

Wednesday 25 May 2016 - Afternoon

GCSE GATEWAY SCIENCE SCIENCE B

B711/02 Science modules B1, C1, P1 (Higher Tier)

Candidates answer on the Question Paper. A calculator may be used for this paper.

OCR supplied materials:

None

Other materials required:

- Pencil
- Ruler (cm/mm)

Duration: 1 hour 15 minutes

| Candidate forename | | | | | Candidate surname | | | |
|--------------------|--|--|--|--------------|-------------------|--|--|--|
| | | | | | | | | |
| Centre number | | | | Candidate nu | ımber | | | |

INSTRUCTIONS TO CANDIDATES

- Write your name, centre number and candidate number in the boxes above. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer all the questions.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Write your answer to each question in the space provided. If additional space is required, you should use the lined page(s) at the end of this booklet. The question number(s) must be clearly shown.
- Do not write in the bar codes.

INFORMATION FOR CANDIDATES

- The quality of written communication is assessed in questions marked with a pencil ().
- A list of equations can be found on page 2.
- The Periodic Table can be found on the back page.
- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is 75.
- This document consists of 28 pages. Any blank pages are indicated.

EQUATIONS

energy = mass x specific heat capacity x temperature change
energy = mass x specific latent heat

efficiency =
$$\frac{\text{useful energy output (x 100\%)}}{\text{total energy input}}$$

wave speed = frequency × wavelength

power = voltage × current

energy supplied = power x time

average speed =
$$\frac{\text{distance}}{\text{time}}$$

distance = average speed x time

$$s = \frac{(u+v)}{2} \times t$$

$$acceleration = \frac{change in speed}{time taken}$$

force = mass x acceleration

weight = mass x gravitational field strength

work done = force \times distance

$$power = \frac{work done}{time}$$

 $power = force \times speed$

$$KE = \frac{1}{2}mv^2$$

momentum = mass x velocity

$$force = \frac{change \ in \ momentum}{time}$$

$$GPE = mgh$$

$$mgh = \frac{1}{2}mv^2$$

$$resistance = \frac{voltage}{current}$$

Answer **all** the questions.

SECTION A – Module B1

| Jim | is a 14 year old boy who has Type 1 diabetes. |
|-----|---|
| (a) | Jim needs medical treatment to control his condition. |
| | He injects insulin into his body. |
| | Describe how insulin travels around the body. |
| | [1] |
| (b) | The more carbohydrate Jim eats, the more insulin he needs. |
| | Explain why. |
| | |
| | |
| | [2] |
| (c) | Describe where and how carbohydrates are stored in the body. |
| | |
| | |
| | [2] |
| (d) | Jim thinks he inherited diabetes. |
| | Inherited characteristics are controlled by genes. |
| | Cystic fibrosis is another inherited disorder. |
| | Cystic fibrosis is caused by a recessive allele. |
| | Complete the table below to describe the phenotypes of different individuals. |

| Genotype | Phenotype |
|----------|-----------|
| FF | |
| Ff | |
| ff | |

[Total: 7]

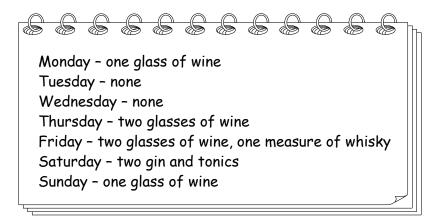

1

| 2 | This question | is about | alcohol |
|---|---------------|----------|---------|
|---|---------------|----------|---------|

| (a) | Explain why alcohol slows down transmission along nerve pathways. |
|-----|--|
| | |
| | |
| | |
| | [3] |
| (b) | Women are advised to drink no more than 14 units of alcohol each week. |
| | Look at the table. |

| Drink | Amount | Units of alcohol |
|---------------|-------------|------------------|
| beer | one pint | 2.3 |
| gin and tonic | one measure | 1.0 |
| cider | one pint | 2.6 |
| wine | one glass | 3.0 |
| whisky | one measure | 1.0 |

Connie writes down all the alcoholic drink she has in one week.

Connie has drunk more than the advised amount.

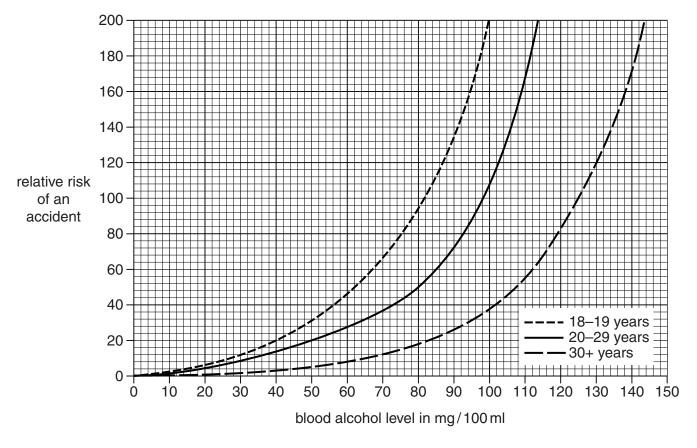

Calculate by how much she is over the advised amount.

answer units [2]

(c) Connie is concerned about drinking alcohol.

She researches the effects of alcohol and finds this graph below.

It shows the relative risk of having an accident if you drink alcohol and drive.

Connie writes down some conclusions about the graph.

Put a tick (✓) next to **two** conclusions that best match the graph.

| 20–29 year olds reduce the relative risk of an accident by 30 if they have blood alcohol level of 50 mg/100 ml instead of 80 mg/100 ml. | |
|---|-----|
| Only those aged 18–19 will have an accident with a blood alcohol level of 10 mg/100 ml. | |
| People over 30 are 20 times better drivers than people in other age groups. | |
| People with a blood alcohol level of 150 mg/100 ml are at least 200 times more likely to have an accident than people with no alcohol in their blood. | |
| The lower the blood alcohol level the more likely you are to have an accident. | |
| | [2] |

Polio is an illness caused by a virus.
 In 1988 a campaign started to rid the world of polio.
 The campaign wanted to vaccinate children all over the world.

Look at the graph below. It shows the number of polio cases in the world from 1984 to 2004.

Explain how vaccinations work and use the data to conclude if the campaign was successful or not.

7 BLANK PAGE

Question 4 begins on page 8

PLEASE DO NOT WRITE ON THIS PAGE

4 Benny is cooking his tea.

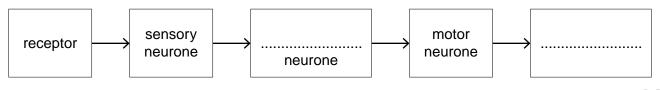

He lifts a hot plate of food.

The plate is too hot to hold.

Benny drops the plate.

(a) Benny's response to the hot plate is a reflex action.

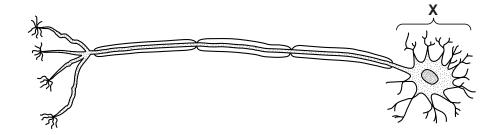

Finish the flow chart below to show the path taken by the impulse that causes the reflex.

[2]

(b) Motor neurones are part of Benny's nervous system.

Look at the diagram below of a motor neurone.

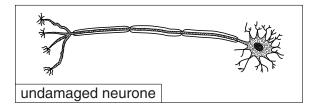

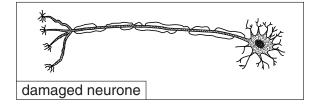

Write down the name of part X.

.....[1]

(c) Sometimes neurones can be damaged.

Look at the pictures of an undamaged and a damaged neurone.

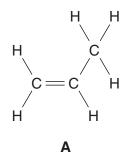

| | [Total: 5 |
|---|-----------|
| | [2 |
| | |
| | |
| Explain your answer. | |
| | |
| now would the damage affect the transmission of impulses? | |

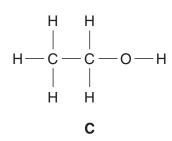

SECTION B - Module C1

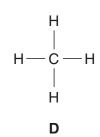

5 This question is about carbon compounds.

Look at the displayed formulas.

В

(a) Which compound is **not** a hydrocarbon?

Explain your answer.

.....[2]

(b) What is the molecular formula of compound C?

.....[1]

(c) Compound A is an unsaturated compound.

Explain why.

[11]

(d) Molecules of compound A can join together to make a polymer.

Draw the **displayed formula** of the polymer made.

[1]

[Total: 5]

Question 6 begins on page 12

| | 12 |
|------|---|
| This | s question is about crude oil. |
| Cru | de oil is a fossil fuel. |
| (a) | Fossil fuels are finite resources and are non-renewable. |
| | Explain what is meant by finite and non-renewable. |
| | |
| | |
| | |
| | [2] |
| (b) | Crude oil is often transported in large ships called oil tankers. |
| | NO SMOKING |
| | This could cause environmental problems. |
| | Explain two of these environmental problems. |
| | |
| | |
| | [2] |
| | |

6

(c) Crude oil is separated into useful fractions by fractional distillation.

Look at the table below. It shows information about some of the fractions separated from crude oil.

| Fraction | Percentage supply in crude oil | Percentage demand from customers |
|----------------------|--------------------------------|--|
| LPG | 2 | 4 |
| petrol | 15 | 27 |
| diesel | 14 | 21 |
| paraffin | 14 | 9 |
| heating oil | 14 | 14 |
| fuel oil and bitumen | 36 | 25 |

There is not enough petrol to meet the demand for it.

| (i) | Write down the names of two other fractions where the supply does not meet the demand from customers. |
|------|--|
| | and[1] |
| (ii) | Explain how an oil refinery matches the supply of petrol with the demand for it. |
| | Use information from the table above to help you. |
| | |
| | |
| | |
| | [2] |
| | [Total: 7] |

| • | This | s question is about fuels. | |
|---|------|--|-----|
| | (a) | Butane, C ₄ H ₁₀ , burns in oxygen, O ₂ . | |
| | | Carbon dioxide and water are made. | |
| | | Write a balanced symbol equation for this combustion reaction. | |
| | | | |
| | | [| 2] |
| | (b) | Some carbon monoxide is made when petrol burns in a car engine. | |
| | | A catalytic converter changes carbon monoxide into another gas. | |
| | | What is the name of this gas? | |
| | | [| [1] |

[Total: 9]

(c) Look at the information about some fuels.

| Fuel | State at room temperature | Availability | Energy released in kJ/g | Carbon dioxide released (0=low, 5=high) | Cost of 1 kg in £ |
|---------|---------------------------|--------------|-------------------------------|---|-------------------------|
| coal | solid | good | 33 | 3.7 | 0.3 |
| methane | gas | good | 56 | 2.8 | 1.3 |

Richard wants to use methane to heat a new factory.

Edward suggests using coal instead of methane.

Evaluate the advantages and disadvantages of these two fuels and suggest which would be the more sensible choice to heat the factory.

Use the information from the table to help you.

| The quality of written communication will be assessed in your answer to this question. |

| |

8 Helen has bought a new bottle of perfume.

(a) Draw a straight line to join each property of Helen's perfume to the most important reason.Draw only three lines.

| | Property of Helen's perfume | Reason |
|-----|--------------------------------|--|
| | | so the perfume cannot be washed off easily |
| | insoluble in water | |
| | | so Helen is not poisoned |
| | does not react with water | |
| | | so Helen can put the perfume directly onto her skin |
| | non-irritant | |
| | | so that the perfume does not react with perspiration |
| | | [2] |
| (b) | Helen's friends are able to s | mell her perfume because it is volatile (evaporates easily). |
| | Explain, using ideas about p | articles, why Helen's perfume evaporates easily. |
| | | |
| | | |
| | | |

[Total: 4]

17 SECTION C – Module P1

- 9 This question is about waves.
 - (a) Look at the list.

It shows waves from the electromagnetic spectrum.

infrared

radio

ultraviolet

visible

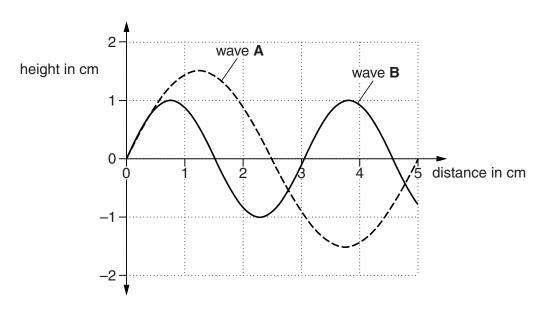

X-rays

Complete the sentences using words from the list.

(i) The wave that is reflected by shiny surfaces and can heat the surface of food is

.....[1]

(b) Look at the diagram below of two transverse waves.

What is the **difference** in wavelength between wave **A** and wave **B**?

.....

Difference in wavelengthcm

[1]

[Total: 5]

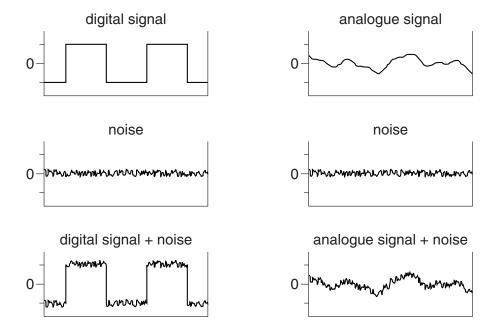

| (c) | Mobile | phones | use | microwave | signals. |
|-----|--------|--------|-----|-----------|----------|
|-----|--------|--------|-----|-----------|----------|

There is not much diffraction of microwave signals around large buildings.

This causes signal loss.

10 This question is about digital and analogue signals.

Look at the information showing what happens to the signals when noise is added to them.

Use the diagrams to explain why it is easier to remove noise from digital signals and how the properties of digital signals played a part in the switching from analogue to digital TV broadcasts.

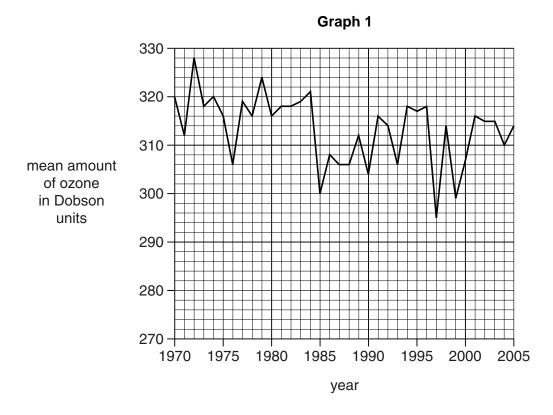

| The quality of written communication will be assessed in your answer to this question. | |

11 The condition of the ozone layer near the South Pole concerns scientists.

Scientists have been measuring the mean amount of ozone in the upper atmosphere.

Look at their results from 1970 to 2005.

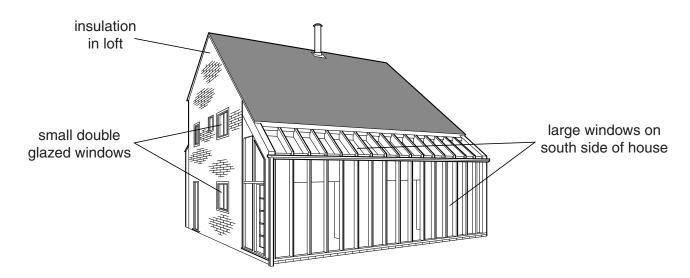

Scientists have also been measuring the mean ultraviolet (UV) index from 1970 to 2005.

[Total: 5]

| (a) | Loo | k at Graph 1 . | | | |
|-----|--|--|--|--|--|
| | Scientists predicted that the amount of ozone in 1997 was the lowest they were likely to record. | | | | |
| | Is th | nis prediction correct? | | | |
| | | | | | |
| | Ехр | lain your answer. | | | |
| | | | | | |
| | | [1] | | | |
| (b) | (i) | Compare Graphs 1 and 2. | | | |
| | | Describe the relationship between the mean amount of ozone and mean UV index. | | | |
| | | | | | |
| | | [1] | | | |
| | (ii) | Describe why it is important to maintain a high level of ozone in the Earth's upper atmosphere. | | | |
| | | | | | |
| | | [1] | | | |
| (c) | | cribe why the reduction in the level of pollution from CFCs needed international agreement enefit society. | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | [2] | | | |

12 Lyndsay and Kevin buy a new house.

(a) Their house does **not** have cavity wall insulation but is more energy efficient than most houses.

Look at the picture.

| Explain how two energy saving features of their house improve its energy efficiency. Use ideas about energy transfer in your answer. | |
|---|----|
| | ٠. |

| | • |
| | |
| | • |
| | |
| | |
| [2 | 2] |
| _ | |

[Total: 6]

(b) Here are three different ways to increase the energy efficiency of Lyndsay and Kevin's house.

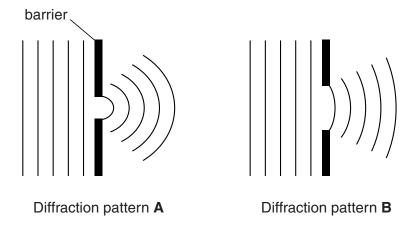

| How to increase energy efficiency | Cost to install in £ | Saving on energy bills each year in £ |
|--|----------------------|---|
| Cavity wall insulation | 1400 | 400 |
| Low energy light bulbs for whole house | 20 | 10 |
| Thermostat for heating | 35 | 100 |

| (i) | One of the ways to increase efficiency is to add cavity wall insulation to the house. |
|------|---|
| | Lyndsay thinks this is a good idea because they will be living in the house for at least 5 years. |
| | Use the information in the table above to show that Lyndsay is correct. |
| | |
| | |
| | |
| | [2] |
| (ii) | Kevin thinks the cost of cavity wall insulation is expensive. |
| | He wants to spend £55 on low energy light bulbs and a thermostat. |
| | Which will save more money after 5 years |
| | cavity wall insulation |
| | low energy light bulbs and a thermostat? |
| | answer |
| | Explain your answer. |
| | |
| | |
| | [2] |
