GCSE GATEWAY SCIENCE SCIENCE B

B712/02 Science modules B2, C2, P2 (Higher Tier)

Candidates answer on the Question Paper.
A calculator may be used for this paper.

OCR supplied materials:

None

Other materials required:

- Pencil
- Ruler (cm/mm)

Duration: 1 hour 30 minutes

Candidate forename		Candidate surname	
-----------------------	--	----------------------	--

Centre number						Candidate number				
---------------	--	--	--	--	--	------------------	--	--	--	--

INSTRUCTIONS TO CANDIDATES

- Write your name, centre number and candidate number in the boxes above. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer **all** the questions.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Write your answer to each question in the space provided. Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).
- Do **not** write in the bar codes.

INFORMATION FOR CANDIDATES

- The quality of written communication is assessed in questions marked with a pencil (✎).
- A list of equations can be found on page 2.
- The Periodic Table can be found on the back page.
- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is **85**.
- This document consists of **28** pages. Any blank pages are indicated.

2

EQUATIONS

energy = mass × specific heat capacity × temperature change

energy = mass × specific latent heat

$$\text{efficiency} = \frac{\text{useful energy output (} \times 100\% \text{)}}{\text{total energy input}}$$

wave speed = frequency × wavelength

power = voltage × current

energy supplied = power × time

$$\text{average speed} = \frac{\text{distance}}{\text{time}}$$

distance = average speed × time

$$s = \frac{(u + v)}{2} \times t$$

$$\text{acceleration} = \frac{\text{change in speed}}{\text{time taken}}$$

force = mass × acceleration

weight = mass × gravitational field strength

work done = force × distance

$$\text{power} = \frac{\text{work done}}{\text{time}}$$

power = force × speed

$$\text{KE} = \frac{1}{2}mv^2$$

momentum = mass × velocity

$$\text{force} = \frac{\text{change in momentum}}{\text{time}}$$

GPE = mgh

$$mgh = \frac{1}{2}mv^2$$

$$\text{resistance} = \frac{\text{voltage}}{\text{current}}$$

Answer **all** the questions.

SECTION A – Module B2

1 Cows eat grass.

Look at the diagram.

It shows how a cow uses the energy it gets from the grass it eats.

(a) **X** is the total amount of energy in the grass that the cow eats.

The cow uses 150 kJ of energy for growth and has an efficiency of energy transfer of 4%.

Calculate the value of **X**.

..... kJ [2]

(b) The energy in the faeces can be used by other organisms.

Describe how.

.....
 [1]

[Total: 3]

4

2 Jerry investigates lichen growing on trees.

He compares the amount of lichen on different trees growing near a factory.

The factory releases sulfur dioxide into the air.

He places a square grid on the **south** side of a tree trunk.

Jerry then records the percentage of the grid covered in lichen.

Jerry records the lichen growth on trees at different distances from the factory.

The table shows his results.

Distance from factory in m	Percentage cover of lichen
200	13
400	14
600	34
800	45
1000	51
1200	59
1400	60
1600	49
1800	63
2000	64

5

(a) Describe and explain the pattern in Jerry's results.

.....
.....
..... [2]

(b) Jerry takes another reading.

Look at his grid. It shows the amount of lichen cover on a tree.

Suggest how far this tree is from the factory. m

Explain how you worked out your answer.

.....
..... [2]

(c) Jerry makes this statement about his results.

Jerry's statement is **not** correct.

Suggest why.

.....
..... [1]

(d) In autumn the leaves from the tree fall to the ground.

Explain how proteins in the leaves are changed into nitrates.

.....
.....
..... [2]

[Total: 7]

3 Look at the picture of deer-like animals called caribou.

(a) Caribou live in cold climates where there is a lot of snow.

Suggest and explain **one** way their bodies are adapted to reduce heat loss.

.....
.....
..... [2]

(b) Caribou feed on lichen that grow under the snow.

Lichen are small plant-like organisms.

They have biochemical adaptations that help them grow in very cold climates.

Write about these **biochemical adaptations** to very cold climates.

.....
.....
.....
..... [3]

[Total: 5]

5 Look at the picture of the zebras.

There are many theories why zebras have stripes.

One theory is that the stripes stop flies sucking their blood.

The stripes make the zebras less attractive to the flies.

(a) Darwin's theory of evolution explains how zebras evolved to have stripes.

Read the information in the flow chart.

There are two stages missing.

Finish the flow chart.

9

(b) A group of scientists investigated whether stripes were a defence against the flies.

They used four models of zebra each with different coat patterns.

All the models were covered in sticky glue.

The diagram shows the models.

The scientists observations supported the theory that stripes are a defence against flies.

(i) Suggest **one** observation the scientists could have made.

.....
 [1]

(ii) The scientists published their results.

One reason for publishing results is so that other scientists can see them.

Write down **one other** reason why scientists publish results.

..... [1]

[Total: 4]

SECTION B – Module C2

- 6 Ammonium phosphate is used as a fertiliser.

The formula for ammonium phosphate is

- (a) Complete the table to show the number of atoms of each element in the formula for ammonium phosphate.

Element	Number of atoms
nitrogen
hydrogen
phosphorus
oxygen

[2]

- (b) Ammonium phosphate is made by **neutralisation**.

Complete the **word** equation with the chemicals needed to make ammonium phosphate.

[2]

- (c) Fertilisers are used to increase crop yield.

Explain how plants use fertiliser to increase crop yield.

.....

.....

.....

..... [2]

[Total: 6]

7 This question is about the Haber process for making ammonia.

Look at the flow chart.

(a) In the reaction vessel, nitrogen, N_2 , reacts with hydrogen, H_2 , to make ammonia, NH_3 .

Write a **balanced symbol** equation for this reaction.

..... [2]

(b) A factory makes ammonia using the Haber process.

The factory owner has to consider:

- the percentage yield of ammonia
- the rate of reaction.

The conditions used in the Haber process are:

- iron catalyst
- high pressure
- $450^\circ C$.

Explain why the factory owner chooses each of these conditions.

iron catalyst

.....

high pressure

.....

$450^\circ C$

.....

[4]

[Total: 6]

Turn over

(b) Many of the materials needed to build houses come from ores.

Ores are dug out of the Earth's crust by quarrying.

Write about one **disadvantage** and one **advantage** of quarrying.

.....

.....

.....

.....

..... [2]

[Total: 8]

14

9 This question is about the metals used in cars.

(a) Aluminium and steel are used to make car bodies.

Write about the **advantages** of using aluminium rather than steel to make car bodies.

.....

.....

.....

.....

..... [2]

(b) Look at the diagram. It shows how impure copper is purified.

Describe how **impure** copper can be purified by electrolysis.

You may wish to put some labels on the diagram to help your answer.

.....

.....

.....

.....

..... [3]

[Total: 5]

15
BLANK PAGE

Question 10 begins on page 16
PLEASE DO NOT WRITE ON THIS PAGE

SECTION C – Module P2

10 Look at the statements about global warming.

Some of the statements are facts. Other statements are the opinions of scientists.

(a) Put a tick (✓) in the correct box next to each statement to show if it is a fact or an opinion.

Statement	Fact	Opinion
The amount of carbon dioxide in the atmosphere has increased over the past 100 years.		
The average temperature of the Earth has increased over the past 50 years.		
All the ice at the poles will melt.		
The increase in temperature of the Earth is caused by burning fossil fuels.		

[2]

17

(b) In 2011, 60W filament bulbs were banned from sale.

The government said using 10W low energy bulbs would:

- give out the same amount of light
- be better value
- reduce energy use.

Look at the information about the two types of bulb.

Type of bulb	Cost of bulb	Lifetime of bulb in hours	Usage in hours each year	Number of units used each year	Cost of electricity per unit in pence
60W filament 	£0.50	600	2000	120	15
10W low energy 	£5.00	10 000	2000	20	15

Use the data in the table to explain why the government came to their conclusion.

.....

.....

.....

.....

..... [3]

[Total: 5]

11 A factory is making iron parts for a machine.

It is very important that there are no air gaps in the iron.

The company uses non-destructive testing (NDT) to check for air gaps.

Nuclear radiation passes through the iron to check for air gaps.

Look at the diagram.

(a) (i) Which type of radiation is used for NDT?

Explain your answer.

.....

.....

..... [2]

(ii) Describe how NDT can be used to detect air gaps in iron.

.....

..... [1]

19

(b) (i) When nuclear radiation passes through air, it ionises some of the gases in the air.

What happens to the air molecules to make them ions?

.....
.....
.....
..... [2]

(ii) Nuclear radiation can damage human cells.

Explain how.

.....
..... [1]

[Total: 6]

Question 12 begins on page 20

13 (a) Look at the graph.

It shows the output from a generator in a power station.

What is the peak voltage?

answer kV [1]

(b) The power station has an efficiency of 0.34 (34%).

The energy supplied to the power station each second is 9×10^8 J.

Calculate the **useful** energy produced each second.

.....

.....

.....

answer J [2]

[Total: 3]

14 (a) A small star like our Sun starts its life as an interstellar gas cloud and ends its life as a white dwarf. Complete the flowchart to show the life history of a **small** star. Choose from the list.

main sequence star

neutron star

red giant

proto star

black hole

supernova

stage

[2]

(b) Describe and explain one property of a black hole.

.....

.....

.....

..... [2]

(c) Light from distant galaxies shows a greater red shift than light from closer galaxies.

Explain why.

.....

..... [1]

[Total: 5]

SECTION D

15 Copper is a very important metal.

Look at the bar chart.

It shows how much copper was used each year in different parts of the world.

(a) What does the bar chart tell you about:

- the **total** amount of copper used
- the amounts of copper used in different parts of the world

between 2000 and 2010?

.....

.....

.....

.....

.....

.....

.....

(b) Look at the table.

It shows the amount of copper produced between 2008 and 2012.

Amount of copper produced in thousands of tonnes					
Area of world	2008	2009	2010	2011	2012
China	3780	4250	4800	5120	5430
Europe	3710	3560	3610	3660	3760
Asia (not including China)	4340	4030	4100	4160	4210
North America	2210	2060	2080	2110	2140
Rest of World	4720	4820	5010	5200	5500
Total	18760	18720	19600	20250	21040

(i) Which area of the world has shown the **greatest increase** in the amount of copper produced between 2008 and 2012?

Explain your answer using the data in the table.

.....

.....

.....

Suggest why this increase has happened.

.....

.....

[3]

(ii) The percentage of the world's copper **used** by China in 2012 was 34.5%.

The percentage of the world's copper **produced** by China is 25.8%.

What problem does this cause for China?

.....

..... [1]

25

(iii) Look at the table below.

It shows the total amounts of copper **produced** and copper **used** in the world in 2008 and 2012.

Complete the table using information from the table in part (b).

Amount of copper in thousands of tonnes	2008	2012
total amount of copper produced in the world
total amount of copper used in the world	18 490	21 600

What issues does this raise?

.....

.....

.....

..... [2]

[Total: 10]
