)</p> <p>allow light sensitive / photosensitive / absorb light (1)</p> <p>allow photoreceptors (2)</p> <p>allow colour receptors (2)</p> <p>allow light sensitive cells (2)</p> <p>ignore reflects light / refracts light</p> <p>ignore allows light into the eye / focuses light</p> <p>ignore controls light / controls colour (that enters the eye)</p>	
			Total	9	

Question			Answer	Marks	Guidance
3	(a)	(i)	<p>any two from:</p> <p>stop smoking / reduce smoking / avoid passive smoke / avoid cigarette fumes (1)</p> <p>eat foods rich in antioxidants (1)</p> <p>avoid (exposure to) harmful gases (not associated with smoking) / dust / chemicals (1)</p>	2	<p>allow use filters on cigarettes / avoid smoke filled areas (1)</p> <p>allow eat (plenty of) fruit and vegetables / take beta carotene supplement (if you are a heavy smoker) (1)</p> <p>allow avoid areas with high background radiation or radon / avoid area near named harmful substances e.g. asbestos (1)</p> <p>allow wear face masks in polluted areas (1)</p>
		(ii)	<p>male cases: deaths ratio</p> <p>any one from:</p> <p>558 : 138 (1)</p> <p>93 : 23 (1)</p> <p>4 : 1 (1)</p> <p>female cases: deaths ratio</p> <p>any one from:</p> <p>1596 : 216 (1)</p> <p>133 : 18 (1)</p> <p>7 : 1 (1)</p>	2	<p>allow 4.04 : 1 (1)</p> <p>allow one mark for any correct ratio</p> <p>allow 7.39 : 1 (1)</p> <p>allow 7.4 : 1 (1)</p> <p>allow 7.3 : 1 (1)</p> <p>allow one mark for any correct ratio</p> <p>allow 1 in 4 and 1 in 7 (1)</p> <p>allow one mark if both ratios calculated correctly</p>

B711/02

Mark Scheme

June 2013

Question		Answer	Marks	Guidance
				but written the wrong way round e.g. 1 : 4 and 1 : 7 (1)
	(iii)	<p>males (no mark)</p> <p>because the ratio (of cases : deaths) is small(er) (1)</p>	1	<p>allow ecf from 3(a)(ii)</p> <p>allow males (no mark) because for the same number of cases there are more deaths (1)</p> <p>allow males (no mark) because a higher percentage of cases die (1)</p>
	(b)	<p>any two from:</p> <p>his results needed a new way of thinking to explain them (1)</p> <p>his work was used by others to develop new lines of approach for research (into cancer treatment) (1)</p> <p>his research was recognised as being a ground breaking discovery (in an area covered by a Nobel Prize award) (1)</p>	2	<p>DO NOT AWARD MARKS FOR REPEATING INFORMATION FROM ARTICLE</p> <p>allow he did not give up when the results were not as expected but tried to explain them (1)</p> <p>ignore just his work saved many lives</p>
		Total	7	

B711/02

Mark Scheme

June 2013

Question		Answer	Marks	Guidance
4	(a)	2 hours / 120 minutes (1)	1	allow + / - 5 minutes
	(b)	oxyhaemoglobin forms (1) but oxyhaemoglobin forms more readily than carbon monoxide combines with haemoglobin (2) or carbon monoxide combines with haemoglobin during poisoning (1) (idea that high concentration of) oxygen will replace this carbon monoxide (and so oxygenate the blood again) (1)	2	allow high oxygen concentration will cause the carbon monoxide to dissociate from haemoglobin (1) allow carbon monoxide reacts with haemoglobin (1)
		Total	3	

Question		Answer	Marks	Guidance
5	(a)	170 (1)	1	unit not needed allow any value between 160 and 180 (1) allow 160 – 180 (1) ignore 160 - 250
	(b)	petrol has a smaller molecular size / ora (1) petrol has weaker intermolecular forces / petrol has weaker forces between molecules / ora (1)	2	BOTH MARKING POINTS MUST INCLUDE A COMPARISON assume it refers to petrol in the answer allow petrol has fewer C atoms / smaller hydrocarbon chain (1) allow petrol has weaker van der Waals' forces / petrol has weaker intermolecular bonds (1) not petrol has weaker bonds / petrol has weaker covalent bonds
	(c)	large molecules that are in low demand are cracked (1) cracking produces small molecules that are in high demand (1) but correct example (scores 2 marks) e.g. naphtha is cracked to make petrol or LPG / bitumen is cracked to make paraffin / bitumen is cracked to make petrol or LPG (2)	2	maximum two marks ignore more useful if any incorrect examples maximum one mark not bitumen cracked to make diesel or naphtha – this is not supported by the data not diesel is cracked to give naphtha – this is not supported by the data not cracking paraffin or petrol – they are in demand
Total			5	

B711/02
