# Further Pure Mathematics

## Paper 2

Monday 21 May 2012 – Afternoon <b>Time: 2 hours</b>	Paper Reference <b>4PM0/02</b>
--------------------------------------------------------	-----------------------------------

<b>Calculators may be used.</b>	Total Marks
---------------------------------	-------------

### Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Without sufficient working, correct answers may be awarded no marks.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*

### Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

2 Given that  $x = t^3 + 4$  and  $y = 1 - t + 5t^2$

- (a) find (i)  $\frac{dx}{dt}$
  - (ii)  $\frac{dy}{dt}$
- (2)

(b) Find  $\frac{dy}{dx}$  in terms of  $t$ .

(Total for Question 2 is 4 marks)

**3** Solve the equations

$$2x^2 + xy - y^2 = 36$$

$$x + 2y = 1$$

(6)

Handwriting practice lines consisting of 20 horizontal dotted lines for writing the solution.

Question 3 continued

Dotted lines for writing.

**(Total for Question 3 is 6 marks)**

**Question 4 continued**

Area for writing the answer to Question 4 continued, consisting of 25 horizontal dotted lines.

**(Total for Question 4 is 7 marks)**

**Question 5 continued**

Handwriting practice area consisting of 25 horizontal dotted lines for writing.

**Question 5 continued**

A series of horizontal dotted lines for writing.

**Question 5 continued**

[Dotted lines for writing]

**(Total for Question 5 is 8 marks)**

P 4 1 7 7 5 A 0 1 1 3 2

6 The first term of a geometric series  $S$  is  $\sqrt{2}$

The second term of  $S$  is  $\sqrt{2} - 2$

(a) (i) Find the exact value of the common ratio of  $S$ .

(ii) Find the third term of  $S$ , giving your answer in the form  $a\sqrt{2} + b$ , where  $a$  and  $b$  are integers.

(5)

(b) (i) Explain why the series is convergent.

(ii) Find the sum to infinity of  $S$ .

(3)

Dotted lines for writing answers.

**Question 6 continued**

Area with horizontal dotted lines for writing.

**(Total for Question 6 is 8 marks)**

7 The curve  $G$  has equation  $y = 3 - \frac{1}{x-1}$ ,  $x \neq 1$

(a) Find an equation of the asymptote to  $G$  which is parallel to

(i) the  $x$ -axis,

(ii) the  $y$ -axis.

(2)

(b) Find the coordinates of the point where  $G$  crosses

(i) the  $x$ -axis,

(ii) the  $y$ -axis.

(2)

(c) Sketch  $G$ , showing clearly the asymptotes and the coordinates of the points where the curve crosses the coordinate axes.

(3)

A straight line  $l$  intersects  $G$  at the points  $P$  and  $Q$ . The  $x$ -coordinate of  $P$  and the

$x$ -coordinate of  $Q$  are roots of the equation  $2x - 3 = \frac{1}{x-1}$

(d) Find an equation of  $l$ .

8 The curve  $C$  has equation  $y = 4x + 8 + \frac{25}{x-2}, x \neq 2$

(a) Find the coordinates of the stationary points on  $C$ .

(6)

(b) Determine the nature of each of these stationary points.

**Question 8 continued**

Handwriting practice area consisting of 25 horizontal dotted lines.

**Question 8 continued**

Handwriting practice area consisting of 25 horizontal dotted lines.

9 The particle  $M$  is moving along the straight line  $PQ$  with a constant acceleration of  $2 \text{ m/s}^2$ .

At time  $t = 0$ ,  $M$  is at the point  $P$  moving with velocity  $6 \text{ m/s}$  towards  $Q$ .

(a) Find an expression for the velocity of  $M$  at time  $t$  seconds. (2)

(b) Show that the displacement of  $M$  from  $P$  at time  $t$  seconds is  $(t^2 + 6t)$  metres. (2)

A second particle  $N$  is moving along  $PQ$ . The acceleration of  $N$  at time  $t$  seconds is  $6t \text{ m/s}^2$ .  
At time  $t = 0$ ,  $N$  is stationary at the point  $P$ .

(c) Find an expression for the velocity of  $N$  at time  $t$  seconds. (2)

(d) Find an expression for the displacement of  $N$  from  $P$  at time  $t$  seconds. (2)

(e) Find the distance between  $M$  and  $N$  at time  $t = 5$  seconds. (2)

(f) Find the value of  $t$ ,  $t > 0$ , when the two particles meet. (3)

**Question 9 continued**

Handwriting practice area consisting of 25 horizontal dotted lines.

P 4 1 7 7 5 A 0 2 1 3 2

**Question 9 continued**

Handwriting practice area consisting of 20 horizontal dotted lines.

**Question 9 continued**

A large rectangular area with rounded corners, containing numerous horizontal dotted lines for writing.

**(Total for Question 9 is 13 marks)**

10 The points  $A, B, C$  and  $D$  are the vertices of a quadrilateral and

$$\vec{AB} = 3\mathbf{i} + 5\mathbf{j}, \quad \vec{AC} = 6\mathbf{i} + 6\mathbf{j} \quad \text{and} \quad \vec{AD} = 9\mathbf{i} + 3\mathbf{j}$$

(a) (i) Find  $\vec{BC}$

(ii) Hence show that  $ABCD$  is a trapezium.

(3)

(b) (i) Find the exact value of  $|\vec{BD}|$

(ii) Find a unit vector parallel to  $\vec{BD}$

(4)

The point  $F$  is on the line  $BD$  and  $BF : FD = 1 : 2$

(c) Find  $\vec{AF}$

(2)

The point  $E$  is on the line  $AD$  such that  $ABCE$  is a parallelogram.

(d) (i) Show that  $F$  lies on the line  $CE$

(ii) Find the ratio  $EF : FC$

(6)

**Question 10 continued**

Handwriting practice area consisting of 25 horizontal dotted lines.

**Question 10 continued**

Handwriting practice area consisting of 25 horizontal dotted lines.

11

Diagram **NOT** accurately drawn

Figure 1

Figure 1 shows a truncated right pyramid. The base  $ABCD$  is a square with sides of length 10 cm. The top  $EFGH$  is a square with sides of length 4 cm. The base is parallel to the top and  $AE = BF = CG = DH$ .

The point  $P$  is on the line  $AC$  such that angle  $APE$  is a right-angle and  $EP = 12$  cm.

(a) Find, in centimetres, the exact length of

- (i)  $AC$                       (ii)  $EG$                       (iii)  $AP$

(6)

(b) Find, in centimetres to 3 significant figures, the length of  $AE$ .

(2)

(c) Find, in degrees to 1 decimal place, the angle between the line  $AE$  and the plane  $ABCD$ .

(2)

The point  $Q$  is on the line  $AB$ . Angle  $AQP$  is a right-angle.

(d) (i) Show that  $PQ = 3$  cm.

(ii) Write down, in centimetres, the length of  $AQ$ .

(2)

(e) Find, in degrees to 1 decimal place, the angle between the line  $AE$  and the line  $AB$ .

(2)

(f) Find, in degrees to 1 decimal place, the angle between the plane  $ABFE$  and the plane  $ABCD$ .

(3)

**Question 11 continued**

Dotted lines for writing.
