General Certificate of Secondary Education

Mark Scheme for November 2020

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

Annotations

Annotation	Meaning
	Correct response
	Incorrect response
	Omission mark
	Benefit of doubt given
	Contradiction
	Rounding error
	Error in number of significant figures
	Error carried forward
	Level 1
	Level 2
	Level 3
	Benefit of doubt not given
	Noted but no credit given
	Ignore

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
✓	Separates marking points
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

Subject-specific Marking Instructions**INTRODUCTION**

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

The breakdown of Assessment Objectives for GCSE (9-1) in Combined Science B:

	Assessment Objective
AO1	Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.
AO1.1	Demonstrate knowledge and understanding of scientific ideas.
AO1.2	Demonstrate knowledge and understanding of scientific techniques and procedures.
AO2	Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.
AO2.1	Apply knowledge and understanding of scientific ideas.
AO2.2	Apply knowledge and understanding of scientific enquiry, techniques and procedures.
AO3	Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures.
AO3.1	Analyse information and ideas to interpret and evaluate.
AO3.1a	Analyse information and ideas to interpret.
AO3.1b	Analyse information and ideas to evaluate.
AO3.2	Analyse information and ideas to make judgements and draw conclusions.
AO3.2a	Analyse information and ideas to make judgements.
AO3.2b	Analyse information and ideas to draw conclusions.
AO3.3	Analyse information and ideas to develop and improve experimental procedures.
AO3.3a	Analyse information and ideas to develop experimental procedures.
AO3.3b	Analyse information and ideas to improve experimental procedures.

Mark Scheme

November 2020

Question		Answer	Marks	AO element	Guidance
1	(a)	Microwaves have a longer wavelength than light ✓	1	1.1	2 nd box
	(b)	<p>FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 3720 (m/s) award 2 marks</p> <p>Substitution: wave speed = 15×248 ✓</p> <p>wave speed = 3720 (m/s) ✓</p>	1 1	2x2.1	

Question		Answer	Marks	AO element	Guidance
2	(a)	Bulb/lamp/light Switch (Battery) Ammeter Voltmeter ✓✓	2	2x1.2	Two marks for 4 correct, one mark for 2 or 3 correct, zero marks for 1 or 0 correct. DO NOT ALLOW Ammeter
	(b) (i)	A circuit diagram containing a battery connected in series with an ammeter and a switch, ✓ AND A bulb with a voltmeter connected in parallel. ✓  OR ✓✓	2	2x1.2	DO NOT ALLOW gaps in the circuits IGNORE extra/other components
	(ii)	record the initial brightness of bulb, e.g. bright/dim (and readings from ammeter and voltmeter) ✓ add second bulb in parallel and record brightness (and readings from ammeter and voltmeter) ✓	2	2x1.1	
	(iii)	To have a more valid comparison / To ensure his investigation is repeatable/reproducible/accurate ✓	1	3.1a	ALLOW Fair test
	(iv)	Stay the same ✓ Decrease ✓	2	2x1.1	
	(c) (i)	Any one from: Overheating components - hot bulb ✓ Heating of wires and bulbs ✓ Blown/exploded/broken bulb ✓	1	3.3a	
	(ii)	Any one from: Use a heatproof mat ✓ Switch off between readings (to ensure components don't get too hot) ✓ Don't exceed maximum supply voltage to lamps ✓	1	3.3a	

J260/03

Mark Scheme

November 2020

Question		Answer	Marks	AO element	Guidance
3	(a)	circular pattern centred on wire ✓ weaker/lines wider spacing away from wire ✓ anticlockwise direction ✓	3	3 x 1.1	All 3 marks can be scored by drawing on diagram if they explicitly show the three marking points DO NOT ALLOW one circle drawn
	(b)	Increase the current in the wire ✓ Move the pin closer to the wire ✓	2	2 x 2.1	2nd and 5th boxes ticked

J260/03

Mark Scheme

November 2020

Question		Answer	Marks	AO element	Guidance
4	(a)	Transverse ✓ Longitudinal ✓	2	2 x 1.1	ALLOW examples of transverse and longitudinal for each mark
	(b)	observe that it only moves up and down ✓ stays in the same place / is not pushed along the lake by the waves ✓	2	2 x 1.2	
	(c) (i)	Any three from: Measurements How to measure time - method of making sound that can be seen (cymbals, large blocks of wood, firework, flare), measure time (with a stopwatch) from when sound made to return of echo OR clap hands in time with echo and count 'n' times. ✓ How to measure distance e.g. trundle wheel, tape measure. ✓ Accuracy of Measurement MAX one from: A detail of how to measure accurately e.g. Repeat and calculate mean OR use 10 or more echoes (as above) ✓	3	3 x 1.2	ALLOW any method that will work and is suitable Must imply a suitable distance for sound to travel IGNORE metre rule IGNORE detail of ensuring accuracy of distance between sound source and cliff – whether by measuring one two or many times.
	(ii)	(speed =) $\frac{\text{distance travelled by sound}}{\text{time taken}}$ ✓	1	1.1	

J260/03

Mark Scheme

November 2020

Question			Answer	Marks	AO element	Guidance
5	(a)	(i)	$^{14}_6\text{C}$ ✓	1	1.2	last choice ringed
		(ii)	They have different numbers of neutrons ✓	1	1.1	ALLOW they have different mass number DO NOT ALLOW 'more neutrons' or 'less neutrons', because insufficient for different
	(b)		(charge of nucleus) decreases ✓ (mass of nucleus) decreases ✓	2	2 x 1.1	

Question	Answer	Marks	AO element	Guidance
(c)*	<p>Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question.</p> <p>Level 3 (5–6 marks) Detailed explanation as to why shellfish are safe to eat but sheep are not by comparing half-life from the table AND Explanation of contamination and irradiation in the context of the shellfish and the sheep. <i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i></p> <p>Level 2 (3–4 marks) Partial explanation as to why shellfish are safe to eat but sheep are not AND Explanation of contamination and irradiation <i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i></p> <p>Level 1 (1–2 marks) Basic/limited explanation as to why shellfish are safe to eat but sheep are not AND Description of difference between contamination and irradiation OR Uses the table to compare the half-life <i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i></p> <p>0 marks <i>No response or no response worthy of credit.</i></p>	6	1 x 1.1 3 x 3.1b 2 x 3.2a	<p>AO1.1 Demonstrate knowledge and understanding that</p> <ul style="list-style-type: none"> contamination is a greater hazard than irradiation because the source continues to radiate the body from inside demonstrates differences between contamination and irradiation <p>AO3.1b Analyse information and ideas to evaluate</p> <ul style="list-style-type: none"> Both emit gamma radiation Both are made in a reactor Cs 137 has a longer half-life than Co 60 γ rays will kill bacteria γ rays can harm/mutate cells/DNA γ rays can cause cancer Shellfish is irradiated – has not been contaminated with Co 60 Sheep were contaminated by eating grass containing Cs 137 <p>AO3.2a Analyse information and ideas to make judgements</p> <ul style="list-style-type: none"> The Cs 137 inside the body continues to emit radiation for a long time. The Co 60 has not touched the shellfish so a person eating it will not be exposed to radiation from Co 60. (If there were) bacteria on the shellfish (they) will have been killed. The shellfish is safe to eat

Question		Answer	Marks	AO element	Guidance
6	(a)	the gravitational force on the elephant ✓	1	1.1	2 nd box ticked
	(b)	<p>FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 300 000 (J) award 2 marks</p> <p>Substitution: $GPE = \text{weight} \times \text{height} = 60\,000 \times 5$ ✓</p> <p>$GPE = 300\,000 \text{ (J)}$ ✓</p>	2	2 x 2.1	
	(c)	<p>FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 40 (%) award 2 marks</p> <p>Substitution: $\text{efficiency} = \frac{300\,000}{750\,000} \times 100$ ✓</p> <p>$\text{efficiency} = 40 \text{ (%)}$ ✓</p>	2	2 x 2.1	ECF from (b)
	(d)	<p>Dissipated as thermal energy OR dissipated as heat OR lost to the surroundings OR lost as heat OR lost as thermal energy ✓</p>	1	1.1	IGNORE lost unless indicated where energy has been transferred to.

Question		Answer	Marks	AO element	Guidance
7	(a)	Magnetic gravitational ✓	1	3.2a	
	(b) (i)	450 (kN) ✓	1	2.2	
	(ii)	(A straight arrow): pointing in opposite direction to existing arrow ✓ 4.5 squares in length ✓	2	2 x 2.2	ALLOW arrow to start from any point on grid
	(c)	Any 3 from: a force from the ground (upwards on him) ✓ a force from him downwards on the ground ✓ the two forces of the same type ✓ the two forces are equal and in opposite directions ✓ correct idea about Newton's 3 rd law ✓	3	1 x 2.1 2 x 1.1	ALLOW (normal) reaction force DO NOT ALLOW idea that the upward force is the interaction pair to his weight

Question		Answer	Marks	AO element	Guidance
9	(a)	192 (J) ✓	1	2.1	
	(b)	<p>FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 21 (hours) award 3 marks</p> <p>convert 240 W to 0.24 kW OR 5.04 kWh to 5040 Wh ✓</p> <p>rearrange and substitute: time = $5.04 \div 0.24$ OR $5040 \div 240$ ✓</p> <p>time = 21 (hours) ✓</p>	1	1.2	ALLOW before or after calculation
			1	2.1	ALLOW $5.04 \div 240$
			1	2.1	0.021 (hours) i.e. no conversion = 2 marks
	(c)	1 st box = reactor 2 nd box = turbine 3 rd box = generator ✓ ✓	2	2x1.1	three correct = 2 marks two correct = 1 mark zero or one correct = 0 marks

Question		Answer	Marks	AO element	Guidance
10	(a)	transferred to (thermal store of) surroundings ✓ Energy is conserved OR total energy stays the same ✓	2	2x2.1	ALLOW Energy cannot be created or destroyed
	(b) (i)	density = $\frac{\text{mass}}{\text{volume}}$ ✓	1	1.1	centre equation ringed
	(ii)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 0.73 (g/cm³) and to 2sf award 3 marks Substitution: density = $66 \div 90$ ✓ density = 0.7333 (g/cm ³) ✓ density = 0.73 (g/cm ³) ✓ to 2sf	1 1 1	2.1 2.1 1.2	ALLOW value given to 2 or more sf ALLOW ECF incorrect value given to 2sf gets this mark.
	(c)	Jane ✓ (It is the increase in internal energy that increases the temperature of 1kg of a material by 1°C.)	1	3.1a	ALLOW answer on the diagram e.g. ringed or ticked
	(d)	$0.4 \times 2740 \times (20 - 4)$ ✓	1	2.1	3rd answer ticked
	(e)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 81 600 (J) award 3 marks select and apply: energy to cause a change of state = mass × SLH $E = 0.4 \text{ kg} \times 204 \text{ kJ}$ ✓ = 81.6 kJ = 81 600 (J) ✓	1 1 1	2.1 2.1 1.2	ALLOW 0.4 x 204 000

Question			Answer	Marks	AO element	Guidance
11	(a)	(i)	<p>FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 4.5×10^5 (J) in standard form award 4 marks</p> <p>Recall Work done (energy transferred) = force \times distance ✓ $= 9000 \text{ N} \times 50 \text{ m}$ ✓ $= 450\,000 \text{ (J)}$ ✓ $= 4.5 \times 10^5 \text{ (J)}$ ✓</p>	1 1 1 1	1.1 2.1 2.1 1.2	<p>ALLOW GPE=weight\timesheight ALLOW GPE=mass\timesg\timesheight OR mgh</p>
		(ii)	<p>FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 30000 (W) award 3 marks</p> <p>Recall Power = Energy transferred \div time ✓ $= 450\,000 \text{ J} \div 15 \text{ s}$ ✓ $= 30000 \text{ (W)}$ ✓</p>	1 1 1	1.1 2.1 2.1	<p>ECF from (a)(i)</p> <p>ALLOW 30 kW</p>
	(b)		<p>Rate Mechanically Kinetic Thermal ✓ ✓</p>	1 1	1.1 2.1	<p>Four correct = 2 marks Three or Two correct = 1 mark One or none correct = 0 marks</p>

Question			Answer	Marks	AO element	Guidance
12	(a)	(i)	Both points plotted to within ± 0.5 small square ✓	1	2.2	Points are: (1.4, 8) and (1.8, 11)
		(ii)	Suitable straight line of best fit through most of the points ✓	1	2.2	ALLOW points as plotted by candidate
		(iii)	Current is (directly) proportional to potential difference/pd/voltage OR the relationship is linear ✓	1	3.1a	ALLOW component is linear IGNORE just they both increase / as one increases so does the other
		(iv)	(fixed) resistor ✓	1	2.1	ALLOW resistance (wire) or Ohmic conductor
		(v)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 160 OR 170 (Ω) award 4 marks Read current = 12 mA from graph ✓ Convert mA to A: Resistance = $12 \text{ mA} = 12 \times 10^{-3} \text{ A}$ ✓ Rearrange equation and substitute: Resistance = $2.0 \text{ V} \div 12 \times 10^{-3} \text{ A}$ ✓ = 160 or 170 (Ω) ✓	1 1 1 1	2.2 1.2 2.1 2.1	ALLOW current = 11.8 – 12.2 mA ECF from line drawn on graph ALLOW 3 marks for correct calculation with no conversion = 0.16 or 0.17 (Ω) ALLOW 2 marks for substitution with an incorrect or no conversion and incorrect or no evaluation, e.g. for Resistance = $2.0 \div 12$ ALLOW answers of more than 2 s.f. that round to 160 or 170
	(b)	(i)	Current is not (directly) proportional to potential difference/pd/voltage OR the relationship is non-linear ✓	1	3.1a	ALLOW component is non-linear ALLOW description of what the graph shows e.g.: No current when p.d. negative AND then current increases as p.d. increases OR No current when potential difference less than 0.5 V AND then current increases as p.d. increases
		(ii)	To allow current to pass in only one direction ✓	1	3.2b	ALLOW convert a.c. to d.c.
