General Certificate of Secondary Education

Mark Scheme for June 2019

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

Mark Scheme

June 2019

Annotations available in RM Assessor

Annotation	Meaning
	Correct response
	Incorrect response
	Omission mark
	Benefit of doubt given
	Contradiction
	Rounding error
	Error in number of significant figures
	Error carried forward
	Level 1
	Level 2
	Level 3
	Benefit of doubt not given
	Noted but no credit given
	Ignore

J260/07

Mark Scheme

June 2019

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
✓	Separates marking points
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

Subject-specific Marking Instructions**INTRODUCTION**

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

June 2019

The breakdown of Assessment Objectives for GCSE (9-1) in Combined Science B:

	Assessment Objective
AO1	Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.
AO1.1	Demonstrate knowledge and understanding of scientific ideas.
AO1.2	Demonstrate knowledge and understanding of scientific techniques and procedures.
AO2	Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.
AO2.1	Apply knowledge and understanding of scientific ideas.
AO2.2	Apply knowledge and understanding of scientific enquiry, techniques and procedures.
AO3	Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures.
AO3.1	Analyse information and ideas to interpret and evaluate.
AO3.1a	Analyse information and ideas to interpret.
AO3.1b	Analyse information and ideas to evaluate.
AO3.2	Analyse information and ideas to make judgements and draw conclusions.
AO3.2a	Analyse information and ideas to make judgements.
AO3.2b	Analyse information and ideas to draw conclusions.
AO3.3	Analyse information and ideas to develop and improve experimental procedures.
AO3.3a	Analyse information and ideas to develop experimental procedures.
AO3.3b	Analyse information and ideas to improve experimental procedures.

Mark scheme

June 2019

Question		Answer	Marks	AO element	Guidance
2	(a)	<p>Safety (max. 2 from): Don't boil the liquid OR Suggestion of sensible max temperature. ✓ Take care not to touch hot parts ✓ Allow apparatus to cool before dismantling ✓</p> <p>Measurements (max. 2 from): Measure initial and final temperature of liquid/oil/water ✓ Measure mass of liquid/oil/water ✓ Record energy on joulemeter ✓ Stir before taking temperature readings ✓</p>	3	1.2 x 3	<p>ALLOW goggles or other sensible safety precaution e.g. heat proof gloves IGNORE gloves unqualified, apron</p> <p>IGNORE measure temperature IGNORE measure temperature difference</p> <p>ALLOW measure energy used ALLOW measure time to heat and power of heater ALLOW measure time to heat, p.d. and current in heater.</p> <p>ALLOW one mark (in measurements) for idea of substitution of measurements in the specific heat capacity equation</p>
	(b)	<p>FIRST CHECK ANSWER ON ANSWER LINE If answer = 2.05 (kJ/kg °C)</p> <p>$(1.94 + 2.23 + 1.98) / 3$ ✓ $= 2.05$ (kJ/kg °C) ✓</p>	2	1.2 x 2	<p>ALLOW any answer that rounds to 2.05</p> <p>ALLOW one mark for 1.96 if 2.23 is explicitly identified as an outlier</p>
	(c)	<p>(accurate value is) lower ✓</p> <p>(Because) energy is required to heat up apparatus and/or surroundings ✓</p> <p>Lag the container OR add a lid ✓</p>	3	3.1a 3.1b 3.3b	<p>ECF ORA</p> <p>ALLOW only improvements that reduce the energy transfer to apparatus/surroundings</p>

Question		Answer	Marks	AO element	Guidance
3	*	<p>Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question.</p> <p>Level 3 (5–6 marks) Interprets the charts to describe trends in detail. AND Gives an explanation for the trends including a reference to renewables and coal.</p> <p><i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i></p> <p>Level 2 (3–4 marks) Interprets the charts to describe a trend in detail.</p> <p>OR</p> <p>Gives an explanation for the trend in renewables and coal.</p> <p>OR</p> <p>States a basic trend shown in the charts and explain a trend by referring to either coal decreasing or renewables increasing.</p> <p><i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i></p> <p>Level 1 (1–2 marks) States a basic trend shown in the charts OR Explains a trend by referring to either coal decreasing or renewables increasing.</p>	6	3.1a x 4 2.1 x 2	<p>AO3.1a Analyse information and ideas to interpret For example: Basic trend:</p> <ul style="list-style-type: none"> coal use has fallen gas use not much changed /no clear trend /up and down nuclear not much changed /no clear trend /up and down renewables increased other and oil not much changed /no clear trend /up and down/unchanged overall quoting data e.g. coal from 36.5% to 22.0% <p>More detail:</p> <ul style="list-style-type: none"> coal use falling every year renewables increasing every year the increase in renewables is increasing every year using data for coal e.g. coal fell by $(36.5 - 22.0 =) 14.5\%$ using data for renewables <p>AO2.1 Application of knowledge and understanding For example: Explains that:</p> <ul style="list-style-type: none"> coal/gas result in CO₂ emissions which cause global warming coal fired power stations / mines are being closed coal fired stations produce SO₂ nuclear does not cause CO₂ emissions renewables increasingly used as more sustainable

June 2019

Question			Answer	Marks	AO element	Guidance
4	(a)	(i)	An induced magnet becomes a magnet in a magnetic field. A permanent magnet keeps its magnetism when it is not in a magnetic field/has its own magnetic field always ✓	1	1.1	Both statements required for the mark ALLOW an induced magnet has temporary magnetism but a permanent always has its magnetism.
		(ii)	1. they attract 2. they repel ✓	1	1.1	Both required for the mark AW applies to both
		(iii)	Field is stronger near the poles ✓ Field direction is from north to south ✓	2	1.1x2	This can be in words (even if nothing on diagram) OR by field pattern showing lines closer together [or by labels e.g. 'field stronger here'] at poles and arrowheads on field lines (even if no words). ALLOW for poor drawing skills i.e. words take priority e.g. allow If field lines parallel and words say 'stronger at poles' e.g. allow if arrow heads contradict each other and words say N to S. DO NOT ALLOW if arrowheads contradict (even if words correct) IGNORE crossing field lines
	(b)		(The metal bar in the boat) is a permanent magnet ✓ The Earth's magnetic field is in the direction left to right or right to left ✓ OR (Magnet) lines up with Earth's magnetic field ✓	2	3.2bx2	ALLOW bar magnet for permanent magnet ALLOW (magnetic) north/south is to right/left
	(c)		(The core of the Earth) is a permanent magnet. ✓	1	1.1	ALLOW the Earth behaves as if it has a bar magnet (at the centre/core). ALLOW (the core) creates/has a magnetic field

J260/07

Mark scheme

June 2019

Question		Answer	Marks	AO element	Guidance
5	(a)	The number of waves/cycles/oscillations (made by the source) each second ✓	1	1.1	ALLOW vibration for oscillation
	(b)	<p>(i) FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 4.4×10^{-4} (m) award 4 marks</p> <p>Substitution $1540 \text{ m/s} = 3.5\text{MHz} \times \lambda$ ✓</p> <p>Conversion $3.5 \text{ MHz} = 3.5 \times 10^6 \text{ (Hz)}$ ✓</p> <p>Rearrangement $\lambda = 1540 \div (3.5 \times 10^6)$ ✓</p> <p>Answer in standard form = $4.4 \times 10^{-4} \text{ (m)}$ ✓</p>	4	1.2 1.2 2.1x2	<p>Answer in standard form = $4.4 \times 10^x \text{ (m)}$ where x is not -4 from incorrect conversion scores 3 marks.</p> <p>DO NOT ALLOW 0.00044 (m)</p>
		<p>(ii) Centre of one reflection i.e.99 (µs) OR 44(µs) correctly identified ✓ $[99 - 44] = 55 \text{ (µs)}$ ✓</p>	2	2.2x2	<p>ALLOW for 44 (µs) value in range 42 to 46 (µs) ALLOW for 99(µs) value in range 97 to 101 (µs) ALLOW for 55 (µs) value in range 51 to 59(µs) Delay in correct range with no working scores 2 marks</p>
		<p>(iii) FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 0.042 (m) or 0.043 (m) award 5 marks</p> <p>Recall speed = distance ÷ time ✓</p> <p>Substitution $1540 \text{ m/s} = \text{distance} \div 55 \text{ (µs)}$ ✓</p> <p>Conversion $55 \text{ µs} = 55 \times 10^{-6} \text{ (s)}$ ✓</p> <p>Rearrangement and evaluation $\text{distance} = 1540 \times 55 \times 10^{-6} = 0.0847 \text{ (m)}$ ✓</p> <p>Recognition that distance travelled by reflected beam from B is = 2 x distance AB greater than the reflected beam from A so = 0.042 (m) ✓</p>	5	1.2 2.1 1.2 2.1 2.1	<p>ALLOW other methods such as working out distance travelled by wave reflected at A and wave reflected at B and subtracting ALLOW any subject of the equation</p> <p>ECF time from 5bii [51(µs) gives 0.0393 (m);59(µs) gives 0.0454 (m)] Answer from incorrect conversion can score max 4 marks</p> <p>ALLOW 0.085 (m)</p> <p>ALLOW answers that round to 0.042 or 0.43(m) ALLOW an independent mark for recognition that the distance should be halved, i.e. award this mark if candidate has halved their distance or time but not both</p>

Question			Answer	Marks	AO element	Guidance
6	(a)	(i)	Top line 237 ✓ Bottom line 93 ✓	2	1.2 x 2	
		(ii)	For e: top 0 and bottom -1 ✓ For Sm: top line 147 ✓ For Sm: bottom line 62 ✓	3	1.1 1.2x2	Both required for this mark
	(b)		Idea that Pm-147 emits β AND Am-241 emits α ✓ Idea that radiation from Am-241/alpha radiation will be completely absorbed/stopped ✓ Idea that radiation from Pm-147/beta radiation will be only partially absorbed/stopped (depending on thickness) ✓	3	2.1x3	DO NOT ALLOW Pm-147 without some attempt at valid explanation ALLOW no alpha will get through Only award this mark if Pm-147 is the chosen isotope ALLOW some beta will get through.
	(c)		To avoid irradiation of people AW ✓ Because it is ionising radiation OR damages cells/tissues/DNA OR can cause cell mutation ✓	2	2.1x2	IGNORE avoid harming/damaging/killing people IGNORE causes cancer / causes radiation poisoning

Question			Answer	Marks	AO element	Guidance
7	(a)	(i)	<p>FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 70 (m) award 4 marks</p> <p>Recall work done = force \times distance \checkmark</p> <p>Substitution $4.6 \times 10^7 = 2.3 \times 10^5 \times s \checkmark$</p> <p>Rearrangement and evaluation $s = 4.6 \times 10^7 \div 2.3 \times 10^5 = 200 \text{ (m)} \checkmark$</p> <p>$d = 200 - 130 = 70 \text{ (m)} \checkmark$</p>	4	1.2 2.1x3	<p>ALLOW any subject of the equation</p> <p>ALLOW an independent mark for recognition that the distance d is their value of s minus 130, as long as $s > 130$ and d correctly calculated</p>
		(ii)	<p>(Energy transferred) from kinetic (energy store of train) \checkmark</p> <p>to thermal energy (store) of brakes/train/surroundings \checkmark</p>	2	1.1 x 2	<p>ALLOW of air/tunnel walls IGNORE sound</p>
	(b)		<p>FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 360 000 (N) award 5 marks</p> <p>Calculation $KE = (\frac{1}{2} \times 280\,000 \times 12^2) = 2.016 \times 10^7 \text{ (J)} \checkmark$</p> <p>$KE = \text{work done by force} \checkmark$</p> <p>Recall and rearrange work done = force \times distance \checkmark</p> <p>force = $2.016 \times 10^7 \div 56 \checkmark$</p> <p>force = 360 000 (N) \checkmark</p>	5	2.1 1.1 1.2 2.1 2.1	<p>ALLOW answers with more sf that round correctly to this value. ALLOW answers in standard form or using prefixes</p> <p>ALLOW if $KE = 2.016 \times 10^7 \text{ (J)}$ seen anywhere in response</p> <p>ALLOW $\frac{1}{2} \times 280\,000 \times 12^2$ for 2.016×10^7 ECF wrong value of KE</p>
	(c)		The KE of the trains is transferred by heating (and the	2	1.1
