

Edexcel Maths S2

Past Paper Pack

2005-2013

- (a) Calculate the value of n .

The expected number of people with green eyes in a second random sample is 3.

- (b) Find the standard deviation of the number of people with green eyes in this second sample.

(4)

- (a) State two conditions under which a Poisson distribution is a suitable model for X . (2)

(b) a randomly chosen page has no misprints, (2)

- (c) the total number of misprints on 2 randomly chosen pages is more than 7. (3)

(d) Using a suitable approximation find, to 2 decimal places, the probability that the chapter will contain less than 40 misprints.

(a) a sampling unit, (1)

(b) a sampling frame,

(1)

(c) a sampling distribution. (2)

(Total 4 marks)

Q4

- $$f(x) = \begin{cases} k(4x - x^3), & 0 \leq x \leq 2, \\ 0, & \text{otherwise,} \end{cases}$$

(a) Show that $k = \frac{1}{4}$.

(4)

(b) $E(X)$,

(3)

- (3)**

- (4)

- (2)

- (2)

- A random sample of 10 patients with depression is taken from a doctor's records.

- (2)**

(b) find the probability that the treatment will be successful for exactly 6 patients.

(2)

(c) Stating your hypotheses clearly, test, at the 5% level of significance, the doctor's belief.

(6)

- (d) From a sample of size 20, find the greatest number of patients who need to recover for the test in part (c) to be significant at the 1% level.

(4)

[illegible]

In the boxes above, write your centre number, candidate number, your surname, initial(s) and signature.

Check that you have the correct question paper.

You must write your answer for each question in the space following the question.

Values from the statistical tables should be quoted in full. When a calculator is used, the answer should be given to an appropriate degree of accuracy.

A booklet 'Mathematical Formulae and Statistical Tables' is provided.

Full marks may be obtained for answers to ALL questions.

Marks for individual questions and parts of questions are shown in round brackets: e.g. (2).

There are 7 questions in this question paper.

The total for this question paper is 75.

There are 24 pages in this question paper. Any blank pages are indicated.

You must ensure that your answers to parts of questions are clearly labelled.

You must show sufficient working to make your methods clear to the examiner. Answers without working may gain no credit.

1. Before introducing a new rule the secretary of a golf club decided to find out how members might react to this rule.

(a) Explain why the secretary decided to take a random sample of club members rather than ask all the members.

(1)

(b) Suggest a suitable sampling frame.

(1)

(c) Identify the sampling units.

(1)

Q1

(Total 3 marks)

N 2 2 3 3 8 A 0 3 2 4

- Find

$$(a) \quad P(L < -2.6), \quad (1)$$

(b) $P(L < -3.0 \text{ or } L > 3.0)$.

(c) Find the probability that more than half of them were within 3.0 mm of the target length. (4)

- (4)

(7)

- A random sample of 10 mugs was taken from the production line.

- (b) Find the probability that there were exactly 3 green mugs in the sample. (3)

A random sample of 125 mugs was taken.

- (c) Find the probability that there were between 10 and 13 (inclusive) green mugs in this sample, using

- (i) a Poisson approximation, (3)

- (ii) a Normal approximation. (6)

$$f(x) = \begin{cases} \frac{1+x}{k}, & 1 \leq x \leq 4, \\ 0, & \text{otherwise.} \end{cases}$$

- (a) Show that $k = \frac{21}{2}$. (3)
- (b) Specify fully the cumulative distribution function of X . (5)
- (c) Calculate $E(X)$. (3)
- (d) Find the value of the median. (3)
- (e) Write down the mode. (1)
- (f) Explain why the distribution is negatively skewed. (1)

- (c) Test, at the 10% level of significance, whether or not there is evidence that the proportion of bowls with defects has decreased. State your hypotheses clearly. (7)

1. (a) Define a statistic.

(2)

A random sample X_1, X_2, \dots, X_n is taken from a population with unknown mean μ .

- (b) For each of the following state whether or not it is a statistic.

(i) $\frac{X_1 + X_4}{2},$

(1)

(ii) $\frac{\sum X^2}{n} - \mu^2.$

(1)

Q1

(Total 4 marks)

2. The random variable J has a Poisson distribution with mean 4.

(a) Find $P(J \geq 10)$.

(2)

The random variable K has a binomial distribution with parameters $n = 25$, $p = 0.27$.

(b) Find $P(K \leq 1)$.

(3)

Q2

(Total 5 marks)

- Calculate the probability that this batch contains

- (b) more plants with white flowers than coloured ones. (2)

(c) Find the probability that exactly 3 of these batches contain more plants with white flowers than coloured ones. (3)

(d) Use a suitable approximation to calculate the probability that a batch of 50 plants contains more than 25 plants with white flowers.

(7)

4. (a) State the condition under which the normal distribution may be used as an approximation to the Poisson distribution. (1)

(b) Explain why a continuity correction must be incorporated when using the normal distribution as an approximation to the Poisson distribution.

(1)

A company has yachts that can only be hired for a week at a time. All hiring starts on a Saturday.

During the winter the mean number of yachts hired per week is 5.

(c) Calculate the probability that fewer than 3 yachts are hired on a particular Saturday in winter. (2)

During the summer the mean number of yachts hired per week increases to 25.

The company has only 30 yachts for hire.

(d) Using a suitable approximation find the probability that the demand for yachts cannot be met on a particular Saturday in the summer. (6)

In the summer there are 16 Saturdays on which a yacht can be hired.

(e) Estimate the number of Saturdays in the summer that the company will not be able to meet the demand for yachts.

(2)

Leave
blank

Question 4 continued

Q4

(Total 12 marks)

- (a) Write down the probability density function of X , for all x . (2)

- (b) Given that $E(X) = 2$ and $P(X < 3) = \frac{5}{8}$ find the value of α and the value of β . (4)

$$(c) \ E(X), \tag{1}$$

- (d) the standard deviation of X ,
- (2)**

- (e) the probability that the shorter piece of wire is at most 30 cm long. (3)

- (c) Write down the significance level of this test. (1)

$$F(x) = \begin{cases} 0, & x < 0, \\ 2x^2 - x^3, & 0 \leq x \leq 1, \\ 1, & x > 1. \end{cases}$$

- (a) Find $P(X > 0.3)$. (2)
- (b) Verify that the median value of X lies between $x = 0.59$ and $x = 0.60$. (3)
- (c) Find the probability density function $f(x)$. (2)
- (d) Evaluate $E(X)$. (3)
- (e) Find the mode of X . (2)
- (f) Comment on the skewness of X . Justify your answer. (2)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

1. A string AB of length 5cm is cut, in a random place C , into two pieces. The random variable X is the length of AC .
- (a) Write down the name of the probability distribution of X and sketch the graph of its probability density function. (3)
- (b) Find the values of $E(X)$ and $\text{Var}(X)$. (3)
- (c) Find $P(X > 3)$. (1)
- (d) Write down the probability that AC is 3 cm long. (1)

- (7)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- 25% are 5p coins.

Find the sampling distribution for the median of the values of the 3 selected coins.

(7)

[illegible]

- (2)

(2)

- (3)

(3)

- (2)

- Test, at the 5% level of significance, whether or not there is evidence of an increase in the proportion of times the taxi is late. State your hypotheses clearly.

(7)

- (c) Find the expected profit made by the factory per day. (3)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

8. The continuous random variable X has probability density function given by

$$f(x) = \begin{cases} \frac{1}{6}x & 0 < x \leq 3 \\ 2 - \frac{1}{2}x & 3 < x < 4 \\ 0 & \text{otherwise} \end{cases}$$

- (a) Sketch the probability density function of X . (3)
- (b) Find the mode of X . (1)
- (c) Specify fully the cumulative distribution function of X . (7)
- (d) Using your answer to part (c), find the median of X . (3)

1. (a) Explain what you understand by a census.

(1)

Each cooker produced at GT Engineering is stamped with a unique serial number. GT Engineering produces cookers in batches of 2000. Before selling them, they test a random sample of 5 to see what electric current overload they will take before breaking down.

- (b) Give one reason, other than to save time and cost, why a sample is taken rather than a census.

(1)

- (c) Suggest a suitable sampling frame from which to obtain this sample.

(1)

- (d) Identify the sampling units.

(1)

Q1

(Total 4 marks)

- (b) more than 3 faulty bolts. (2)

(c) Find the probability that exactly 6 of these bags contain more than 3 faulty bolts. (3)

[illegible]

- (2)

(5)

(4)

$$F(y) = \begin{cases} 0 & y < 1 \\ k(y^4 + y^2 - 2) & 1 \leq y \leq 2 \\ 1 & y > 2 \end{cases}$$

- (a) Show that $k = \frac{1}{18}$. (2)
- (b) Find $P(Y > 1.5)$. (2)
- (c) Specify fully the probability density function $f(y)$. (3)

- Test Dhriti's claim at the 5% level of significance. State your hypotheses clearly.

(7)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- (10)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- (ii) a critical region.

(b) Find the critical region for a two-tailed test of the hypothesis that the number of incoming calls occurs at a rate of 0.45 per 1 minute interval. The probability in each tail should be as close to 2.5% as possible.

(c) Write down the actual significance level of the above test.

In the school holidays, 1 call occurs in a 10 minute interval.

- (d) Test, at the 5% level of significance, whether or not there is evidence that the rate of incoming calls is less during the school holidays than in term time.

(5)

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

8. The continuous random variable X has probability density function $f(x)$ given by

$$f(x) = \begin{cases} 2(x-2) & 2 \leq x \leq 3 \\ 0 & \text{otherwise} \end{cases}$$

- (a) Sketch $f(x)$ for all values of x . (3)

- (b) Write down the mode of X . (1)

Find

- (c) $E(X)$, (3)

- (d) the median of X . (4)

- (e) Comment on the skewness of this distribution. Give a reason for your answer. (2)

- (a) Find the mean and variance of the time Jean spends in the post office queue. (3)

- (b) Find the probability that Jean does not have to wait more than 2 minutes. (2)

(c) Find the probability that she never has to wait more than 2 minutes. (2)

Given that Jean has already been queuing for 5 minutes,

- (d) find the probability that she must leave the post office queue without being served. (3)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- (7)

- Given that

$$H_0 : \lambda = 9, \quad H_1 : \lambda \neq 9$$

- (3)

- (2)

This image shows a full page of white paper with horizontal blue or grey ruling lines, typical of notebook paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- A cell is chosen at random.

- (b) Find the mean and variance of the number of damaged genes in the cell. (2)

- (c) Using a suitable approximation, find the probability that there are at most 2 damaged genes in the cell. (4)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- (a) State the distribution to model the number of times the coin shows a head.

Find the probability that Sue records

- (2)

- (2)

(d) Test Sue's belief at the 1% level of significance. State your hypotheses clearly.

(6)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- (c) Test, at the 5% level of significance, whether or not there is evidence to support the suggestion that the rate at which the agent handles calls has increased. State your hypotheses clearly.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

$$f(x) = \begin{cases} \frac{1}{2}x & 0 \leq x < 1 \\ kx^3 & 1 \leq x \leq 2 \\ 0 & \text{otherwise} \end{cases}$$

(a) Show that $k = \frac{1}{5}$ (4)

(b) Calculate the mean of X . (4)

(c) Specify fully the cumulative distribution function $F(x)$. (7)

(d) Find the median of X . (3)

(e) Comment on the skewness of the distribution of X . (2)

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer ALL the questions.

You must write your answer for each question in the space following the question.

Values from the statistical tables should be quoted in full. When a calculator is used, the answer should be given to an appropriate degree of accuracy.

Information for Candidates

A booklet 'Mathematical Formulae and Statistical Tables' is provided.

Full marks may be obtained for answers to ALL questions.

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2).

There are 7 questions in this question paper. The total mark for this paper is 75.

There are 24 pages in this question paper. Any blank pages are indicated.

Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled.

You should show sufficient working to make your methods clear to the Examiner.

Answers without working may not gain full credit.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins or other markings on the paper.

-
- This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire width, providing a guide for handwriting or typing. The paper itself is a clean, off-white color.

- (2)

- $$f(t) = \begin{cases} kt & 0 \leq t \leq 10 \\ 0 & \text{otherwise} \end{cases}$$

- (d) Write down the mode of the distribution of T . **(1)**

(e) Sketch the graph of a more suitable probability density function for T . (1)

- [illegible]

6. A web server is visited on weekdays, at a rate of 7 visits per minute. In a random one minute on a Saturday the web server is visited 10 times.

(a) (i) Test, at the 10% level of significance, whether or not there is evidence that the rate of visits is greater on a Saturday than on weekdays. State your hypotheses clearly.

(ii) State the minimum number of visits required to obtain a significant result. (7)

(b) State an assumption that has been made about the visits to the server. (1)

In a random two minute period on a Saturday the web server is visited 20 times.

(c) Using a suitable approximation, test at the 10% level of significance, whether or not the rate of visits is greater on a Saturday. (6)

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire surface, typical of notebook or school paper. The lines are uniform in thickness and color, providing a guide for writing without distracting from the content. There are no margins, text, or other markings present.

$$f(x) = \begin{cases} -\frac{2}{9}x + \frac{8}{9} & 1 \leq x \leq 4 \\ 0 & \text{otherwise} \end{cases}$$

- (3)

- (2)

- (6)

(2)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Leave
blank**Question 7 continued**

- (a) Find the probability of no more than 6 red counters in this sample.

(b) Using a Poisson approximation, estimate the probability that the total number of red counters in the combined sample of size 60 is less than 13.

(3)

- Stating your hypotheses clearly and using a 5% level of significance, test whether or not there has been a decrease in the number of deformed red blood cells in Emily's blood.

3. A random sample X_1, X_2, \dots, X_n is taken from a population with unknown mean μ and unknown variance σ^2 . A statistic Y is based on this sample.

(a) Explain what you understand by the statistic Y .

(2)

(b) Explain what you understand by the sampling distribution of Y .

(1)

(c) State, giving a reason which of the following is **not** a statistic based on this sample.

(i) $\sum_{i=1}^n \frac{(X_i - \bar{X})^2}{n}$ (ii) $\sum_{i=1}^n \left(\frac{X_i - \mu}{\sigma} \right)^2$ (iii) $\sum_{i=1}^n X_i^2$

(2)

- (c) Comment on this finding in the light of your critical region found in part (a). (2)

Leave
blank**Question 4 continued****Q4****(Total 8 marks)**

M 3 4 2 8 0 A 0 9 2 4

- (3)

(b) Use a suitable approximation to calculate the probability that the report is accepted. (7)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- (a) Find $P(A > 3)$.

(1)

- (2)

The cumulative distribution function of Y is

$$F(y) = \begin{cases} 0 & y < 0 \\ \frac{y^3}{125} & 0 \leq y \leq 5 \\ 1 & y > 5 \end{cases}$$

- (2)

- (2)

- (1)

- (3)

[illegible]

7.

Figure 1

Figure 1 shows a sketch of the probability density function $f(x)$ of the random variable X . The part of the sketch from $x = 0$ to $x = 4$ consists of an isosceles triangle with maximum at $(2, 0.5)$.

(a) Write down $E(X)$.

(1)

The probability density function $f(x)$ can be written in the following form.

$$f(x) = \begin{cases} ax & 0 \leq x < 2 \\ b - ax & 2 \leq x \leq 4 \\ 0 & \text{otherwise} \end{cases}$$

(b) Find the values of the constants a and b .

(2)

(c) Show that σ , the standard deviation of X , is 0.816 to 3 decimal places.

(7)

(d) Find the lower quartile of X .

(3)

(e) State, giving a reason, whether $P(2 - \sigma < X < 2 + \sigma)$ is more or less than 0.5

(2)

8. A cloth manufacturer knows that faults occur randomly in the production process at a rate of 2 every 15 metres.

(a) Find the probability of exactly 4 faults in a 15 metre length of cloth. (2)

(b) Find the probability of more than 10 faults in 60 metres of cloth. (3)

A retailer buys a large amount of this cloth and sells it in pieces of length x metres. He chooses x so that the probability of no faults in a piece is 0.80

(c) Write down an equation for x and show that $x = 1.7$ to 2 significant figures. (4)

The retailer sells 1200 of these pieces of cloth. He makes a profit of 60p on each piece of cloth that does not contain a fault but a loss of £1.50 on any pieces that do contain faults.

(d) Find the retailer's expected profit. (4)

This image shows a full page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, typical of notebook paper. There are no margins, text, or other markings on the page.

1. A manufacturer supplies DVD players to retailers in batches of 20. It has 5% of the players returned because they are faulty.

(a) Write down a suitable model for the distribution of the number of faulty DVD players in a batch.

(2)

Find the probability that a batch contains

(b) no faulty DVD players, (2)

(c) more than 4 faulty DVD players. (2)

(d) Find the mean and variance of the number of faulty DVD players in a batch. (2)

$$F(x) = \begin{cases} 0, & x < -2 \\ \frac{x+2}{6}, & -2 \leq x \leq 4 \\ 1, & x > 4 \end{cases}$$

- (a) Find $P(X < 0)$. (2)
- (b) Find the probability density function $f(x)$ of X . (3)
- (c) Write down the name of the distribution of X . (1)
- (d) Find the mean and the variance of X . (3)
- (e) Write down the value of $P(X = 1)$. (1)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

[illegible]

- (a) Find the probability that it will work continuously for 5 hours without a breakdown. (3)

(b) the robot will break down at least once,

- (c) there are exactly 2 breakdowns. (2)

(d) Write down the probability that the robot will break down in the following 8 hour period. Give a reason for your answer. (2)

- $$f(x) = \begin{cases} k(x^2 - 2x + 2) & 0 < x \leq 3 \\ 3k & 3 < x \leq 4 \\ 0 & \text{otherwise} \end{cases}$$

(a) Show that $k = \frac{1}{9}$ (4)

- (b) Find the cumulative distribution function $F(x)$. (6)

- (c) Find the mean of X . (3)

- (d) Show that the median of X lies between $x=2.6$ and $x=2.7$ (4)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- Find the probability that

- (3)**

(6)

Leave
blank**Question 6 continued****Q6****(Total 10 marks)**

- (b) List all the possible samples. (2)
- (c) Find the sampling distribution of the mean value of the samples. (6)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Question 7 continued

(a) a population, (1)

(b) a statistic. (1)

A researcher took a sample of 100 voters from a certain town and asked them who they would vote for in an election. The proportion who said they would vote for Dr Smith was 35%.

(c) State the population and the statistic in this case. (2)

(d) Explain what you understand by the sampling distribution of this statistic. (1)

- Find the probability that, in 9 games, Bhim loses

- (b) fewer than half of the games. (2)

Bhim and Joe agree to play a further 60 games.

- (d) Using a suitable approximation calculate the probability that Bhim loses more than 4 games.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- Find the probability that the length of the longer side of the rectangle is more than 6 cm long.

(5)

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire width, providing a template for writing or drawing. The margins are consistent on all sides.

- $$F(x) = \begin{cases} 0 & x < 1 \\ \frac{4}{9}(x^2 + 2x - 3) & 1 \leq x \leq 1.5 \\ 1 & x > 1.5 \end{cases}$$

- (c) Find $P(X \geq 1.2)$ (2)

(d) Find the probability that the lantern will still be working after 12 hours. (2)

- (a) Explain why the Poisson distribution may be a suitable model in this case. (1)

(b) (i) all users connect at their first attempt,
(ii) at least 4 users fail to connect at their first attempt.

(5)

(c) Using a suitable approximation, test whether or not the mean number of users per hour who failed to connect at their first attempt had increased. Use a 5% level of significance and state your hypotheses clearly. (9)

[illegible]

6. A company claims that a quarter of the bolts sent to them are faulty. To test this claim the number of faulty bolts in a random sample of 50 is recorded.

(a) Give two reasons why a binomial distribution may be a suitable model for the number of faulty bolts in the sample.

(2)

(b) Using a 5% significance level, find the critical region for a two-tailed test of the hypothesis that the probability of a bolt being faulty is $\frac{1}{4}$. The probability of rejection in either tail should be as close as possible to 0.025

(3)

(c) Find the actual significance level of this test.

(2)

In the sample of 50 the actual number of faulty bolts was 8.

(d) Comment on the company's claim in the light of this value. Justify your answer.

(2)

The machine making the bolts was reset and another sample of 50 bolts was taken. Only 5 were found to be faulty.

(e) Test at the 1% level of significance whether or not the probability of a faulty bolt has decreased. State your hypotheses clearly.

(6)

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- $$f(y) = \begin{cases} ky(a-y) & 0 \leq y \leq 3 \\ 0 & \text{otherwise} \end{cases}$$

(a) (i) Explain why $a \geq 3$

(ii) Show that $k = \frac{2}{9(a-2)}$

Given that $E(Y) = 1.75$

- (6)

(c) sketch the probability density function,

(2)

- (1)

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Materials required for examination

Mathematical Formulae (Pink)

Items included with question papers

Nil

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer ALL the questions.

You must write your answer to each question in the space following the question.

Values from the statistical tables should be quoted in full. When a calculator is used, the answer should be given to an appropriate degree of accuracy.

Information for Candidates

A booklet 'Mathematical Formulae and Statistical Tables' is provided.

Full marks may be obtained for answers to ALL questions.

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2).

There are 7 questions in this question paper. The total mark for this paper is 75.

There are 24 pages in this question paper. Any blank pages are indicated.

Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled.

You should show sufficient working to make your methods clear to the Examiner.

Answers without working may not gain full credit.

This publication may be reproduced only in accordance with Edexcel Limited copyright policy.

edexcel 
advancing learning, changing lives

- (d) Using a suitable approximation, find the probability that the doctor will offer all patients a vaccination.
- (3)**

2. A student takes a multiple choice test. The test is made up of 10 questions each with 5 possible answers. The student gets 4 questions correct. Her teacher claims she was guessing the answers. Using a one tailed test, at the 5% level of significance, test whether or not there is evidence to reject the teacher's claim.
State your hypotheses clearly.

(6)

Leave
blank

4. Richard regularly travels to work on a ferry. Over a long period of time, Richard has found that the ferry is late on average 2 times every week. The company buys a new ferry to improve the service. In the 4-week period after the new ferry is launched, Richard finds the ferry is late 3 times and claims the service has improved. Assuming that the number of times the ferry is late has a Poisson distribution, test Richard's claim at the 5% level of significance. State your hypotheses clearly.

(6)

-

- (a) Show that $f(x) = 4 - 8x$ for $0 \leq x \leq 0.5$ and specify $f(x)$ for all real values of x . (4)
- (b) Find the cumulative distribution function $F(x)$. (4)
- (c) Find the median of X . (3)
- (d) Write down the mode of X . (1)
- (e) State, with a reason, the skewness of X . (1)

Leave
blank

Question 5 continued

- (c) find the probability that in any given minute
 - (i) no cars arrive,
 - (ii) more than 3 cars arrive.

(3)
- (d) In any given 4 minute period, find m such that $P(X > m) = 0.0487$

(3)
- (e) Using a suitable approximation find the probability that fewer than 15 cars arrive in any given 10 minute period.

(6)

Leave
blank

Question 6 continued

- $$f(x) = \begin{cases} kx(81 - x^2) & 0 \leq x \leq 9 \\ 0 & \text{otherwise} \end{cases}$$

- (d) Find the probability that at least 2 of the customers queue for more than 5 minutes. (3)

Leave
blank

- (1)

(2)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a full page of blank, lined paper. It features approximately 28 horizontal blue or grey lines spaced evenly apart, typical of standard notebook paper. The lines extend across the entire width of the page, leaving small margins at the top and bottom. There are no vertical lines, text, or other markings on the page.

3.

**Figure 1**

Figure 1 shows a sketch of the probability density function $f(x)$ of the random variable X .

For $0 \leq x \leq 3$, $f(x)$ is represented by a curve OB with equation $f(x) = kx^2$, where k is a constant.

For $3 \leq x \leq a$, where a is a constant, $f(x)$ is represented by a straight line passing through B and the point $(a, 0)$.

For all other values of x , $f(x) = 0$.

Given that the mode of X = the median of X , find

(a) the mode, (1)

(b) the value of k , (4)

(c) the value of a . (3)

Without calculating $E(X)$ and with reference to the skewness of the distribution

(d) state, giving your reason, whether $E(X) < 3$, $E(X) = 3$ or $E(X) > 3$. (2)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- A stick is selected at random from the box.

- To win a bag of sweets, a player must select 3 sticks and wins if the length of the longest stick is more than 9.5 cm.

- To win a soft toy, a player must select 6 sticks and wins the toy if more than four of the sticks are shorter than 7.6 cm.

- (c) Find the probability of winning a soft toy. (4)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- (a) Find the probability that Jim's plank contains at most 3 defects.

Shivani buys 6 planks each of length 100 cm.

- (5)

- (6)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- (6)

(8)

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire width, providing a template for writing or drawing. The margins are consistent on all sides.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

7. The continuous random variable X has probability density function given by

$$f(x) = \begin{cases} \frac{3}{32}(x-1)(5-x) & 1 \leq x \leq 5 \\ 0 & \text{otherwise} \end{cases}$$

- (a) Sketch $f(x)$ showing clearly the points where it meets the x -axis. (2)
- (b) Write down the value of the mean, μ , of X . (1)
- (c) Show that $E(X^2) = 9.8$ (4)
- (d) Find the standard deviation, σ , of X . (2)

The cumulative distribution function of X is given by

$$F(x) = \begin{cases} 0 & x < 1 \\ \frac{1}{32}(a - 15x + 9x^2 - x^3) & 1 \leq x \leq 5 \\ 1 & x > 5 \end{cases}$$

where a is a constant.

- (e) Find the value of a . (2)
- (f) Show that the lower quartile of X , q_1 , lies between 2.29 and 2.31 (3)
- (g) Hence find the upper quartile of X , giving your answer to 1 decimal place. (1)
- (h) Find, to 2 decimal places, the value of k so that

$$P(\mu - k\sigma < X < \mu + k\sigma) = 0.5$$
(2)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

PEARSON

- Find

- (b) the variance of the time taken to checkout at the supermarket, (2)

- (c) the probability that Elaine will take more than 7 minutes to checkout. (2)

Given that Elaine has already spent 4 minutes at the checkout,

- (d) find the probability that she will take a total of less than 6 minutes to checkout. **(3)**

- State your hypotheses clearly.

(7)

- Find the probability that

- (b) more than 3 sales are made in 20 calls. (2)

(c) Find the least number of calls each day a representative should make to achieve this requirement. (2)

- (d) Calculate the least number of calls that need to be made by a representative for the probability of at least 1 sale to exceed 0.95 (3)

(1)

(2)

(3)

(3)

(7)

Leave
blank

Question 4 continued

- (5)

(2)

(Total 7 marks)

Q5

- $$f(x) = \begin{cases} \frac{1}{2} & 0 \leq x < 1 \\ x - \frac{1}{2} & 1 \leq x \leq k \\ 0 & \text{otherwise} \end{cases}$$

(a) Sketch the graph of $f(x)$.

(2)

- (b) Show that $k = \frac{1}{2}(1 + \sqrt{5})$.

(4)

- (c) Define fully the cumulative distribution function $F(x)$.

(6)

- (d) Find $P(0.5 < X < 1.5)$.

(2)

- (e) Write down the median of X and the mode of X .

(2)

- (f) Describe the skewness of the distribution of X . Give a reason for your answer.

(2)

Leave
blank

Question 6 continued

- (c) Test the estate agent's claim at the 5% level of significance. State your hypotheses clearly. (5)

Leave
blank

Question 7 continued

- (a) Find the probability that a randomly selected sweet has a length greater than 24 mm. **(2)**

(b) Find the probability that a randomly selected bag will contain at least 8 sweets with length greater than 24 mm.

- (c) Find the probability that 2 randomly selected bags will both contain at least 8 sweets with length greater than 24 mm.

- Given that

(a) find the critical region for the test statistic such that the probability in each tail is as close as possible to 2.5%.

(3)

- (b) State the probability of incorrectly rejecting H_0 using this critical region.

(2)

- (2)

(7)

- (5)

(3)

(6)

- $$f(x) = \begin{cases} \frac{3}{32}x(k-x) & 0 \leq x \leq k \\ 0 & \text{otherwise} \end{cases}$$

- (a) Show that the value of k is 4 (4)
- (b) Write down the value of $E(X)$. (1)
- (c) Calculate $\text{Var}(X)$. (4)
- (d) Find the probability that a randomly chosen customer's queueing time will differ from the mean by at least half a minute. (3)

- Find the sampling distribution for the range of the numbers on the 3 selected balls.

(6)

$$f(x) = \begin{cases} \frac{x^2}{45} & 0 \leq x \leq 3 \\ \frac{1}{5} & 3 < x < 4 \\ \frac{1}{3} - \frac{x}{30} & 4 \leq x \leq 10 \\ 0 & \text{otherwise} \end{cases}.$$

- (a) Sketch $f(x)$ for $0 \leq x \leq 10$ (4)
- (b) Find the cumulative distribution function $F(x)$ for all values of x . (8)
- (c) Find $P(X \leq 8)$. (2)

- A random sample of 10 customers is selected.

- (i) exactly 6 ask for water with their meal,
- (ii) less than 9 ask for water with their meal.

(5)

(b) Find the smallest value of n such that

$$P(X < n) \geq 0.9$$

where the random variable X represents the number of these customers who ask for water.

(3)

- (2)

(3)

-
- This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(a) Given that $p = 0.25$ find

(ii) $P(X \geq 7)$

(3)

(3)

(4)

- (a) Write down the mean of X . (1)

- (b) Find $P(X \leq 2.4)$ (2)

- (c) Find $P(-3 < X - 5 < 3)$ (2)

(d) Use integration to show that $E(Y^2) = 7a^2$ (4)

- (e) Find $\text{Var}(Y)$.

- (f) Given that $P(X < \frac{8}{3}) = P(Y < \frac{8}{3})$, find the value of a . (3)

- The probability that the mosquito survives for more than t days is

$$\frac{225}{(t+15)^2}, \quad t \geq 0$$

- $$F(t) = \begin{cases} 1 - \frac{225}{(t+15)^2} & t \geq 0 \\ 0 & \text{otherwise} \end{cases} \quad (1)$$

- (2)

- (3)

(4)

- (d) Using a 1% level of significance, find the smallest value of n for which the hypothesis $H_0 : p = 0.45$ will be rejected in favour of $H_1 : p < 0.45$ (3)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- $$f(x) = \begin{cases} a + bx & 0 \leq x \leq 5 \\ 0 & \text{otherwise} \end{cases}$$

(a) Show that $10a + 25b = 2$

(4)

(b) find a second equation in a and b ,

(3)

(c) hence find the value of a and the value of b .

(3)

(d) Find, to 3 significant figures, the median of X .

(3)

(e) Comment on the skewness. Give a reason for your answer.

(2)

- (3)

$$F(y) = \begin{cases} 0 & y < 0 \\ \frac{1}{4}(y^3 - 4y^2 + ky) & 0 \leq y \leq 2 \\ 1 & y > 2 \end{cases}$$

(a) Find the value of k .

(2)

(3)

(2)

- (2)

- $$f(x) = \begin{cases} k(3 + 2x - x^2) & 0 \leq x \leq 3 \\ 0 & \text{otherwise} \end{cases}$$

(a) Show that $k = \frac{1}{9}$ **(3)**

- (b) Find the mode of X . (2)

- (c) Use algebraic integration to find $E(X)$. (4)

(d) describe the skewness of X , giving a reason for your answer. (2)

- 50% are 1p coins
20% are 2p coins
30% are 5p coins

(a) List all the possible samples of size 3 with median $5p$.

(2)

- (b) Find the probability that the median value of the sample is $5p$.

(4)

- (c) Find the sampling distribution of the median of samples of size 3

(5)

- Find the probability that

- (b) the total number of defects in a randomly chosen 6 metre length of cloth is more than 2
- (3)**

A tailor buys 300 metres of cloth.

- (c) Using a suitable approximation find the probability that the tailor's cloth will contain less than 90 defects.
- (5)**

Q2

7
Turn over

- (c) Using a suitable approximation and a 5% level of significance, test whether or not the average rate of sales per day has increased during these six months. State your hypotheses clearly.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- $$F(x) = \begin{cases} 0 & x < 1 \\ \frac{x^3}{10} + \frac{3x^2}{10} + ax + b & 1 \leq x \leq 2 \\ 1 & x > 2 \end{cases}$$

(a) Find the value of a and the value of b .

(4)

- (1)

- (4)

- (3)

- (a) A batch is selected at random. Using a 5% significance level, find the critical region for a two tailed test that the probability of an article chosen at random being defective is 0.25

(5)

(b) Test at the 5% level of significance whether or not there is evidence that the changes to the process have reduced the percentage of defective articles. State your hypotheses clearly.

(5)

Q6

--	--

- (d) Using a suitable approximation, find the probability that more than 10 people telephoned by the call centre buy a magazine in a randomly chosen hour. (3)
