# **Mark Scheme**

2007 examination - January series

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available to download from the AQA Website: www.aqa.org.uk

#### COPYRIGHT

AQA retains the copyright on all its publications. However, registered centres for AQA are permitted to copy material from this booklet for their own internal use, with the following important exception: AQA cannot give permission to centres to photocopy any material that is acknowledged to a third party even for internal use within the centre.

Set and published by the Assessment and Qualifications Alliance.

М	mark is for method					
m or dM	mark is dependent on one or more M marks and is for method					
Α	mark is dependent on M or m marks and is for accuracy					
В	mark is independent of M or m marks and is for method and accuracy					
Е	mark is for explanation					
or ft or F	follow through from previous					
	incorrect result	MC	mis-copy			
CAO	correct answer only	MR	mis-read			
CSO	correct solution only	RA	required accuracy			
AWFW	anything which falls within	$\mathbf{F}\mathbf{W}$	further work			
AWRT	anything which rounds to	ISW	ignore subsequent work			
ACF	any correct form	FIW	from incorrect work			
AG	answer given	BOD	given benefit of doubt			
SC	special case	WR	work replaced by candidate			
OE	or equivalent	FB	formulae book			
A2,1	2 or 1 (or 0) accuracy marks	NOS	not on scheme			
-x EE	deduct <i>x</i> marks for each error	G	graph			
NMS	no method shown	С	candidate			
PI	possibly implied	Sf	significant figure(s)			
SCA	substantially correct approach	Dp	decimal place(s)			

#### Key to mark scheme and abbreviations used in marking

#### No Method Shown

Where the question specifically requires a particular method to be used, we must usually see evidence of use of this method for any marks to be awarded. However, there are situations in some units where part marks would be appropriate, particularly when similar techniques are involved. Your Principal Examiner will alert you to these and details will be provided on the mark scheme.

Where the answer can be reasonably obtained without showing working and it is very unlikely that the correct answer can be obtained by using an incorrect method, we must award **full marks**. However, the obvious penalty to candidates showing no working is that incorrect answers, however close, earn **no marks**.

Where a question asks the candidate to state or write down a result, no method need be shown for full marks.

Where the permitted calculator has functions which reasonably allow the solution of the question directly, the correct answer without working earns **full marks**, unless it is given to less than the degree of accuracy accepted in the mark scheme, when it gains **no marks**.

Otherwise we require evidence of a correct method for any marks to be awarded.

Q	Solution	Marks	Total	Comments			
1(a)	Mean $(\overline{x}) = 39.3$ to 39.4	B1		AWFW (39.35)			
	Standard Deviation $(s_n, s_{n-1})$ = 12.3 to 12.7	B2	3	AWFW (12.358 or 12.679)			
	If <b>neither</b> correct <b>but</b> working shown, then			$\sum x = 787  \sum x^2 = 34023$			
	Mean $(\overline{x}) = \frac{\sum x}{20}$	(M1)		Used			
(b)	Median = 42	B2		САО			
	Median = 41.5 or 39 or 40	(B1)		CAO			
	Interquartile Range = $55 - 31 = 24$	B2	4	CAO; allow B1 for identification of 31 and 55; B0 if method shown is incorrect			
	Interquartile Range = $21$ to $27$	(B1)		AWFW			
(c)(i)	<b>Mode:</b> eg Does not exist If exists, must be > 60 or 58 All / too many different values Sparse data	B1		OE			
(ii)	<b>Range:</b> eg <b>Maximum value</b> is unknown / > 60 or 58	B1	2	OE; accept 'slowest' but not 'smallest'			
		Total	9				

2	Solution	Marks	Total	Comments
2(a)	Use of binomial in (a), (b) or (c)	M1		Can be implied
	$P(E=5) = {\binom{16}{5}} (p)^5 (1-p)^{11}$	M1		Allow $p = 0.45, 0.25, 0.30$ or $\frac{1}{3}$
	= 0.112	A1	3	AWRT (0.1123)
b)(i)	B(50, 0.25)	B1		Used; can be implied
	$P(C \le 12) = 0.511$	B1	2	AWRT (0.5110)
(ii)	P(10 < B' < 20) = 0.9152  or  0.9522	M1		Allow 3 dp accuracy
	minus 0.0789 or 0.1390	M1		Allow 3 dp accuracy
	= 0.836	A1	3	AWRT (0.8363)
	or B(50, 0.30) expressions stated for at least 3 terms within $10 \le B' \le 20$	(M1)		Or implied by a correct answer
	Answer = 0.836	(A2)		AWRT
(c)	n = 40, p = 0.7	B1		Both used; can be implied
	Mean $\mu = np = 28$	B1√		CAO; $$ on <i>p</i> only
	Variance $\sigma^2 = np(1-p) = 8.4$	M1		Use of $np(1-p)$ even if SD
	Standard deviation = $\sqrt{8.4}$ or = 2.89 to 2.9	A1	4	CAO; AWFW
	Total		12	

2	Solution	Marks	Total	Comments
3(a)	$0.5 \le \text{Value} \le 0.95$	B2		Value is actually 0.8
	Positive value < 1 (and > 0)	(B1)		
(b)	$-0.2 \leq \text{Value} \leq +0.2$	B1		Value is actually 0.0
(c)	$-0.95 \le \text{Value} \le -0.5$	B2	5	Value is actually –0.7
	Negative value $> -1$ (and $< 0$ )	(B1)		
	Total		5	
<b>4(a)</b>	$90\% \implies z = 1.64$ to $1.65$	B1		AWFW (1.6449)
	or			
	$90\% \implies t = 1.66 \text{ to } 1.67$	(B1)		AWFW (1.6649)
	(Knowledge of the <i>t</i> -distribution is <b>not</b>			
	required in this unit)			
	CI for $\mu$ is $\overline{x} \pm (z \operatorname{or} t) \times \frac{(s_{n-1} \operatorname{or} s_n)}{\sqrt{n}}$	M1		Used; must have $\sqrt{n}$ with $n > 1$
	$\sqrt{n}$			
	Thus			
	$184 \pm (1.6449 \text{ or } 1.6649) \times \frac{(32 \text{ or } 32.2)}{(\sqrt{78} \text{ or } \sqrt{77})}$	A1√		on <i>z</i> or <i>t</i> only
	Hence $184 \pm (5.94 \text{ to } 6.13)$			
	or $\pounds 184 \pm \pounds 6$			
	or (£178, £190)	A1	4	AWRT; ignore units
(b)(i)	Likely to be valid	B1		Accept 'valid' or equivalent
(ii)	Different plays have different:			
()	programme prices, sales, marketing, etc	DI		
	theatre or audience sizes, etc	B1		
	popularity, artists, etc			
	so	↑Dep↑		
	Unlikely to be valid	B1	3	Accept 'not valid' or equivalent
	Total		7
