INSTRUCTIONS TO CANDIDATES

- Write your name, your centre number and candidate number in the boxes above. Please write clearly and in capital letters.
- Use black ink. Pencil may be used for graphs and diagrams only.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Write your answer to each question in the space provided. If additional space is required, you should use the lined pages at the end of this booklet. The question number(s) must be clearly shown.
- Answer **all** questions in Sections A, B and C.
- Do **not** write in the bar codes.

INFORMATION FOR CANDIDATES

- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is **60**.
- Quality of written communication is assessed throughout this paper.
- This document consists of **12** pages. Any blank pages are indicated.

2

Section A

Answer **all** questions.

Psychologists wanted to investigate why we don't laugh when we tickle ourselves. One idea is that it is a social act that is out of our control and must be done to us by another person. To investigate this, participants had the sole of their feet tickled by another person at any time during a 30 second period. Later on the same participants had to tickle themselves. They put their feet on a tickling machine (a feather on a rotating turntable) at any time they chose during a 30 second period. The volume of laughter was recorded in decibels.

1 (a) Identify the experimental design used in this study.

.....
.....
.....
..... [2]

(b) Outline **one** strength and **one** weakness of using this experimental design in this study.

4

Section B

Answer **all** questions.

A psychologist conducted a correlation study to investigate the relationship between the number of friends people claim to have on internet social networking sites and the number of times they go out socialising each month. The data was obtained from students in a psychology class who left the classroom one at a time to provide details to a researcher sitting outside.

The findings from the study are presented in the scattergraph below.

4 (a) How many participants was data collected from in this study and how do you know this?
.....
.....
.....
..... [2]

(b) Name and briefly describe the sampling method in this study.
.....
.....
.....
..... [2]

6 (a) What is qualitative data?

.....
.....
.....
..... [2]

(b) Suggest **two** examples of qualitative data that could have been collected in this study.
